INSPIRATION

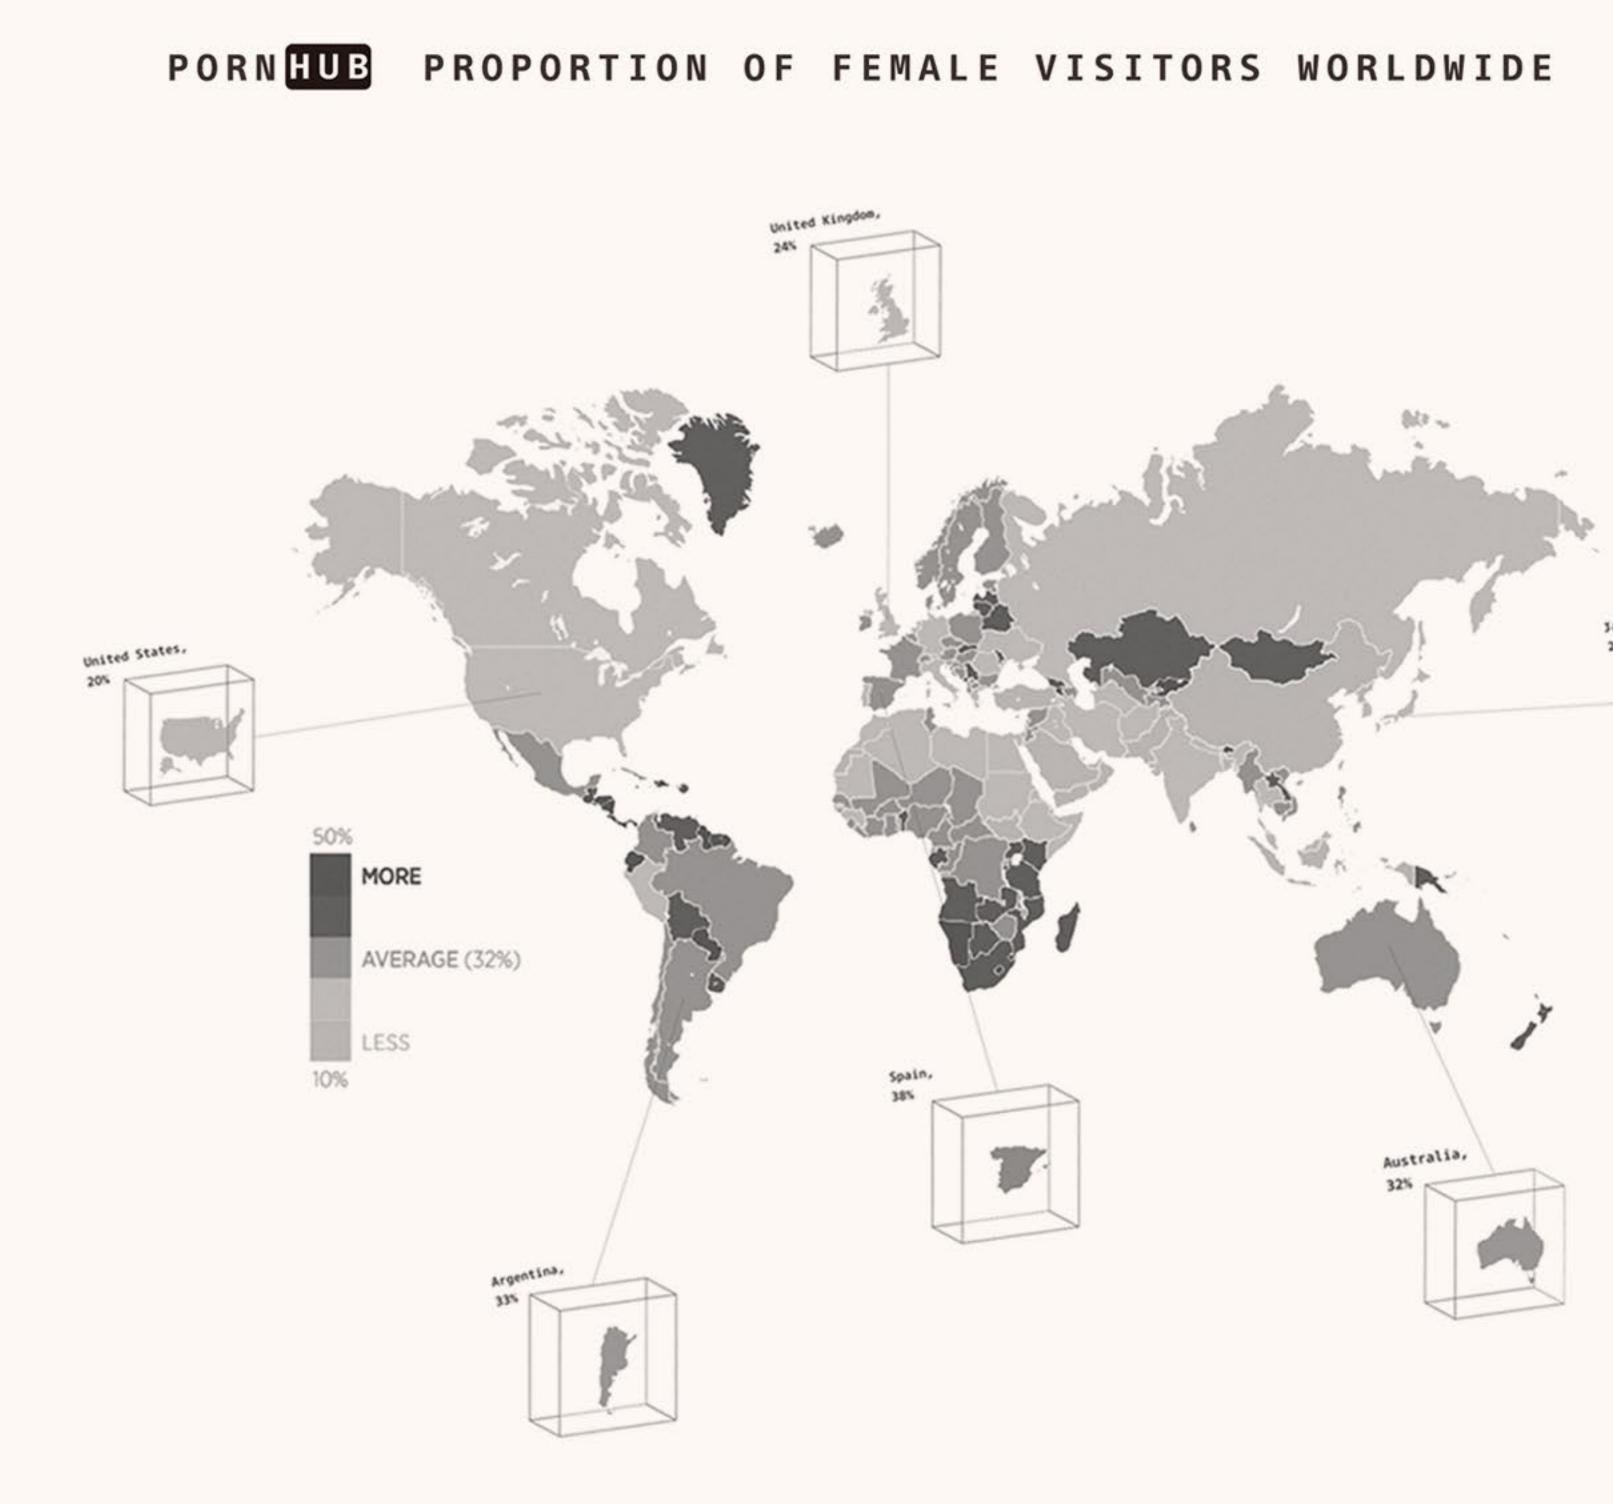

Everything in life is related to sex, but sex itself is not about sex, it is about power. We reject mainstream porn, we are used to seeing a submissive female image when orgasm belongs to the male genre. In fact, women's sexual behavior is very complex, but they are forced to have sex that does not necessarily bring them pleasure in mainstream pornographic films. Through this film festival, we want to give feminist porn more experimental space and actively explore and realize women's sexuality. "Insertion" is no longer the most important content. We are more diversified, focusing on the desire exploration from the perspective of women and the infinite possibility of intimacy. Love and sex have always been the eternal topics of human beings. When every woman can find her own needs and feel sex and love with a assertive attitude without avoiding herself in sex, the positive significance of porn can be most justly reflected.

INTERNATIONAL PORN FESTIVAL

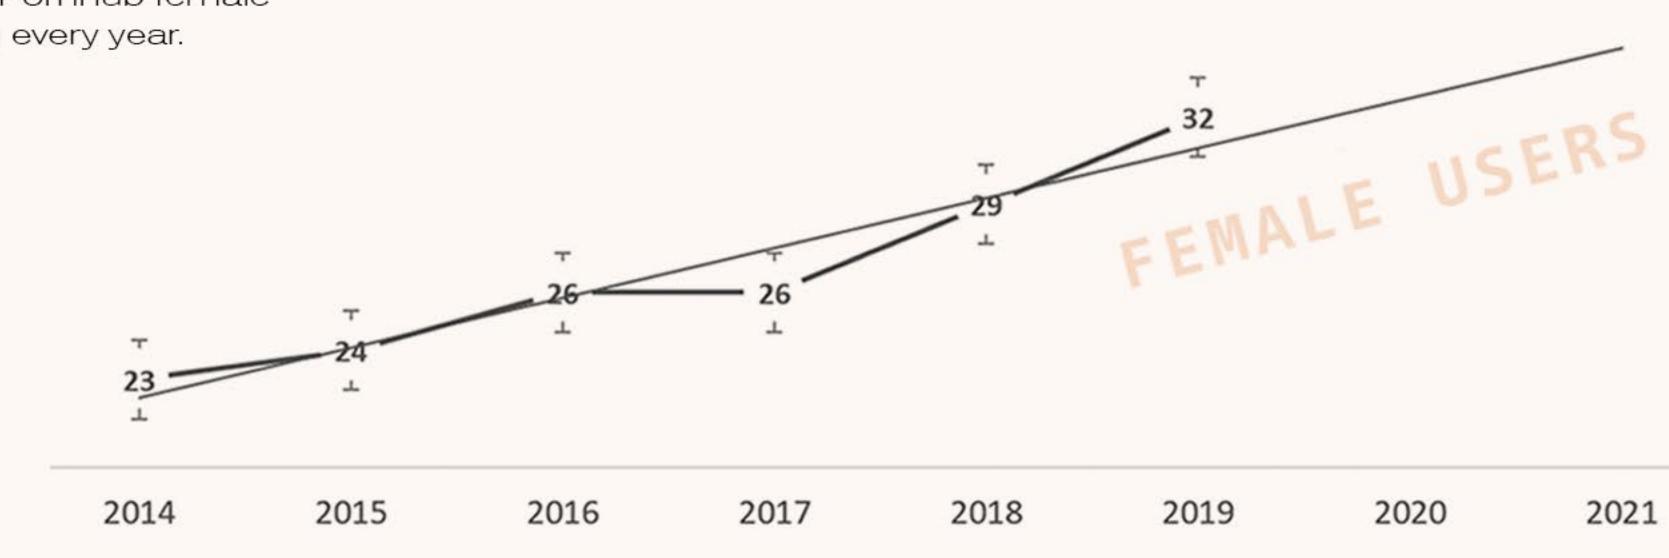

[RESEARCH]

O1. FEMALE SEXUAL

Sexual existence can be understood as the way people experience their body, happiness and desires. Taking Pornhub female user visits as a rough indicator offemale sexual existence", there is indeed a positive relationship between it and thegender equality index of countries around the world.

