

TRANSGENDER HEALTHCARE TRAINING

ABOUT THIS COURSE

This course aims to improve your knowledge of gender-affirming healthcare and implement positive change for transgender people in primary care. The course includes a 15-minute training film followed by 2 case studies. We hope that the film is engaging and conveys the importance of gender-affirming healthcare through stories from real peoples' experiences.

LEARNING OUTCOME

The learning outcomes for this course are to;

- Improve inclusivity in your practice through non-verbal cues,
- Improve interpersonal communication skills,
- Improve your understanding of the referral process to the GDC and
- Improve your skills in prescribing hormones -- from understanding the indications, obtaining informed consent and prescription monitoring.
