- For the last century, with public attention fixed on literature, the sciences, and the arts, and even on the sports themselves, the University kept its standards and its traditions. The University's reputation for excellence in the sciences was maintained by the University's faculty, which was composed of the best scientists of the time. The University's reputation for excellence in the arts was maintained by the University's faculty, which was composed of the best artists of the time. The University's reputation for excellence in the sciences was maintained by the University's faculty, which was composed of the best scientists of the time. The University's reputation for excellence in the arts was maintained by the University's faculty, which was composed of the best artists of the time.

- ☐ a) Disputed transfer and national status
☐ b) Sublime transfer and national status
- 7.2. *Transfer of the capital of the Republic of Turkey from Istanbul to Ankara*
 The transfer of the capital of the Republic of Turkey from Istanbul to Ankara was a significant event in the history of the country. It was decided by the Grand National Assembly of Turkey in 1915, during the Turkish War of Independence. The transfer was completed in 1923, when the capital was moved to Ankara. This decision was based on several factors, including the need for a more central location for the government, the desire to move away from the Ottoman legacy, and the need for a more secure location for the capital. The transfer of the capital to Ankara was a symbol of the new Turkish Republic's commitment to modernization and progress.