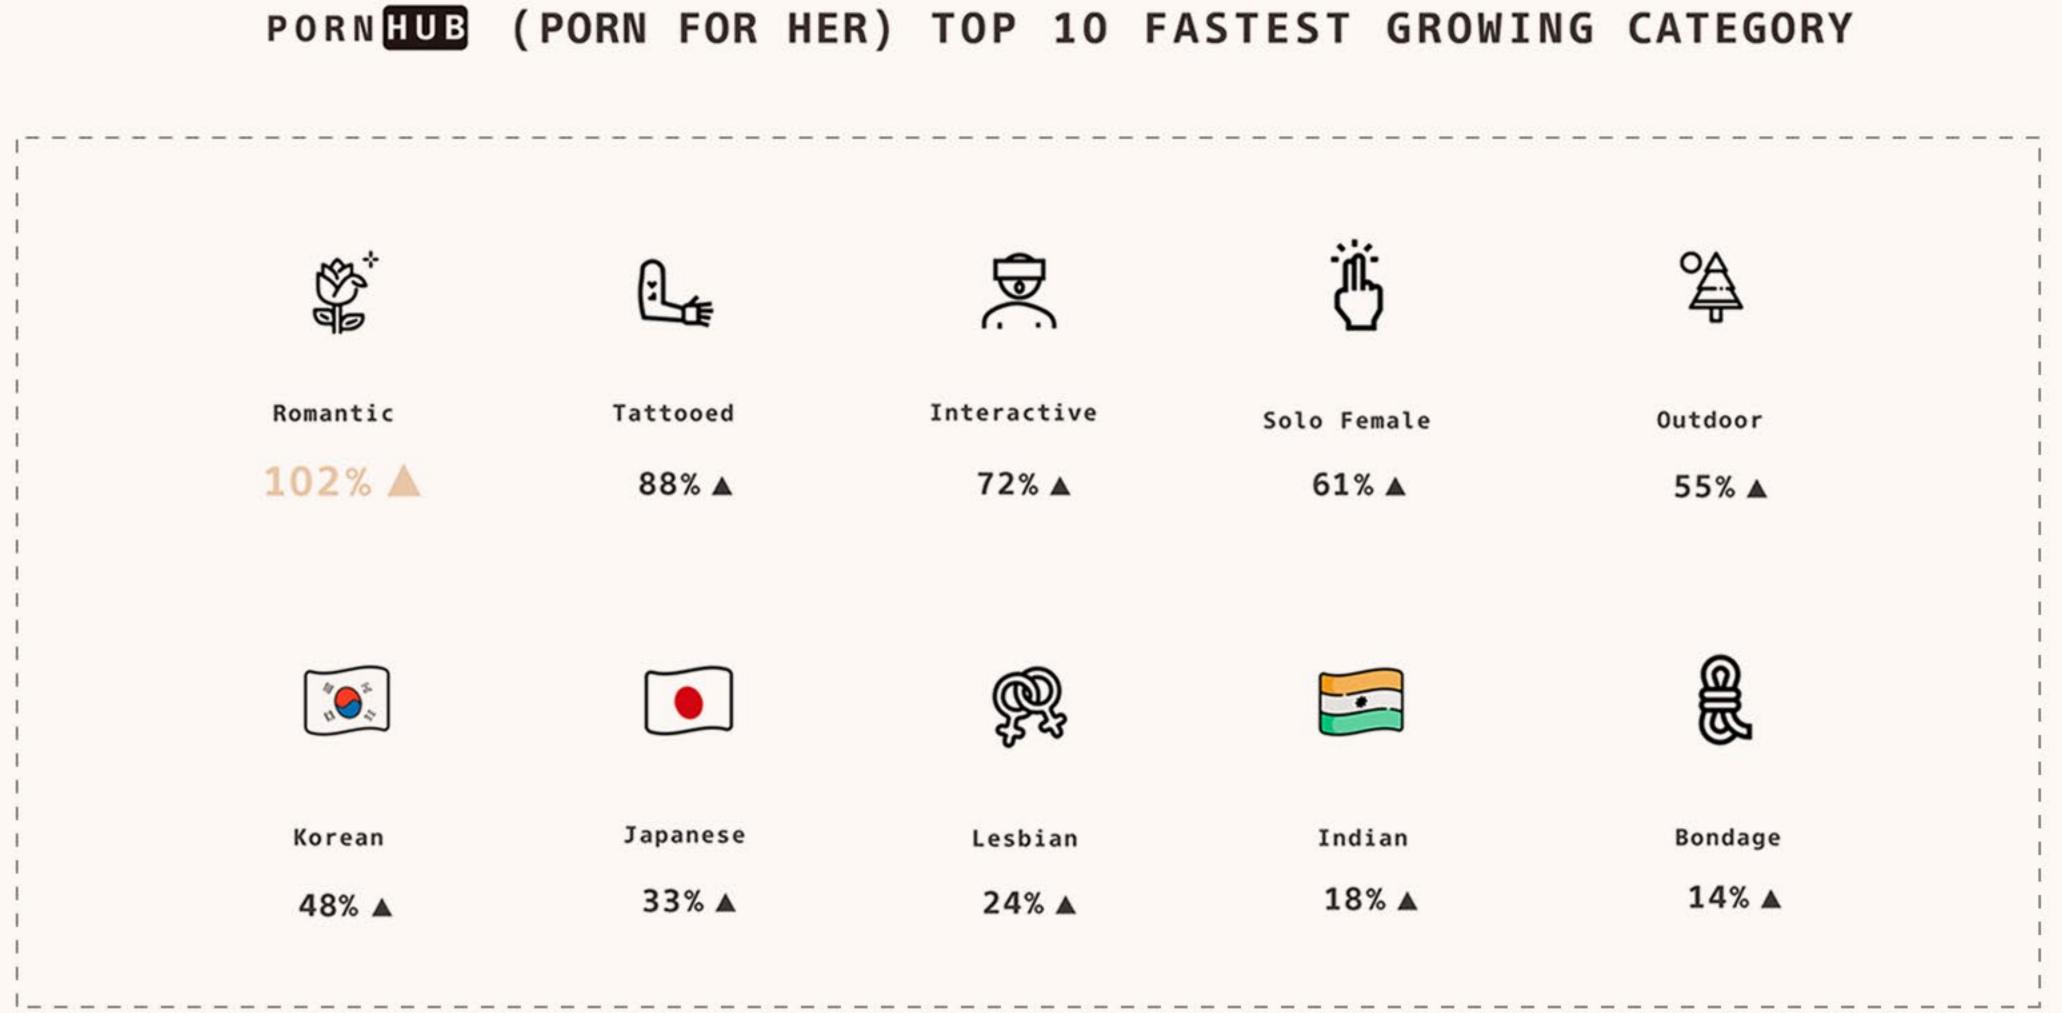

PORNHUE PROPORTION OF FEMALE USERS

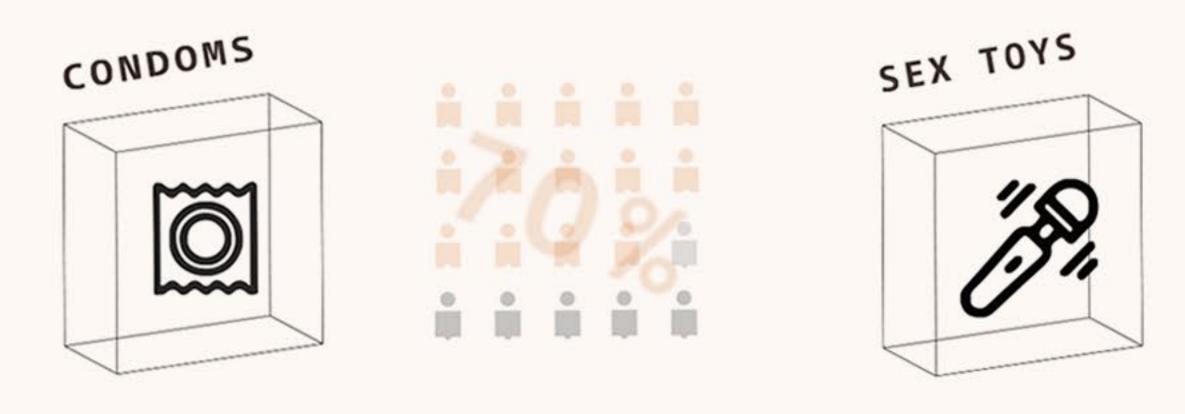

According to a report in Spectator Magazine in 2019, the global production value of pornography is approximately USproduct for the masses . In 2015 , a Marie claire magazine survey found that one-third of the viewers ofpornograpr\$ 90 billion per year (Hollywoods annual production value is USS10 billion) . Pornography has become a daily consumfilms were women , and half of the female users expressed dissatisfaction with the current quality of adult films .

The number of Pornhub female visits increasing every year.

02. PORN FOR HER

SEARCH TERMS OF CROWD PORTRAITS

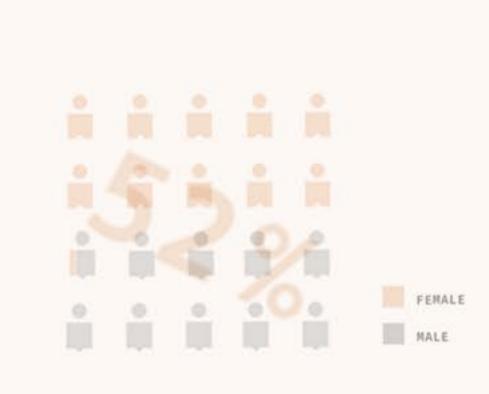

Today, we can not only see dedicated "Women's Choice" channels on mainstream porn sites such as Pornhub, YouPorn, and xHamster, but also X-Art from Europe and the United States and SILK LABO from Japan to produce "Female to AV" content as the core adult film company.

Epidermis

Dermis Sweat gland ubcutaneous

The proportion of women looking for "sex toys" on China's Internet is also higher than that of men, which has reversed the situation that the adult market is dominated by men. More and more women are beginning to control their bodies, understand their more diverse sexual orientation, what they like and their personal boundaries.

The skin is the body's largest organ and has several, diverse functions. As well as being a physical barrier, it has immune and sensory properties.Dermis Nerve endings in skin's middle layer help people to feel sensations such as itching, pain, pleasure and heat.

EXPERIMENT 01 - SONOGRAM EXTRACTION]

The voice in porn is also a powerful tool for identifying its style in addition to the picture. I extracted five parts of Feminist porn and traditional porn that emphasized insertion, and visualized the waveform of the sound in the porn with sound reading software.

02 - THE DISCUSS ABOUT FEMINIST PORN

03 - THE TOUCH OF YOUR IMPRESSIVE SEXUAL EXPERIENCE

Button TIME: After party

" Hahah, for me, the most impressive touch is a time when she wore a dress with many buttons. They are small and dense, so it took much time for me to get it off. "

Spring TIME: Autumn

" A spring shows a resilient and interlocked feeling of feedback. I use a spring to describe the feeling when I touch him. Compared with other men, his skin was unexpectedly smooth and it was the most marvelous memory in that summer."

21, ousei

A piece of candy paper TIME: rainy day

" White Rabbit rolls are my favourite and I have been loving them since I was a child. When I touch him, I feel like touching the candy paper of White Rabbit rolls as I know the sweet feeling after unfolding the package, which is the happiness full of my body. "

29, CAO

A balloon full of water TIME⁰My birthday

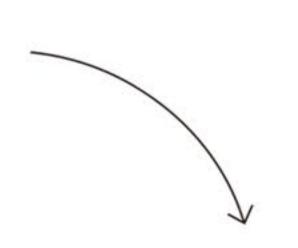

" I wonder if you once played a game of filling a balloon with water. At that time, the touch was like a balloon full of water. After my birthday party, we went to my home together. When I touched his skin, it was cool and soft. However, our relationship reminded me of the balloon full of water, which finally exploded, like our relationship. "

Human hands are very sensitive and can feel vibrations with an amplitude of only 0.00002 mm. The hand is one of the most distinctive organs on the human body. In my research, I found that many people's tactile experiences in sex are not related to their sexual organs. They generally get their own special experience through the touch of their hands. I surveyed 8 friends around me about their impressive sexual experiences, and used some materialized objects to describe the touch of their experiences. As a survey of the Feminist Film Festival, I hope that through these tactile correspondences, sex is not a primitive pleasure produced by simple genital friction, it is a comprehensive and unique experience of skin and love.

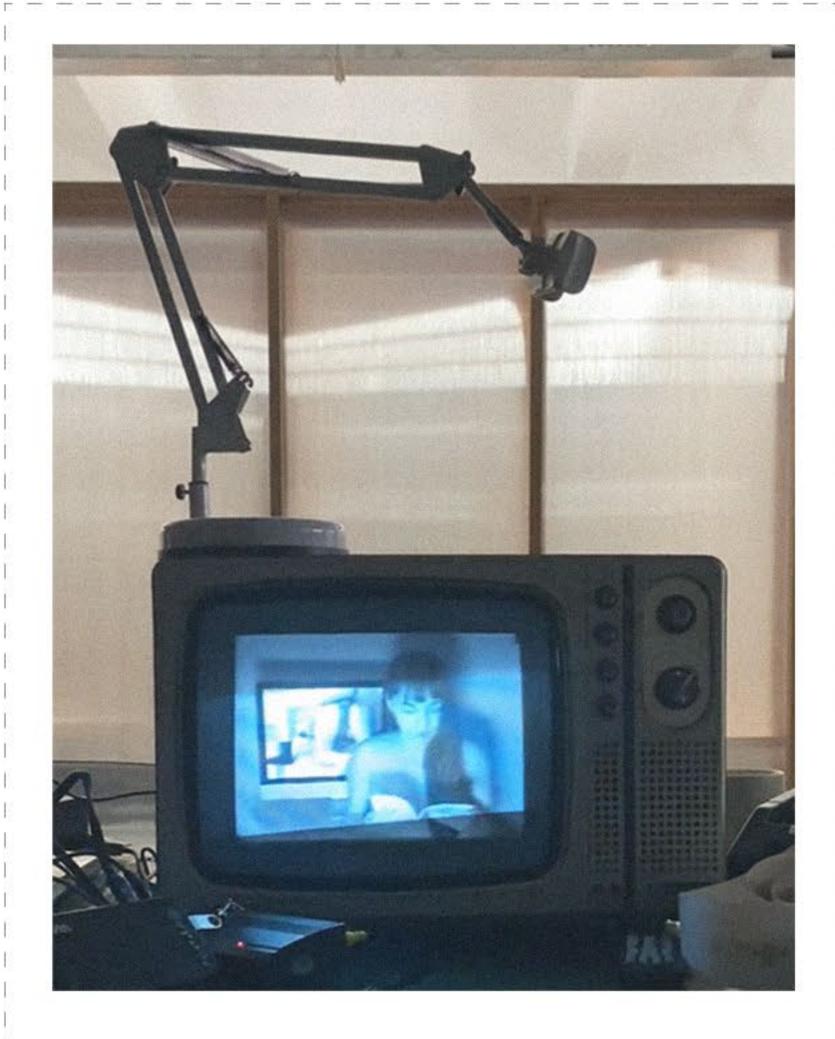

I read a Chinese poem called < 野草 > from 鲁迅, about hope, feeling and touch, trying to create conflict in a traditional plug-in porn to think.

