GARMENT NEWS

REPORTING FROM REALITY

We all have that collection of hats, from which one might just complete your outfit on one lucky day. Headwear is a garment that can be both so essential and so not – the perfect metaphor for overconsumption. For many of us, the hats we own are purely decorative, that's the luxury of life in 2022. Access to anything we want at all times, understanding the real need for a clothing item becomes increasingly challenging. We are reporting to you from reality to say: feed your shopping addiction at the risk of your future but please,

don't blame it on the hat.
