RE: Support for Funding Application Creative Australia

Dear Panel,

Liquid Architecture is thrilled to support Transmission Point, a curatorial project led by Anabelle Lacroix at La Perouse Museum.

Our team has met with Anabelle in the development of Transmission Point, and we have collaboratively worked on the project's budget and structure.

We are pleased to confirm the following commitments:

- Auspicing of the grant application to support the project's delivery.
- \$4,000 AUD in-kind support, including staff time, resources, and infrastructure.
- Production of a podcast to document the live program, amplify artists' voices, and share interviews with participating practitioners.
- Feature review on Disclaimer Online Journal.

We believe Transmission Point is an essential project that deserves funding. It significantly enhances access to wider audiences and fosters artist growth for long lasting peer-to-peer support in sound and experimental art. The initiative represents a vital step forward in the support of these practices across regions and communities.

This partnership presents an exciting opportunity for us to extend our programming interstate, fostering deeper engagement with artists across New South Wales, Victoria, and Tasmania.

We are also particularly enthusiastic about the project's potential to cultivate international connections, especially within radio and sound communities—an area where Liquid Architecture has long-standing and meaningful relationships.

Regards

Kristi Monfries
