Is punching a hole in the wall a good way to
show off gains when you have a girl over? Not
randomly, if i pretend to have a phonecall then
get mad and punch the wall through

Colin Powell passed away this morning at the age of 84. Powell, the great-uncle of Pete Wentz, who was married to singer Ashlee Simpson from 2008 to 2011 and who fronted the seminal early-oughts emo band Fall Out Boy, whose second studio album "From Under the Cork Tree" went double platinum in the United States, served in the U.S. government. Wentz has had some trouble with underage fans, and spoken openly about his struggles with mental illness—he even wrote a song about a suicide attempt he made in 2005—but he never lied to the American people and the international community in order to start a war in Iraq under what he knew were false pretenses, like his great-uncle Colin Powell. As Secretary of State under George W. Bush, Powell reached the highest government position of any Black American up to that time, and his success opened doors for the rise of ISIS in the ruins of an incompetently occupied Iraq. He is survived by his great-nephew Pete Wentz, and Henry Kissinger somehow.

1995 was an ok year

It is 2028.

There was no revolution. You are stuck in a job that pays 75% of your life expenses. On the weekends, you write essays for lazy exchange students.

You do not remember what it was like to not spend most of your entire check on rent.

But at least, when you get home, before you collapse into your shitty foam rectangle on the floor near the window, you get to browse memes.

"Ha," you rasp, scrolling past with lightning fast fingers on your cracked screen. "Ha. Ha."

There are so, so many layers to them. All of them, cascading off each other, on so many levels of irony, all flowing into a seamless peak of humor.

And you understand them all.
