Donghua University Student Union Organization Department(member to cadre)
Responsible for the organization and planning of routine activities of the Student Union Oct.2019-Oct.2019

SKILLS

Graphic & Visual Design: Proficient in using industry-standard software such as Adobe Illustrator, Photoshop, and Procreate for creating high-quality graphic designs.

Fashion Design & Production: Expert in creating hand-drawn sketches and digital fashion illustrations, bringing design concepts to life with precision and artistry. Highly skilled in pattern making, draping, and sewing, with a deep understanding of garment construction techniques. Proficient in digital fashion production, seamlessly integrating traditional methods with advanced technology to develop and execute complete fashion designs from concept to final product.

3D Modeling & Production: Capable of independently handling the entire 3D production process, including 3D scanning, reconstruction, modeling, character and garment simulation, material application, lighting, scene creation, animation, and rendering. I am proficient in a wide range of 3D software, such as Cinema 4D, Blender, Unreal Engine, Style3D, Reality Capture, CLO 3D, and Marvelous Designer.

Video Editing & Production: Experienced in using Jianying and Adobe Premiere Pro for video editing and animation production.

Interaction Design: Proficient in using TouchDesigner for creating interactive visual experiences.

Programming: I have a foundational understanding of basic coding and its practical applications. My knowledge includes writing and applying simple code to enhance design projects, automate tasks, and create interactive elements within digital platforms.