When sound and abstract, soft description pictures stimulate the prefrontal cortex located in the front half of the brain, the strongly stimulated traditional pornographic films bring the response of the left striatum (putamen) of the brain to observe the emotional changes of the subjects.

Unfortunately, I uploaded the video to Vimeo and Youtube, and they deleted my video. For policy reasons, I replayed and recorded this video on TV.

23, LEE

Feather TIME[March,2019

I think my most impressive sexual experience corresponds to the touch of a feather. That was my first sexual experience. When I touched him, it was a little itchy and light.

26, KOKO

Electric wire TIME: Forgotten

" It may be strange as the touch that left me the deepest impression was like an electric shock, so it can correspond to a length of thin electric wire. When I was a child, I got an electric shock, which was extremely similar with the feeling he gave me that time. Funnily enough, I am now an engineer in the electron industry, which has perhaps been destined in the unseen world. "

10 00

19, XXX

Cotton TIME: Sunday

" I have little sexual experience as I always do it with my present boyfriend. Every time I am with him, I feel great and it is like touching the cotton when I touch him, soft and full.

30, ANNE

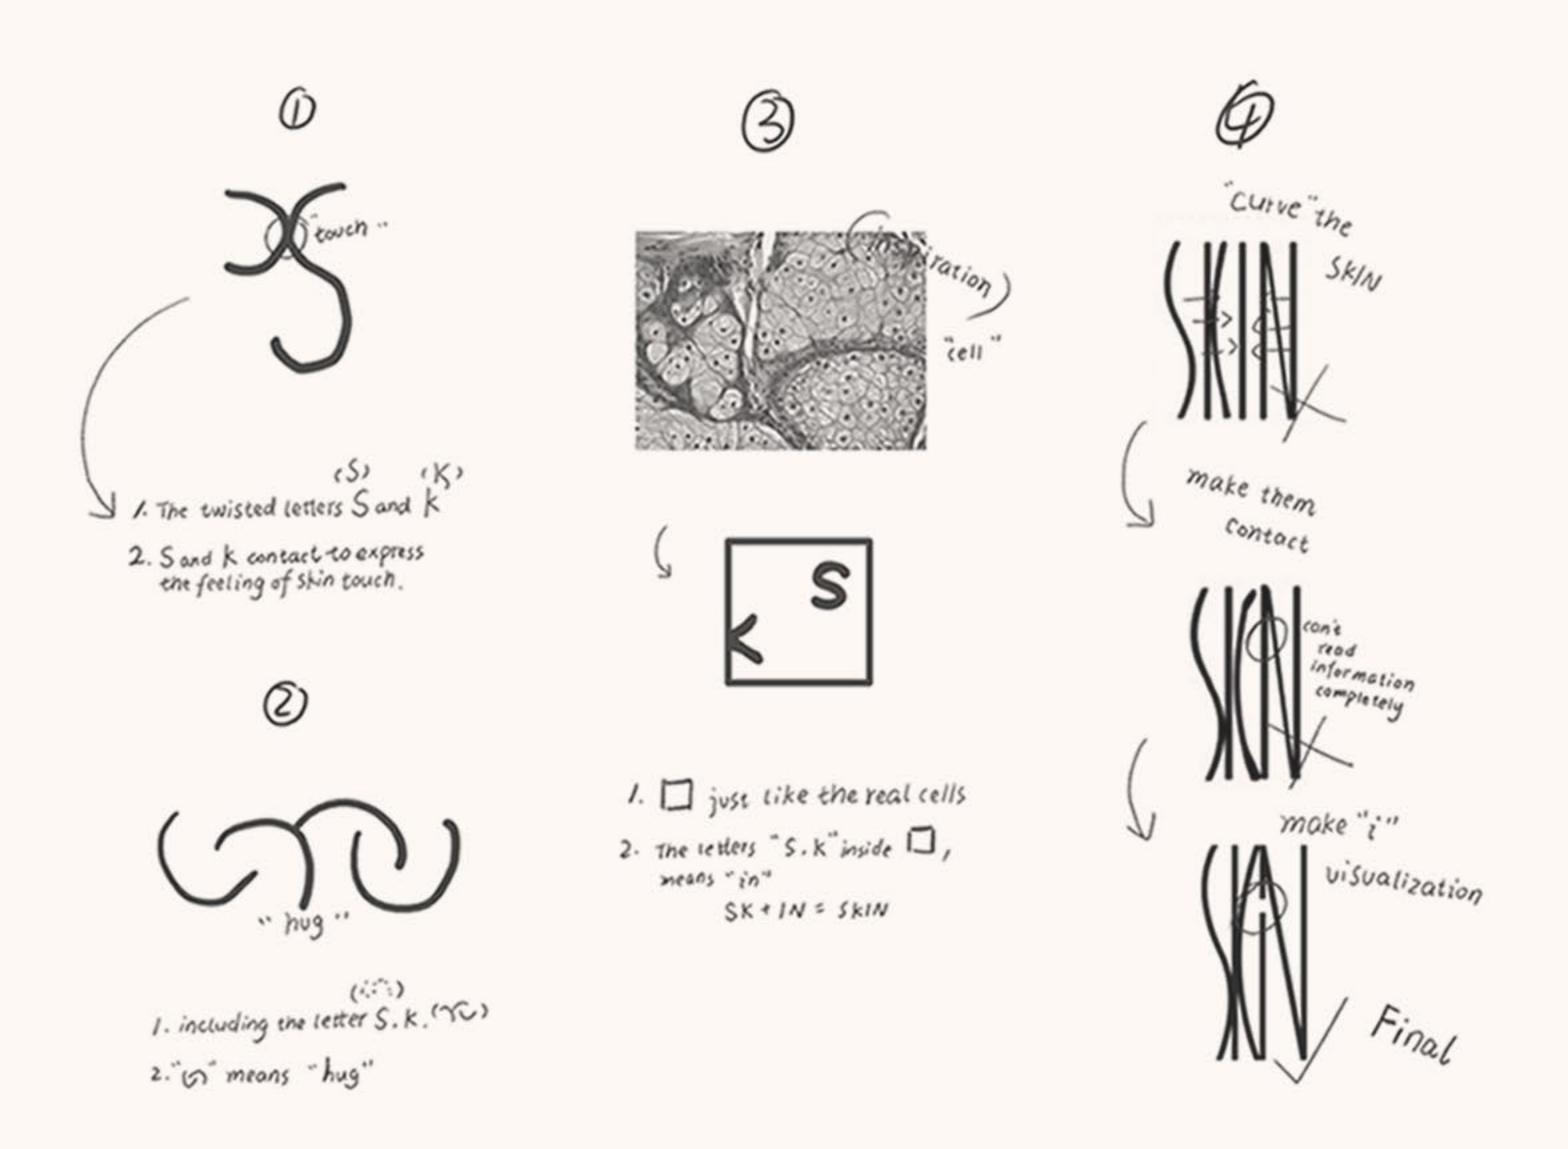

Strings TIME: Two years ago

" Since I was 27-year old, I have learned to play a stringed instrument abroad. She was my teacher but several years younger than me. Gradually, we fell in love with each other. At that time, when we were together, it was like she was touching my fingers in class and my hands were going through strings and her soft skin with marvelous tweedle.

In the summer of 2019, I went to the Pashupatinath Temple in Nepal (a temple where bodies are burned and funerals are held). I watched the whole process of the funeral. As an outsider, I had a huge shock in the face of death, the shock of death under faith - destruction and rebirth.

With the continuous development of science and technology, implanting chips into the human brain is no longer science fiction. Funerals may become a new ceremony for the transition between physical and virtual states. I can't help thinking about the attitude of human beings towards death. In terms of visualization, the behavior of burning corpses and candles is similar to the data transmission. In this project, I put these similarities and conflicts together to express my thinking on this eternal topic - our death. (27.710550589017824, 85.34871368390884)

FUNERAL - UPLOAD

[INSPIRATION]

AN EVENT - SPARK

In July 2019, I participated in a women's support volunteer project in Nepal. In Kathmandu, I visited the PASHUPATINATH TEMPLE in an afternoon. I watched the whole process of the funeral quietly, which gave me a great shock. I shot and recorded a lot of audiovisual materials, which became some of the foundations for me to do this project.

The Nepalese cremated the dead here, and the dead bodies were burned here twenty hours a day. In Nepal, open-air cremation is a religious ceremony, and all pedestrians and tourists passing by can watch and take photos. They held a funeral in the place closest to their gods, a sacred ritual - destruction and rebirth, from birth to death. I can't help thinking about some eternal topics: about death, about faith, about funerals.

01. POSSIBILITY OF CONSCIOUSNESS UPLOAD

1) Philosophical direction

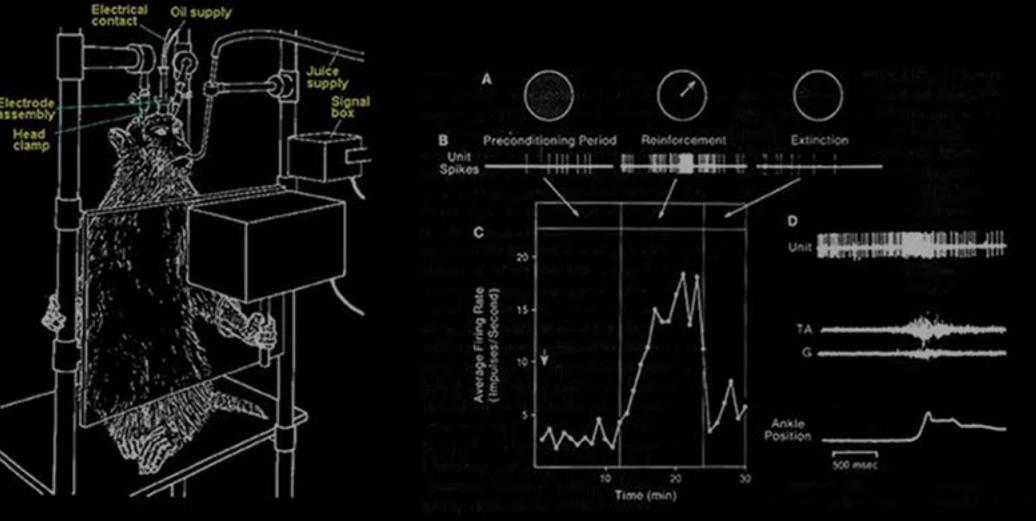

© The Brain Bank North West

Panpsychism is an ancient view. Physical science describes the "outside" of matter from the perspective of behavior, and consciousness describes the "inner" of matter. This means that thought is matter, which means that even matter as small as electrons may have some consciousness. We can use scientific theories to explain matter, but consciousness is not matter.

Therefore, philosopher Bertrand Russell and scientist Arthur Eddington proposed PANPSYCHISM, which means that consciousness may also be a kind of matter.

2) Technical direction

Operant conditioning of a single neuron

The latest brain-computer interface technology (Neuralink) uses a probe device called a sewing machine to implant circuits and chips that are only 1/4 of the human hair. Reality has proven that implanting knowledge chips into the human brain is no longer science fiction.

02. RESEARCH ON FUNERALS

Three important moments in life

Birth

Married

Death

Three main methods of burial

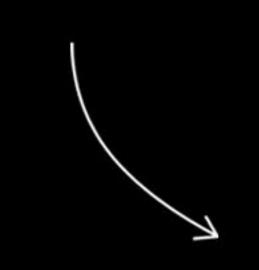

Cremation

Land burial

Natural burial

Indian religions, such as Hinduism and Buddhism, advocate cremation. Because of its doctrine, the body is regarded as a tool for the soul and gods to cling to.

