teenage engineering releases field accessories collection.

the range of bags and accessories is their first full collection and the most recent addition to their field system. the bags are inspired by, and designed to fit, their own devices, each crafted from materials made to withstand the elements.

taking inspiration from outdoor expeditions and industry, the materials have been chosen for their tactile qualities and durability. the shell fabric in sturdy nylon 66 has been treated with fire retardant and backed with water-repellent polyurethane, with lining in water-repellent japanese mini ripstop nylon. all hardware is made from strong and reliable premium aluminum alloy.

with the design philosophy of using as little material as possible, each bag is designed to securely fit each device. each bag features a variety of pockets and loops, providing versatile ways of wear and multiple storage options.

the collection comprises of:

- field pouch small
- field small TX-6 bag
- field medium OP-Z bag
- field large OP-1 bag
- field OB-4 shoulder bag
- field waist bag
- field backpack
- field tote bag
- field belt strap
- field keychain opener
- field keychain carabiner
- field bottle
- field bottle bag
- field accordion bag
- OP-1 field leather wrap
- field notebook
- field sweatshirt
- field t-shirt
- field patches

about teenage engineering
teenage engineering is developing the alternative future of consumer electronics, each invention built to last.

from reimagining music making with the iconic OP-1 portable synthesizer and growing the synth population with the affordable pocket operator series, to rethinking listening with the OD-11 ortho directional speaker and the OB-4 magic radio, they have applied their signature mindset to a new legacy of enduring technologies.

their creations have attracted collaborations with well-known artists and brands, sharing in their vision to integrate creativity into the everyday. teenage engineering was founded in 2007 and is based in stockholm, sweden.
