

**Fig. 8** Excerpts of the Product Video showing a possible User Journey (see Fig. 9).

## ACKNOWLEDGMENTS

This project was achieved during a two-day hackathon facilitated by our supervisors and lecturers in the master's programme "Human-Computer-Interaction" of the Paris-Lodron-Universität Salzburg and University of Applied Sciences Salzburg. Our gratitude goes to Prof. Dipl.-Ing. Christopher Frauenberger Ph.D. and Dr. Mascha Beuthel for their constant guidance and support in this project. We would also like to thank the Pioniergarage Salzburg for providing us with equipment and support during the hackathon, which was essential for the production of our artefacts.