"Bhagavad Gita" mentioned: " It's like taking off old clothes and putting on new ones; after death the soul leaves the body and then gets a new one ". Therefore, the dead body is not sacred, because the sacred soul has left the body. So cremation is ethical in the above religions.

The most important moments in life are - birth, marriage and death.

The history of funerals is as old as human civilization. From an anthropological point of view, funerals allow the living to greet the dead in a non-destructive way, and rebalance the social relations disrupted by the death of people. It can maintain social cohesion and prevent social collapse.

Different nationalities and different religions in the world have different funeral forms.

EXPERIMENT 01 - VISUAL EXPERIMENT OF CONSCIOUSNESS UPLOAD

ELEMENTS EXTRACTION

RECEIPT MACHINE SIMULATION EXPERIMENT

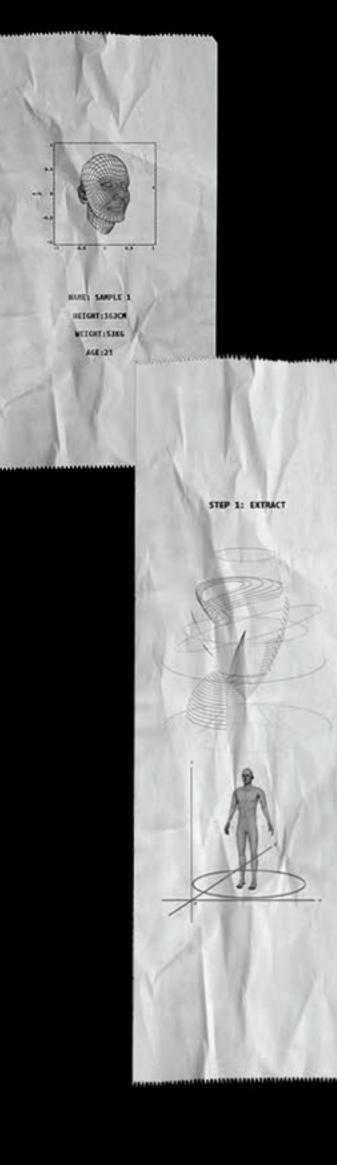

The second theorem of thermodynamics puts forward the principle of entropy increase. Some scientists believe that the direction of time is the direction of entropy increase. Einstein unified time and space, thinking that they are not separate physical quantities, and proposed a four-dimensional space-time world view.

I extracted the basic shape of the light cone. Then, I used the 3D function to revolve the three basic graphics. The formed graphics are reconstructed and combined to form new graphics, which are used to simulate the uploading process of consciousness.

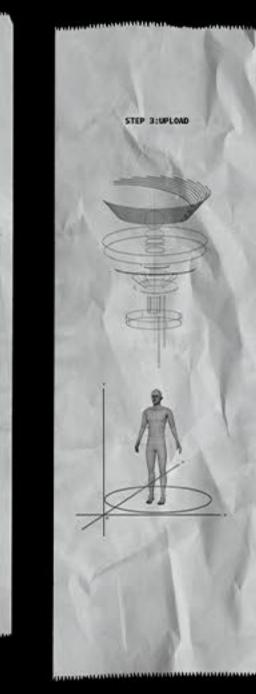

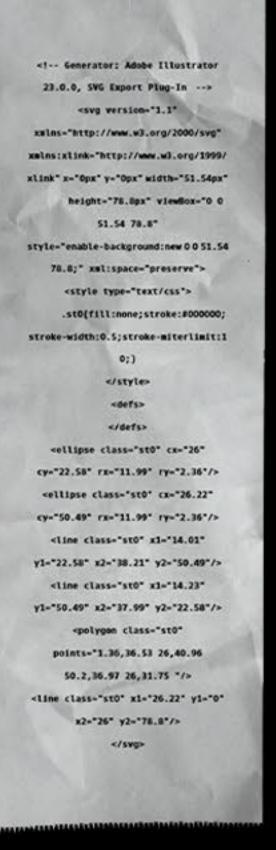

X-ray is actually an electromagnetic wave with extremely high frequency, very short wavelength and great energy. The frequency is generally higher than 30phz, the wavelength is shorter than 10nm and the energy is greater than 124ev. X-rays are penetrating, but there are differences in density and thickness between human tissues. When X-rays pass through different human tissues, they are absorbed to different degrees. Different images can be obtained after imaging processing.

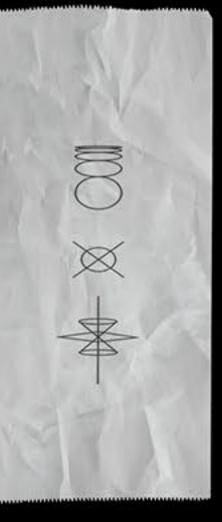

I use X-ray film as the medium to visualize the process of uploading consciousness. When a concrete and existing medical object is used as an expression, it can stimulate the viewer more. Through this experiment, I try some unconventional media to express my views.

A TV to broadcast the entire process of traditional Hindu cremation recorded in the PASHUPATINATH temple, and used the device to simulate the process of consciousness uploading, synchronize the process of (funeral burning) and (consciousness upload). This device represents my discussion on the topic - death & funeral.

Speculatively, I disscused the possibility of awareness upload-funeral expression in multiple media, trying to envoke device portfolio-video clip visually.

