Exploring the poetics of spatial narratives

Welcome to our portfolio, STASIS. Having had the opportunity to work at some amazing architecture firms in our career, we were inspired by the poetics of conveying spatial narratives. Our collaborative work specializes in bespoke high-end visualization and translating ideas into visual formats through a diverse range of mediums. We are currently based in New York City as architectural designers, continuing to explore the craft.

Feel free to explore our portfolio and get in touch with us for collaborations, inquiries, or just to say hello!
