

*Greater Loop* 2011, forged, welded and painted steel, 87H cm x 106W cm x 48D cm

*"Greater Loop"* is a structure in constant repetitive movement that becomes the surface for a process of dynamic exploration. It is a representation of the hypnotic trance of consumerist cycle within a material culture where everything is transformed into exchangeable commodities, purely aesthetic objects - a form of living death.

Artist Statement, March 2010