receipt upload process

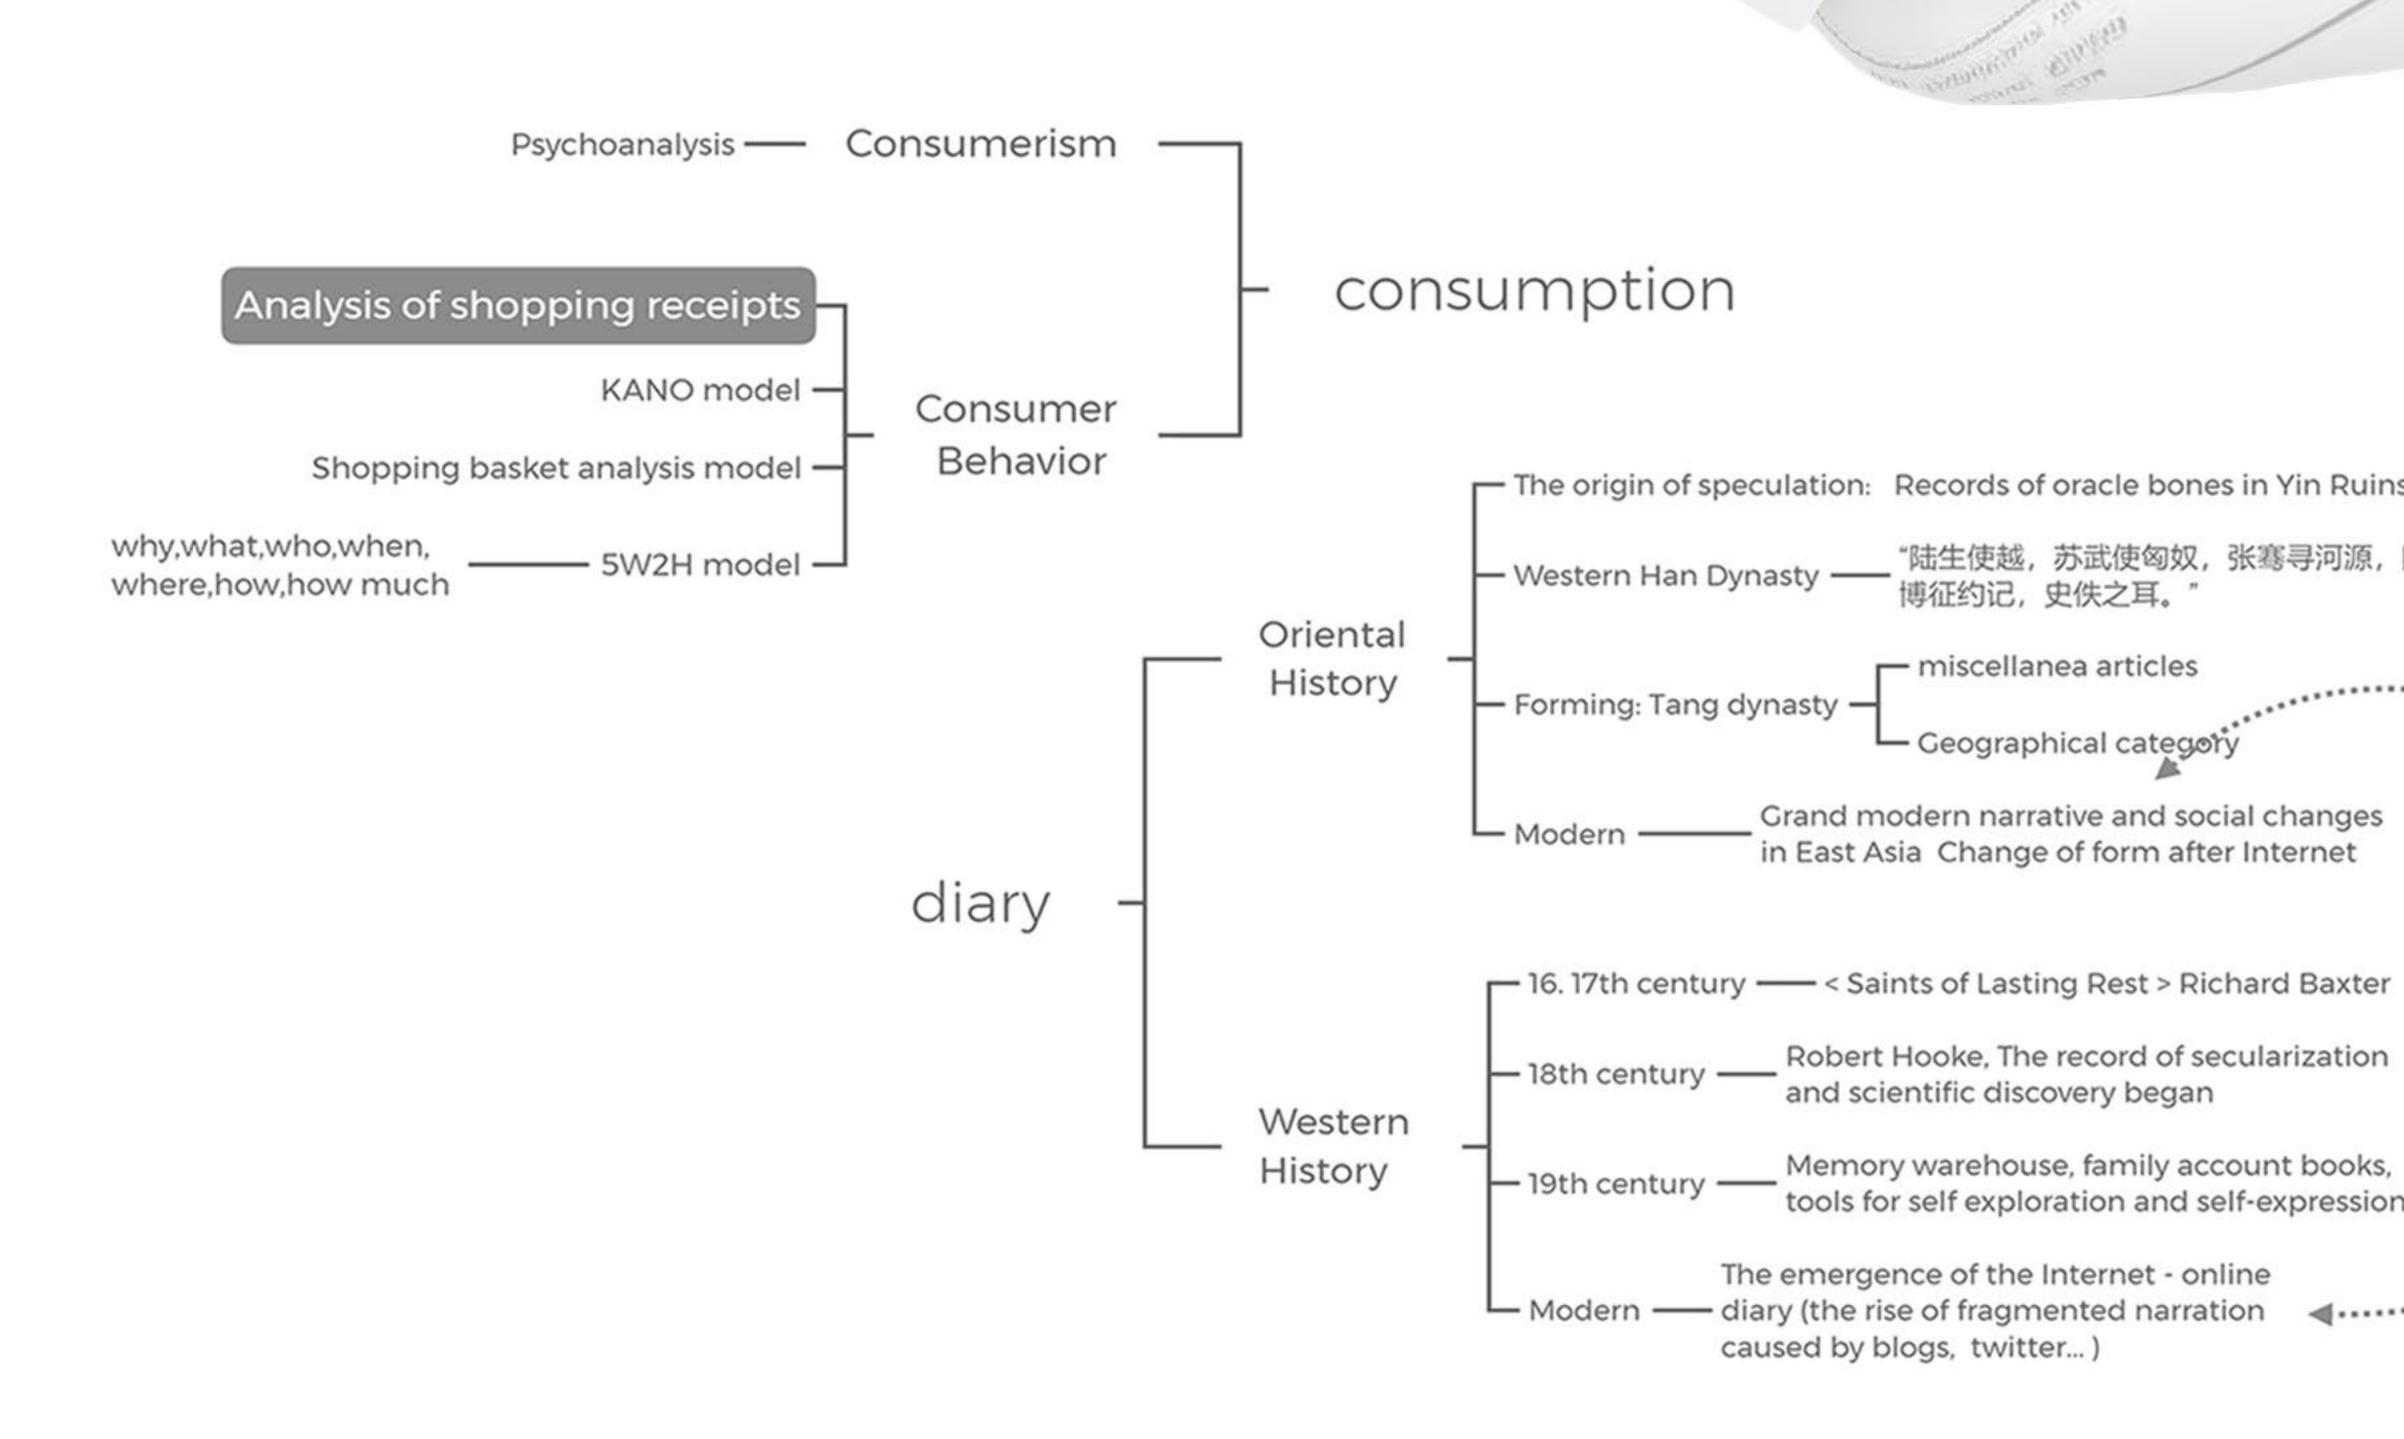

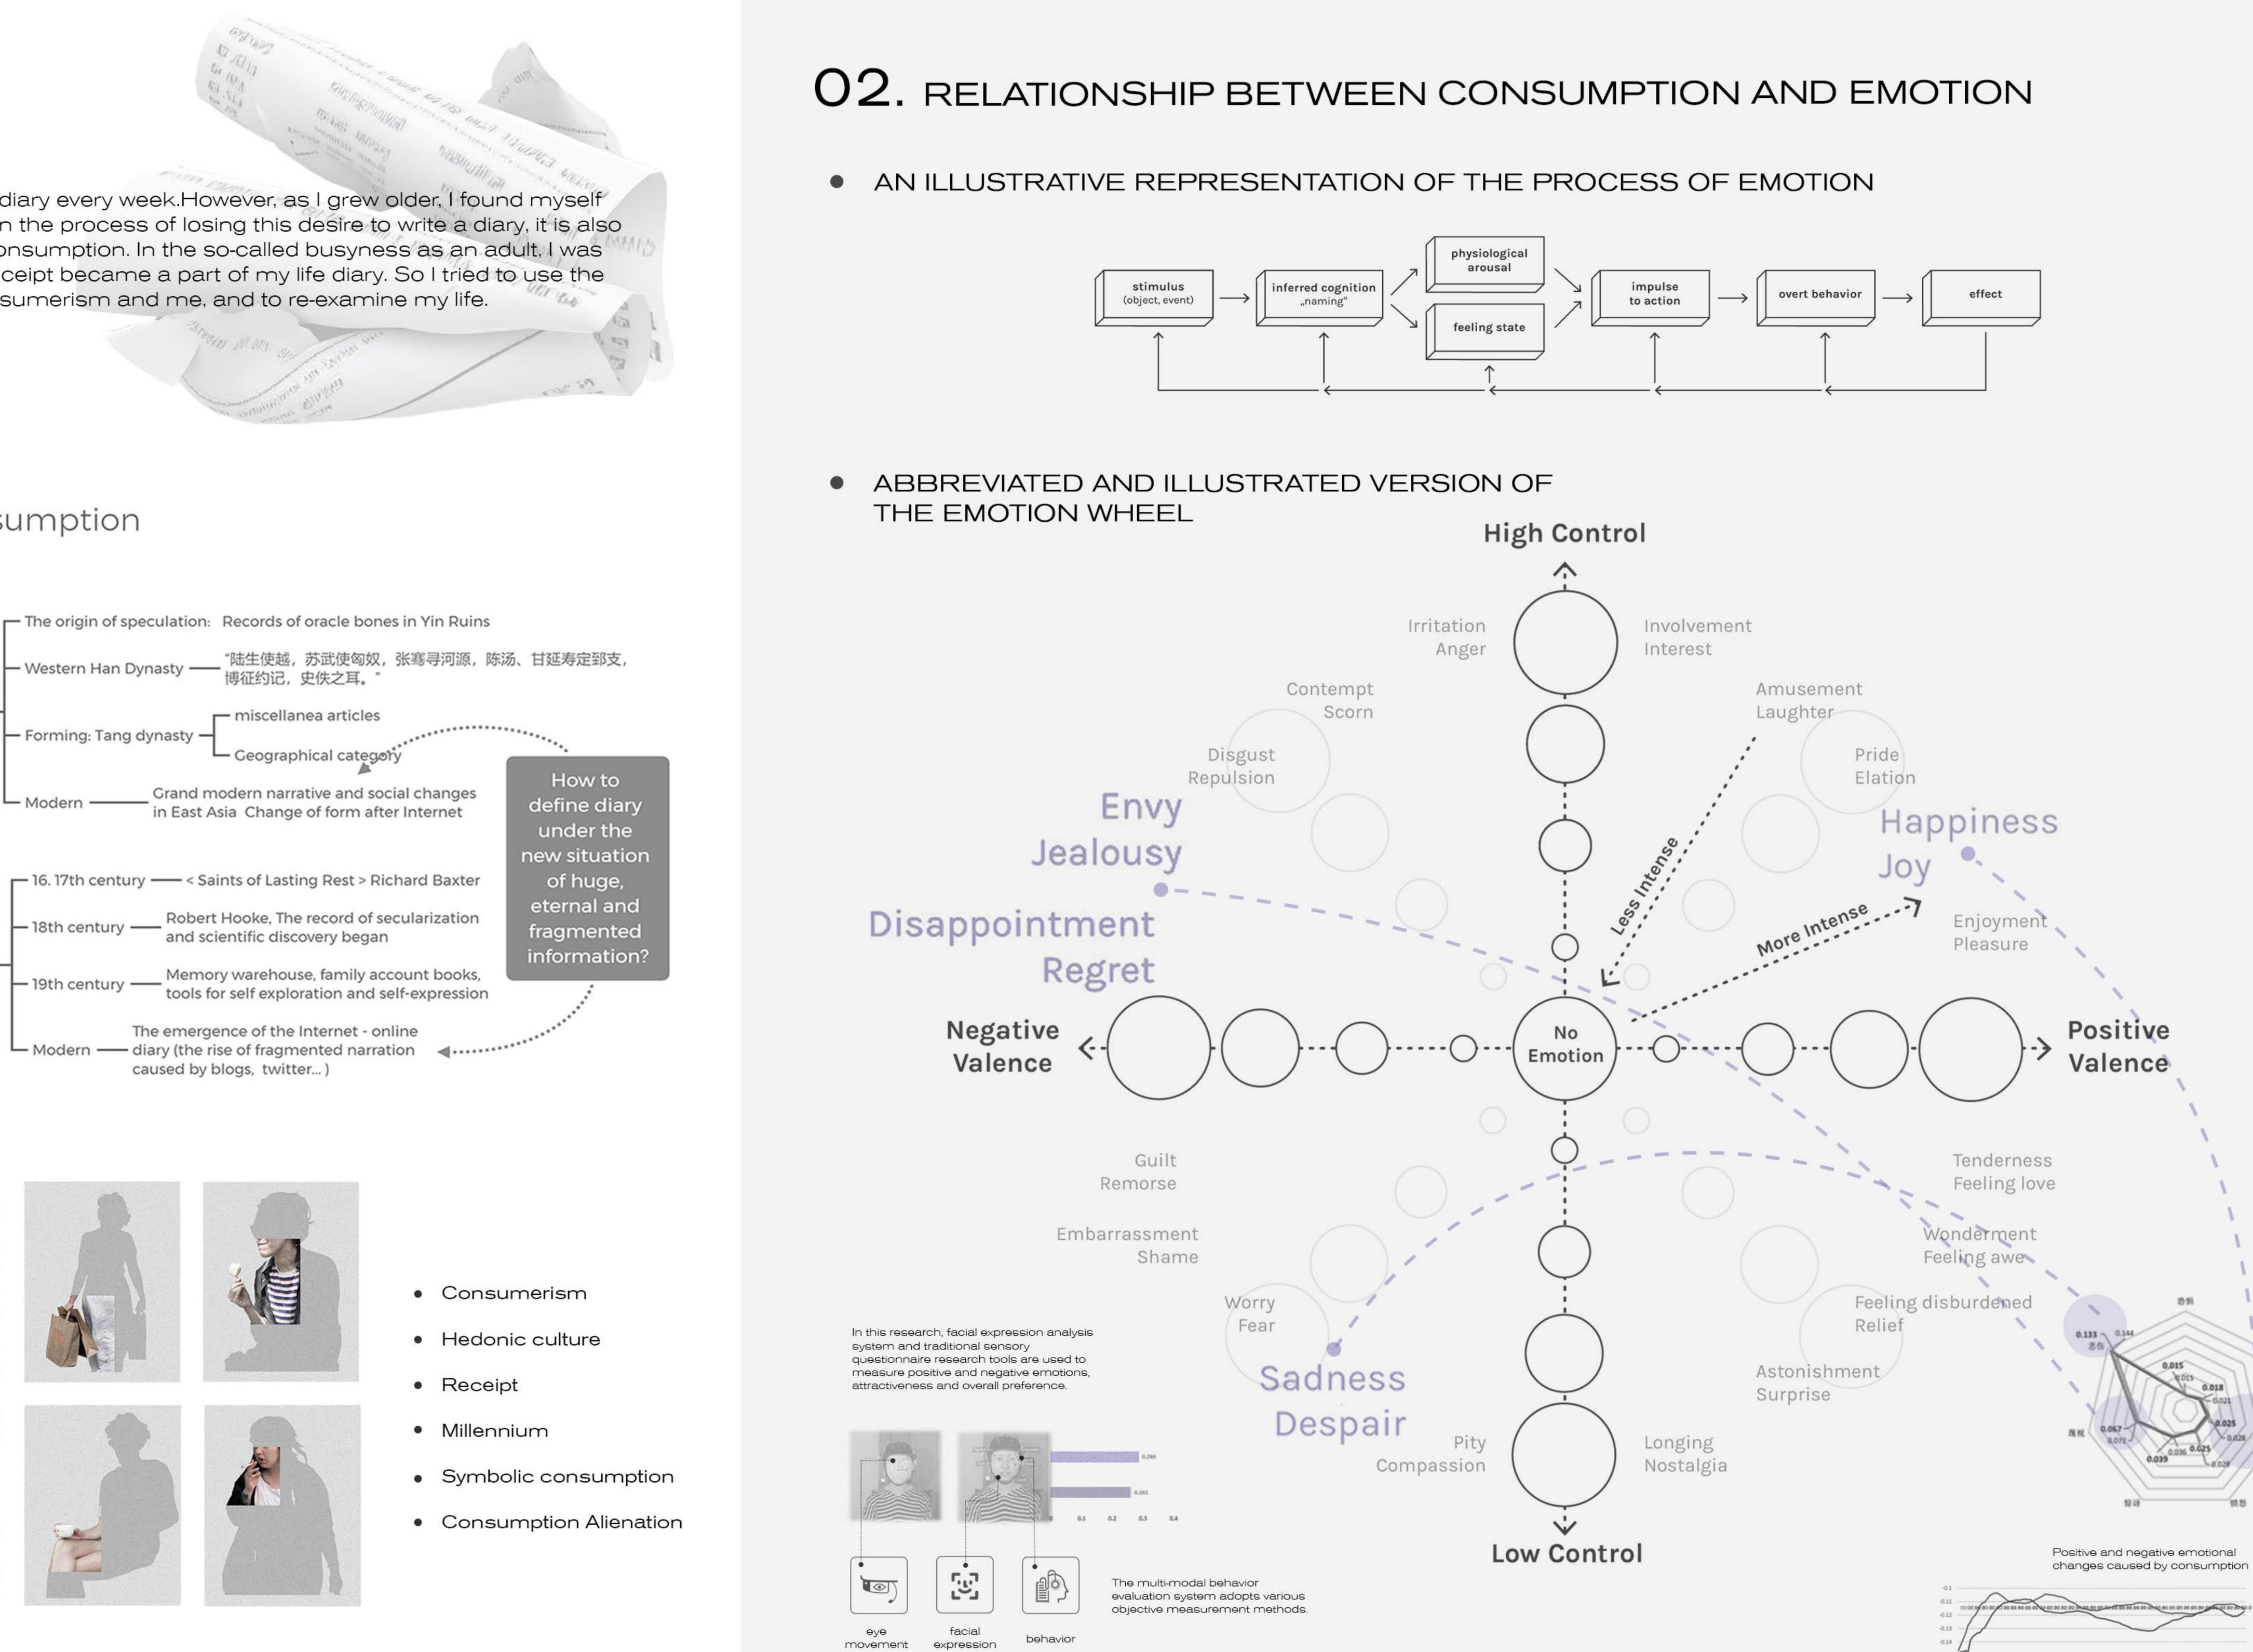

A few years ago, I had the habit of keeping a diary, but as I got older, I had more things to do and gradually abandoned this habit. In the process of abandonment, I became an adult, made some money by myself, and had greater control over my expenses, but I also found that this is also the process of my continuous participation in social consumption behavior. Consumption has become an important part of our daily life, and our emotions and thoughts flow with this behavior. I try to extend the track of consumption behavior in various ways, and visualize consumption behavior in various ways as a new diary to record my life. The diary itself is more readable and ornamental to express part of the meaning of the receipt. Through the new material diary, the consumer behavior and the emotions we trigger are also more reflective.

RESEARCH 01. INSPIRATION

When I was in junior high school, I had the habit of keeping a diary every week. However, as I grew older, I found myself gradually losing the energy to record my dailylife experience. In the process of losing this desire to write a diary, it is also a processin which I gradually grasp the dominant power of consumption. In the so-called busyness as an adult, I was controlled by a consumerist society. I found that in dailylife, receipt became a part of my life diary. So I tried to use the receipts of my weeks life to find the relationship between consumerism and me, and to re-examine my life.

behavior

O3. DIARY HISTORY

WESTERN

18th

It not only recorded religious activities out also reflected the advent of the modern period, but also described more national events, natural phenomenon exploration and scientific discoveries.

Robert Hooke, a British scientist and inventor, mixes fragments of daily events with evidence from the material world derived from experience.

19-20th

The 19th century witnessed the rapid improvement of people's cultural level. Happy reading developed among women, especially when they became enthusiastic readers of romantic stories.

Elizabeth pepy's diary is a typical example of personal documents between the public and private spheres. Her diary is not only a carrier for her to control her personal emotions, but also a comfort when she is lonely.

NOW

A new form of Diary online diary has quickly attracted our attention. These are "blogs" or "online magazines", which soon replaced the traditional handwritten diary.

FEXPERIMENT 01 - TATTOO STICKERS J

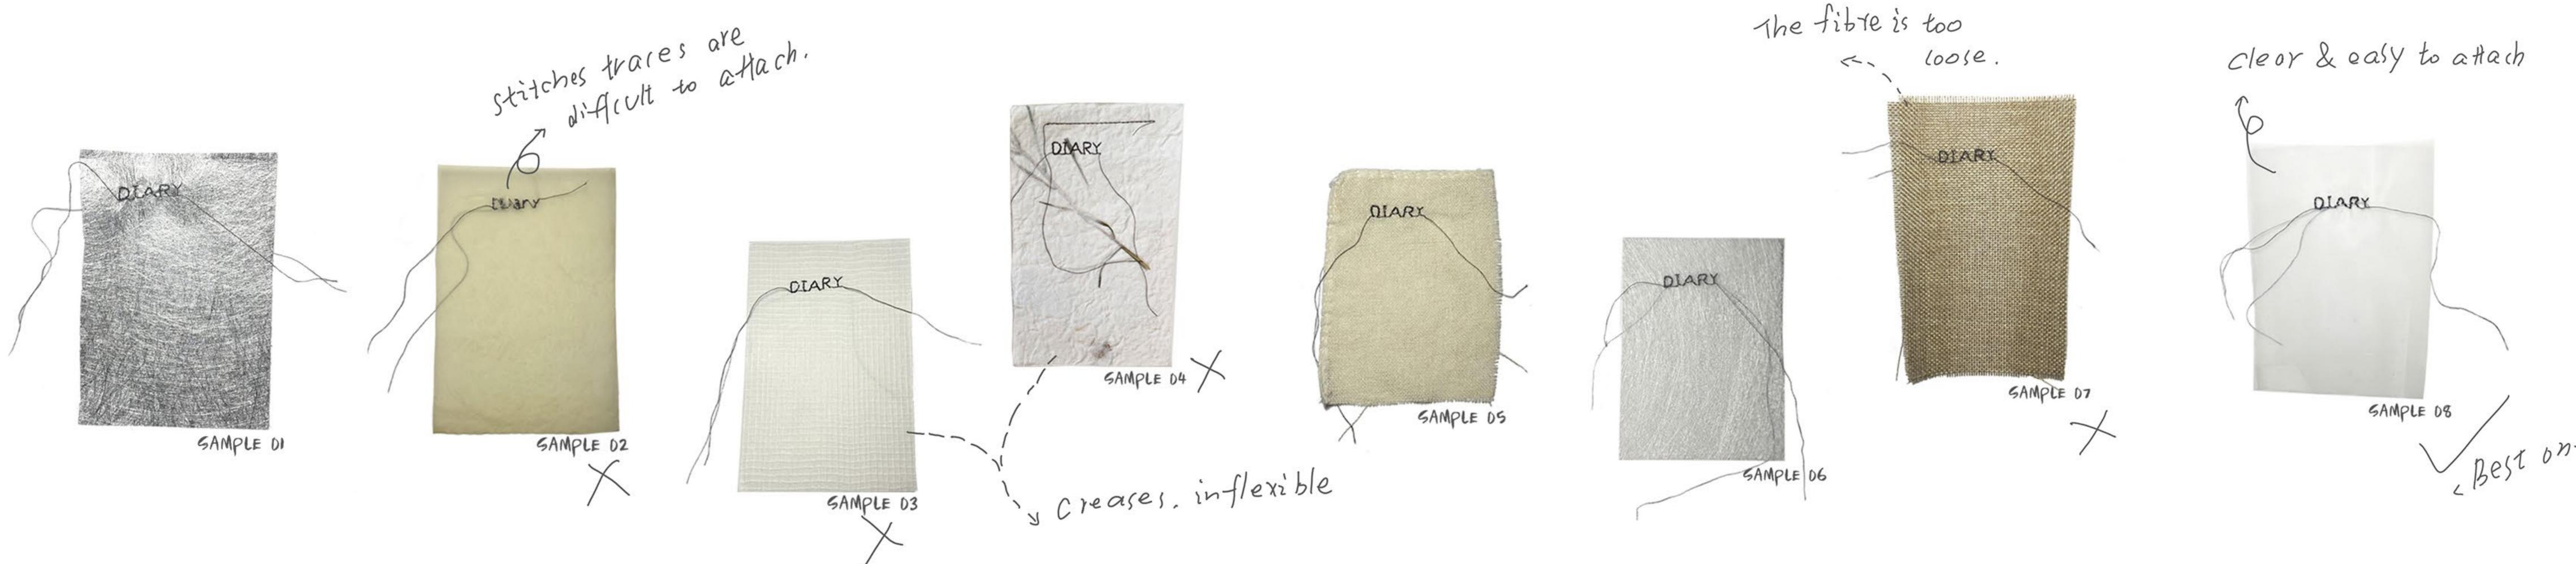

The skin is an important channel for us to perceive the outside world. In the world of consumerism, consumption itself and its trace-receipts, have become channels of our perception just like skin. I tried to transfer this information to the surface of my body by tattooing, visualize those abstract concepts.

EXPERIMENT 02 - DAIRY ZINE SEWING

In order to extend the track of our daily consumption behavior in the form of diary, I tried to collect it in a new form of diary by means of cloth and sewing. Through this new material diary, consumer behavior and the emotions we trigger are also more reflective. For the cloth, I first chose some materials close to the traditional diary paper - mainly beige and white. However, for sewing machines, some materials are too fragile or too loose to attach the traces of thread, so that the shape and legibility of words are poor. Therefore, I choose the best material as the base material of the follow-up diary through three measurement standards: flexibility, folding resistance and tightness.

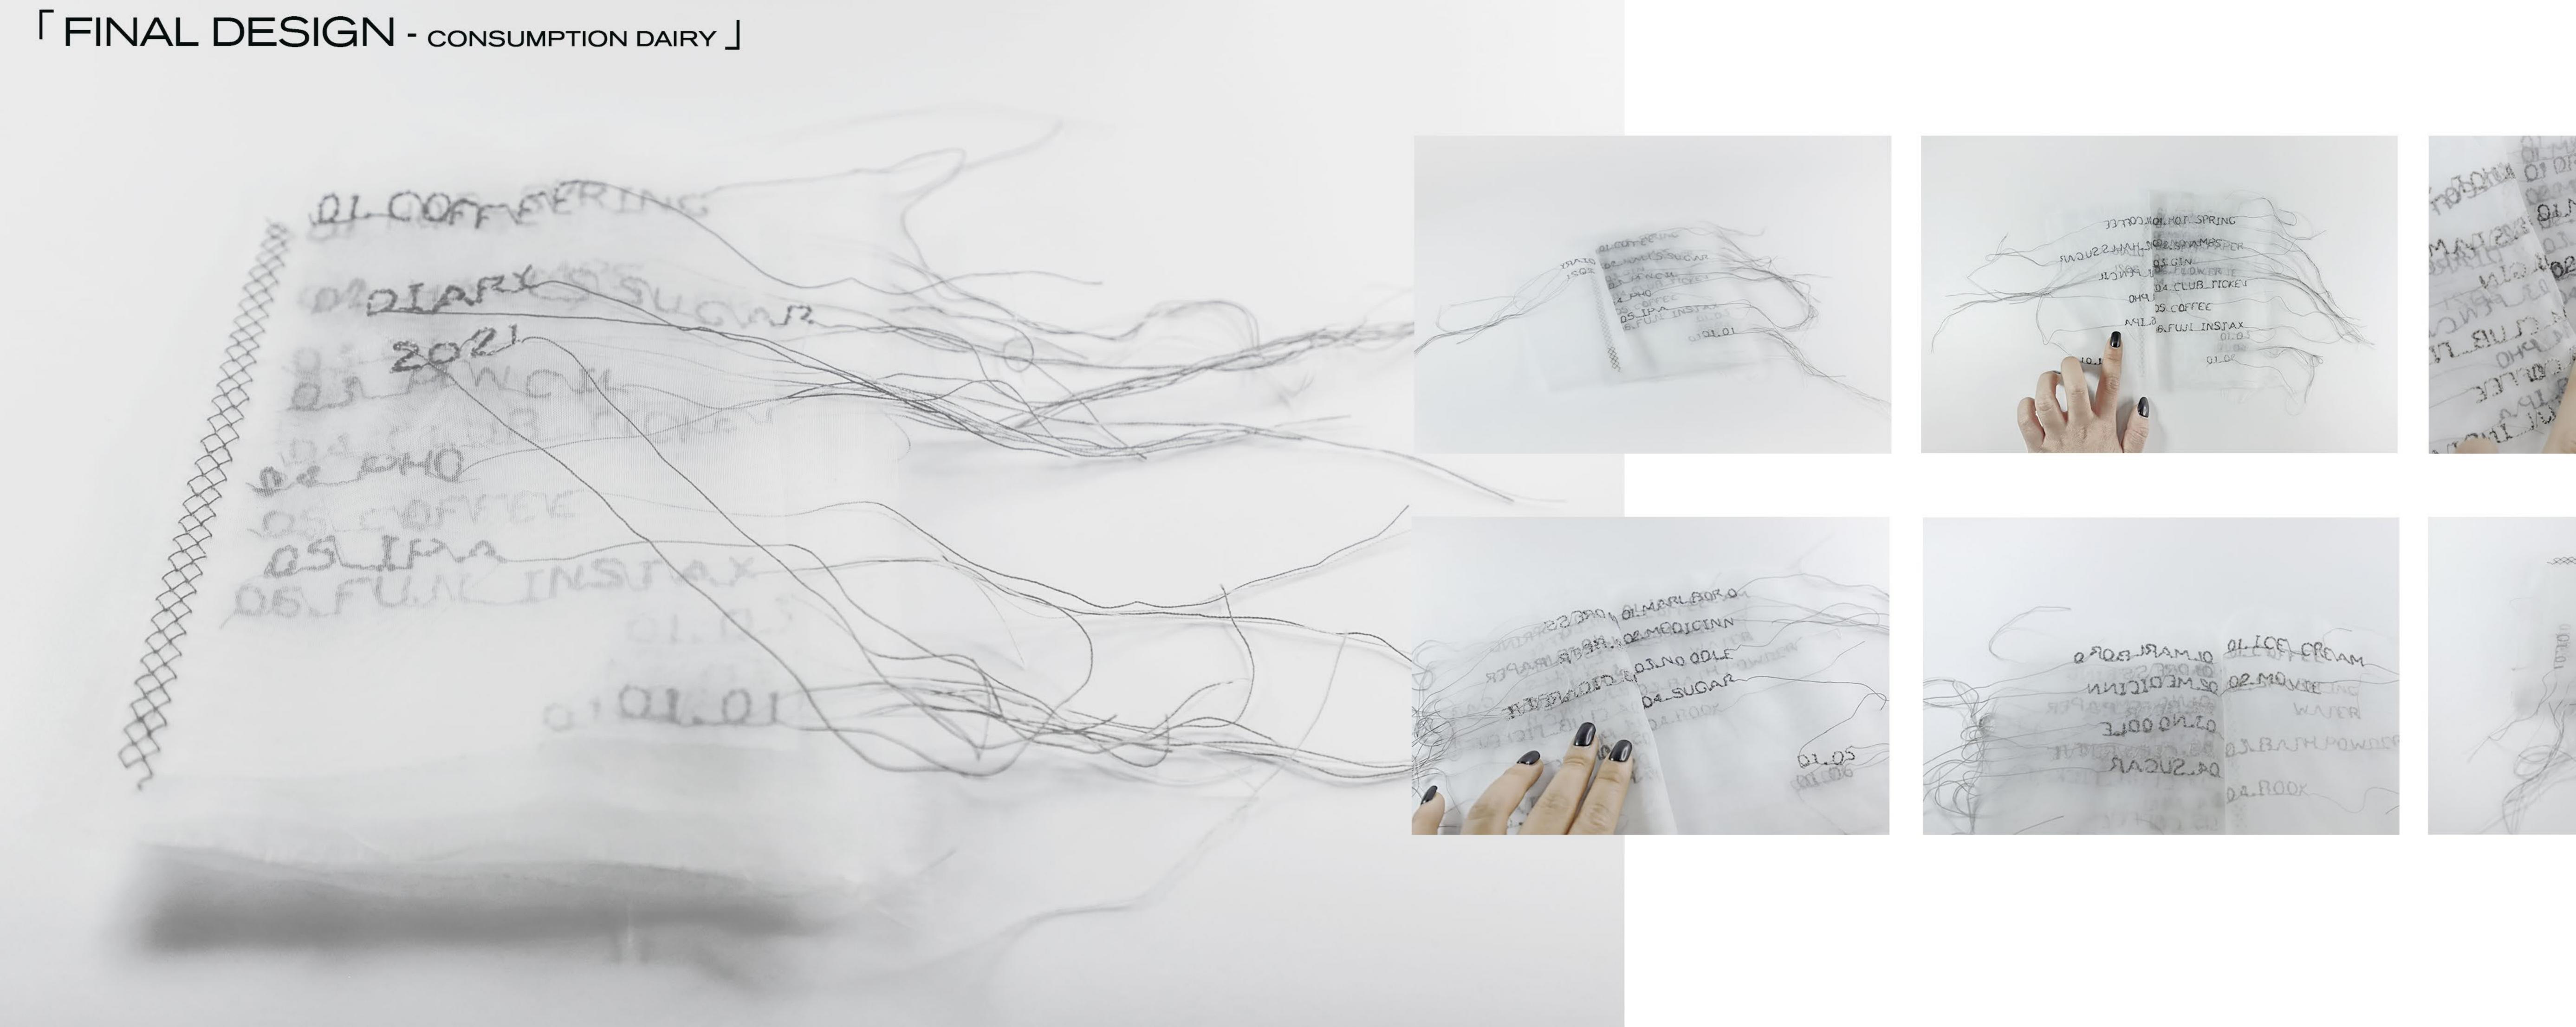

Folding Resistance Tightness - stitch accommodation

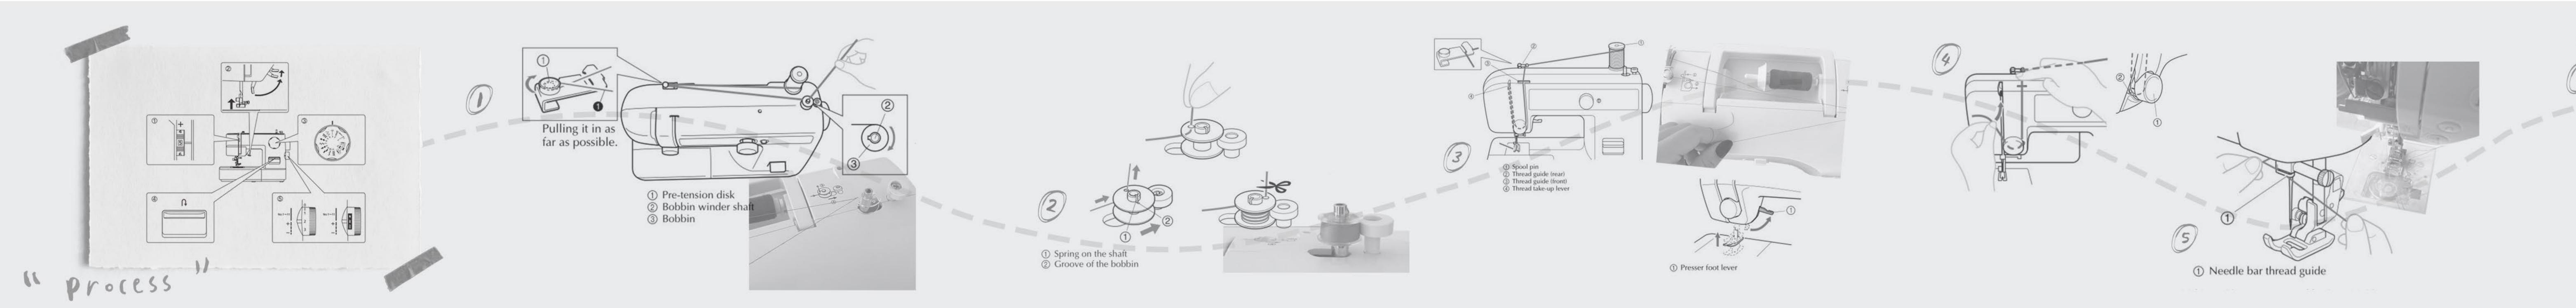

Consumption diary Collage

Turn the fabric using the needle as a pivot.

BACKGROUND

With the rapid development of urbanization, I often feel that the living atmosphere in the city is gradually decreasing. The following urban core of "high tech, low life"makes the regional differences between cities more and more blurred, and the memory and characteristics of different cities are becoming more and more similar. It is particularly serious in China, due to the rapid urban planning and infrastructure, there are many mismatched problems. With the increasing development of urbanization, how should we get along with it? How can we create different beauties memory like our parents under such a same landscape in the future?

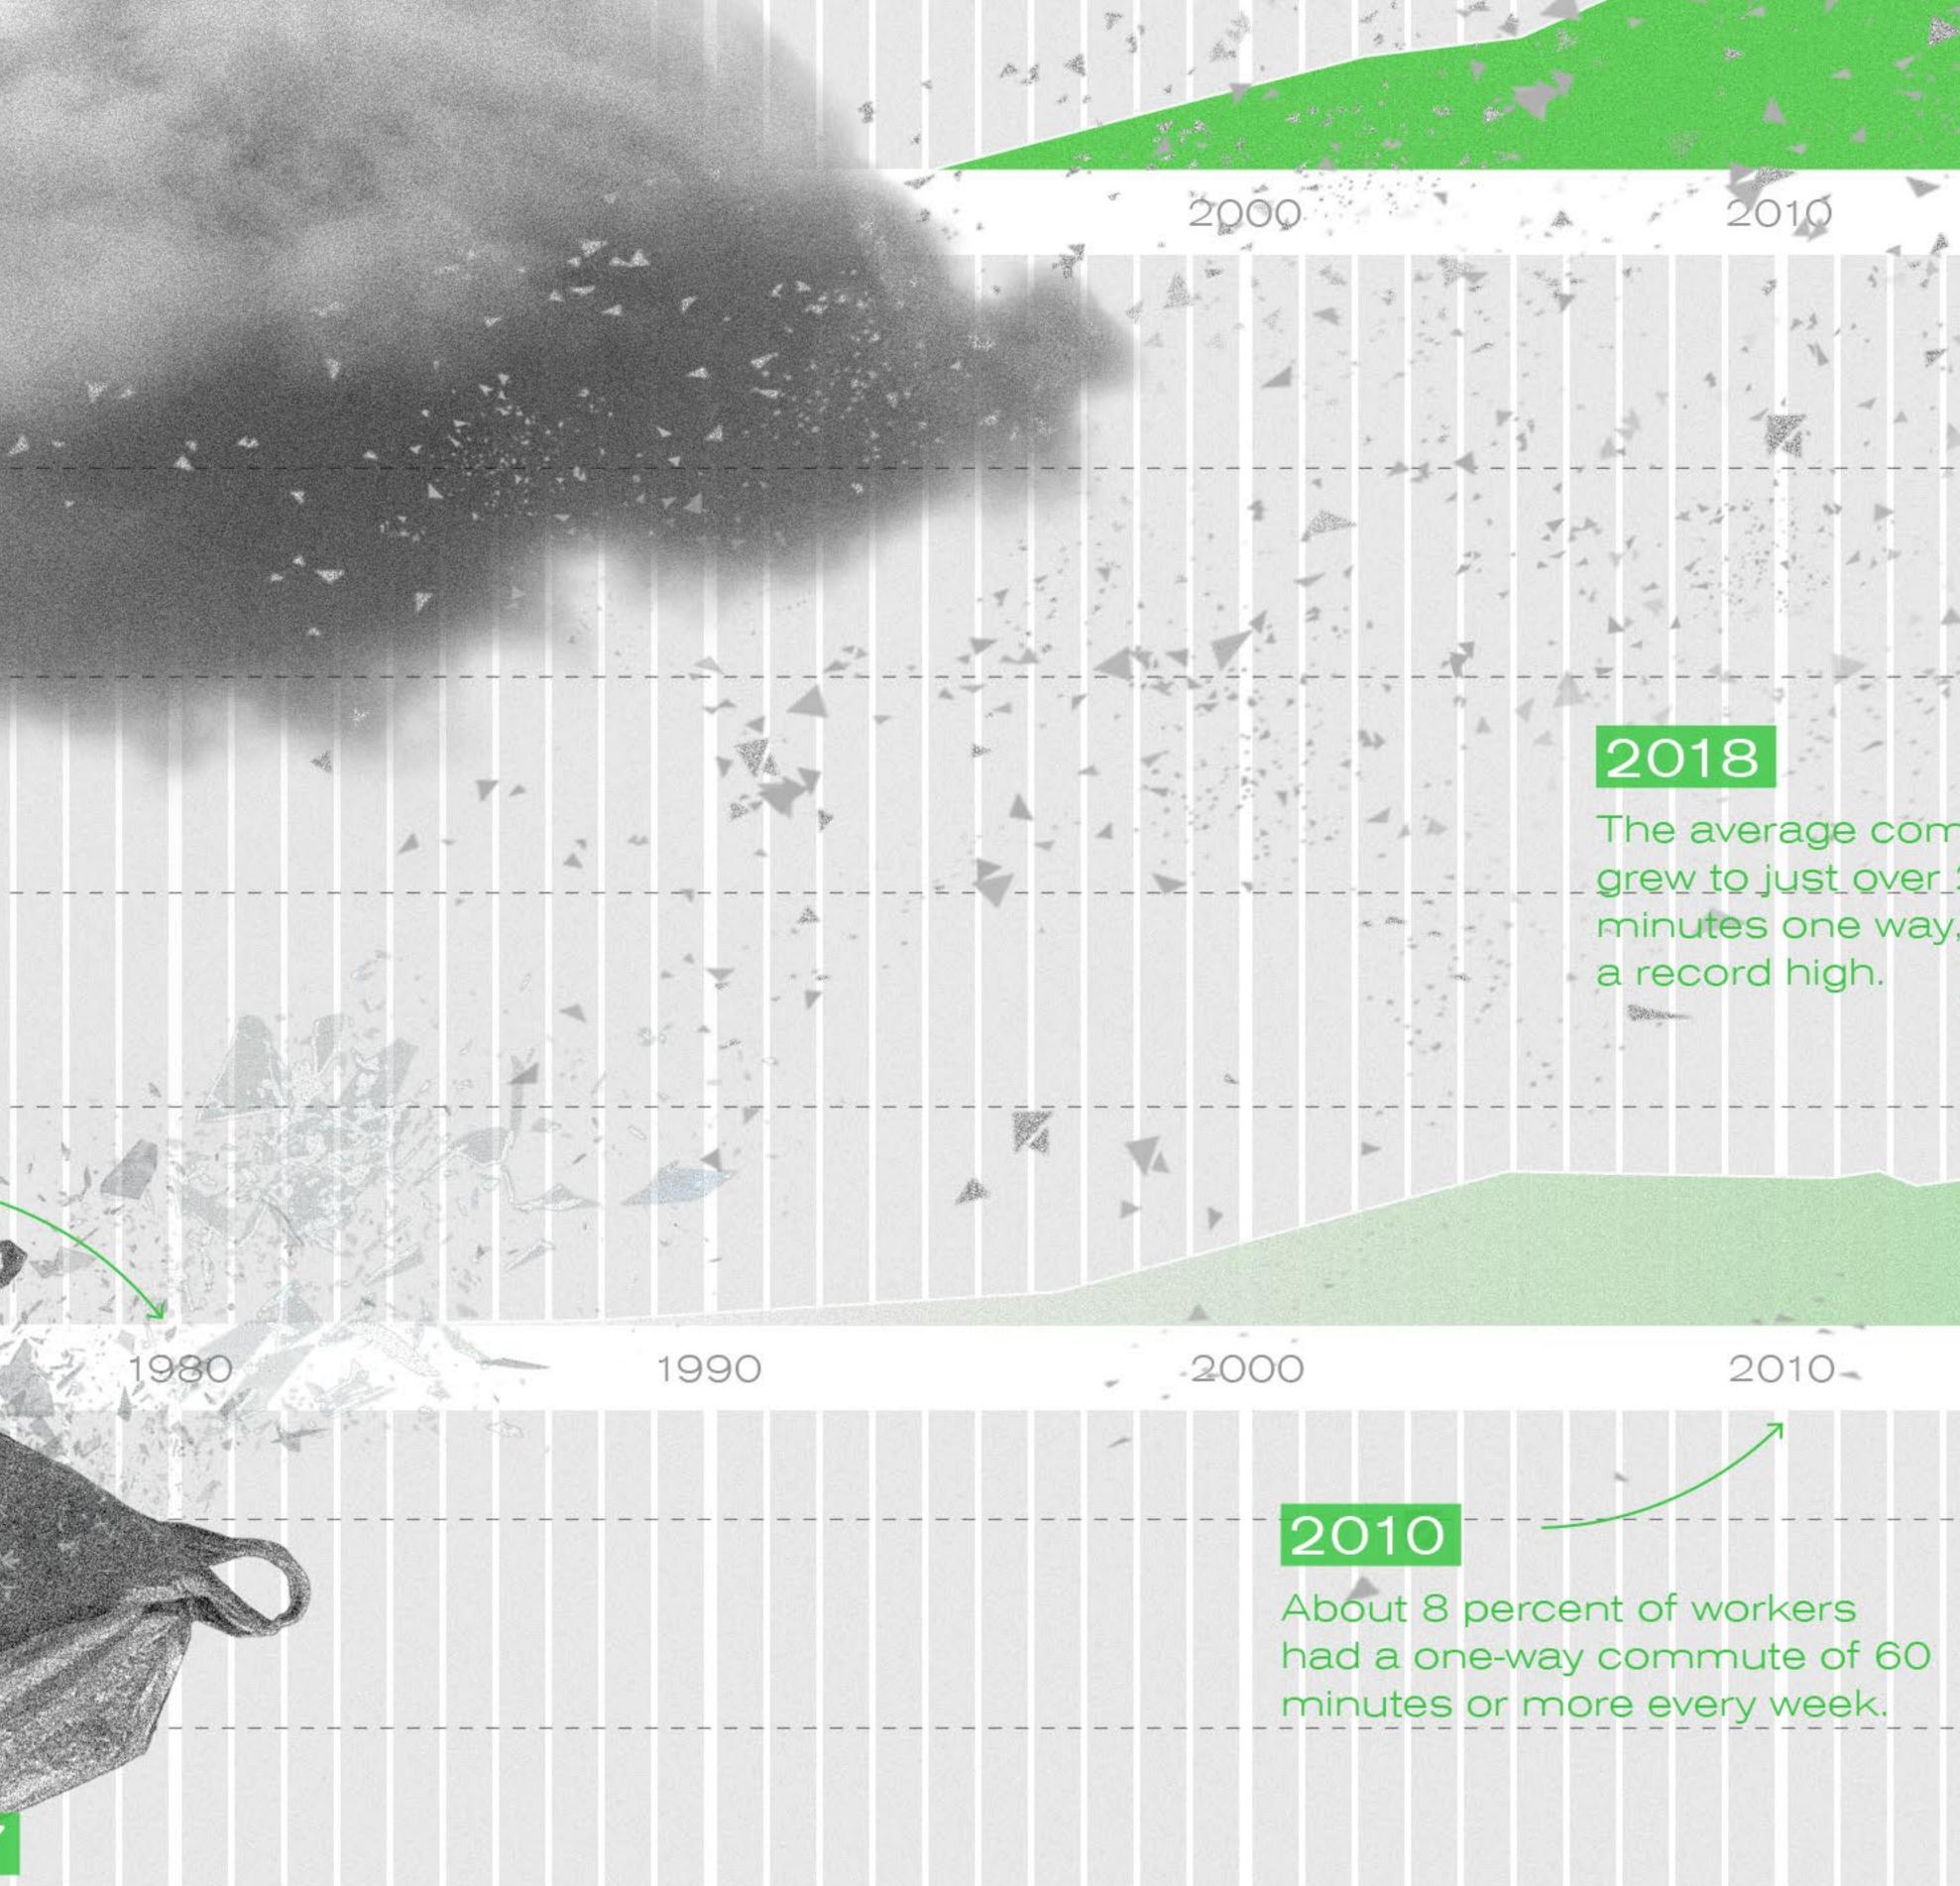

A DILLION METRIC IONS

With the rapid urbanization, population growth and economic development, the amount of garbage in the world is increasing. Urban population and per capita waste production are the core elements of domestic waste production. The former is related to the -total-population-growth and urbanization level, _-----while the latter is related to economic development level, consumption standard, lifestyle and other factors.

k on commuting, equivalent

full-time work week in a y

In recent decades – this has shifted dramatically. There has been a mass migration of populations from rural to urban areas. In 2017, 4.1 billion people were living in urban areas. This means over half of the world (55%) live in urban settings. The UN estimates this milestone event – when the number of people in urban areas overtook the number in rural settings – occurred in 2007.

URBAN

FPROJECT 01 - URBANALENATION

the advantages of Urbanizati

An analysis of the contradictory relationship between different subjects in Urbanization

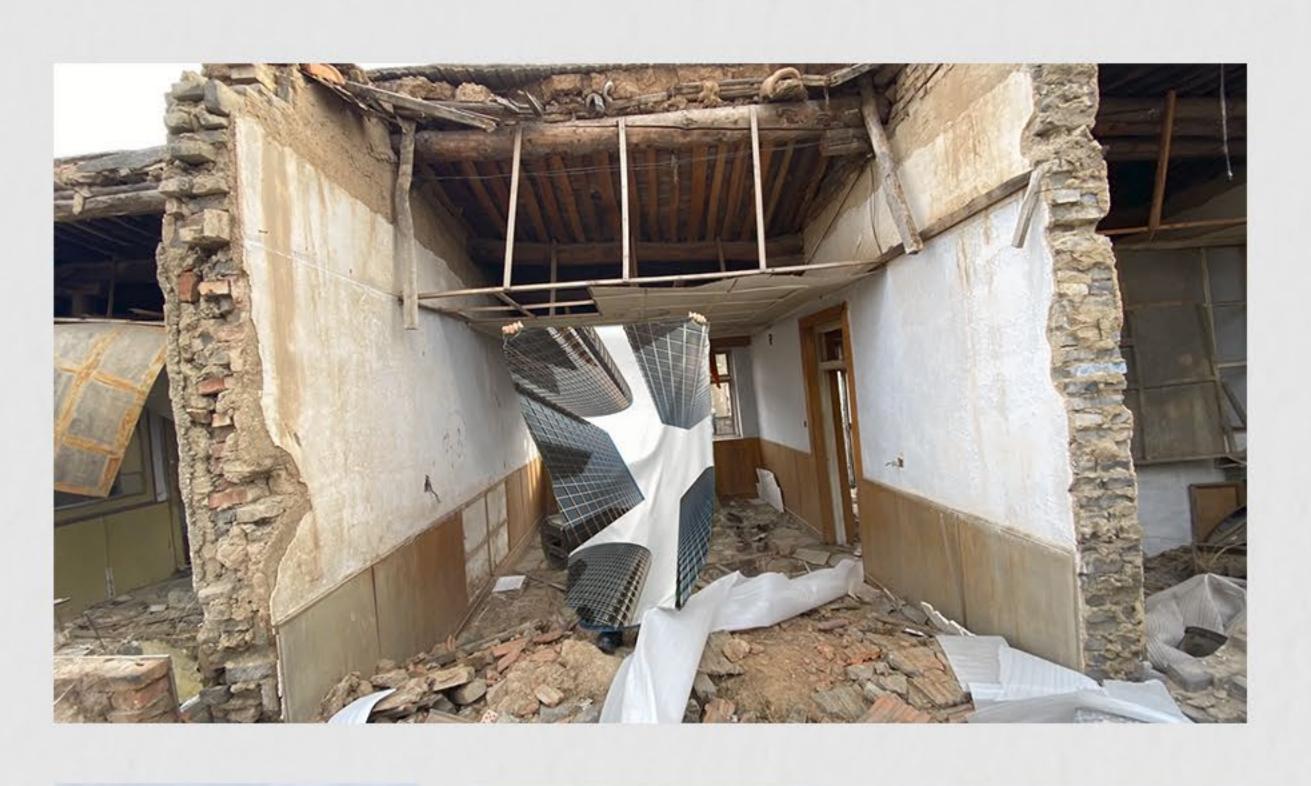

people's emotion and imagination in the way of nostalgia and memory.

In China, blind urbanization has led to a series of problems. The Aborigines were forced to leave the houses where they had lived for a long time and were replaced by the beautiful sight of high-rise buildings. However, due to various reasons, the construction of these demolition areas has not been completed, and even some old houses have not been completely demolished.

Therefore, I use a piece of green cloth to photograph these demolition areas through editing and binary expression. There is a huge contrast between the reality of urbanization and the beautiful concept. Can generic cities still carry characteristic memories? Is the city we live in fake?

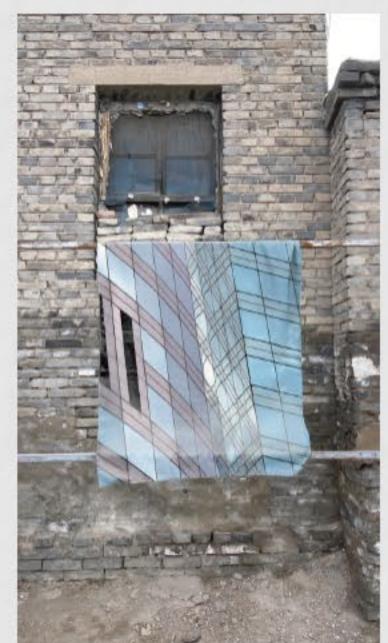

FPROJECT 02 - MALPOSITION MEMORY

I edited and made a series of fake Moscow postcards based on the photos taken during my previous trip. The actual shooting locations of these photos were in the Netherlands, Germany, Belgium and other countries. I made these postcards and gave them to my friends. They really thought I took these photos from Moscow. I deliberately present the illusion of Moscow to discuss the convergence of urbanization in the context of technology and globalization and the dislocation of people's memory brought by different cities.

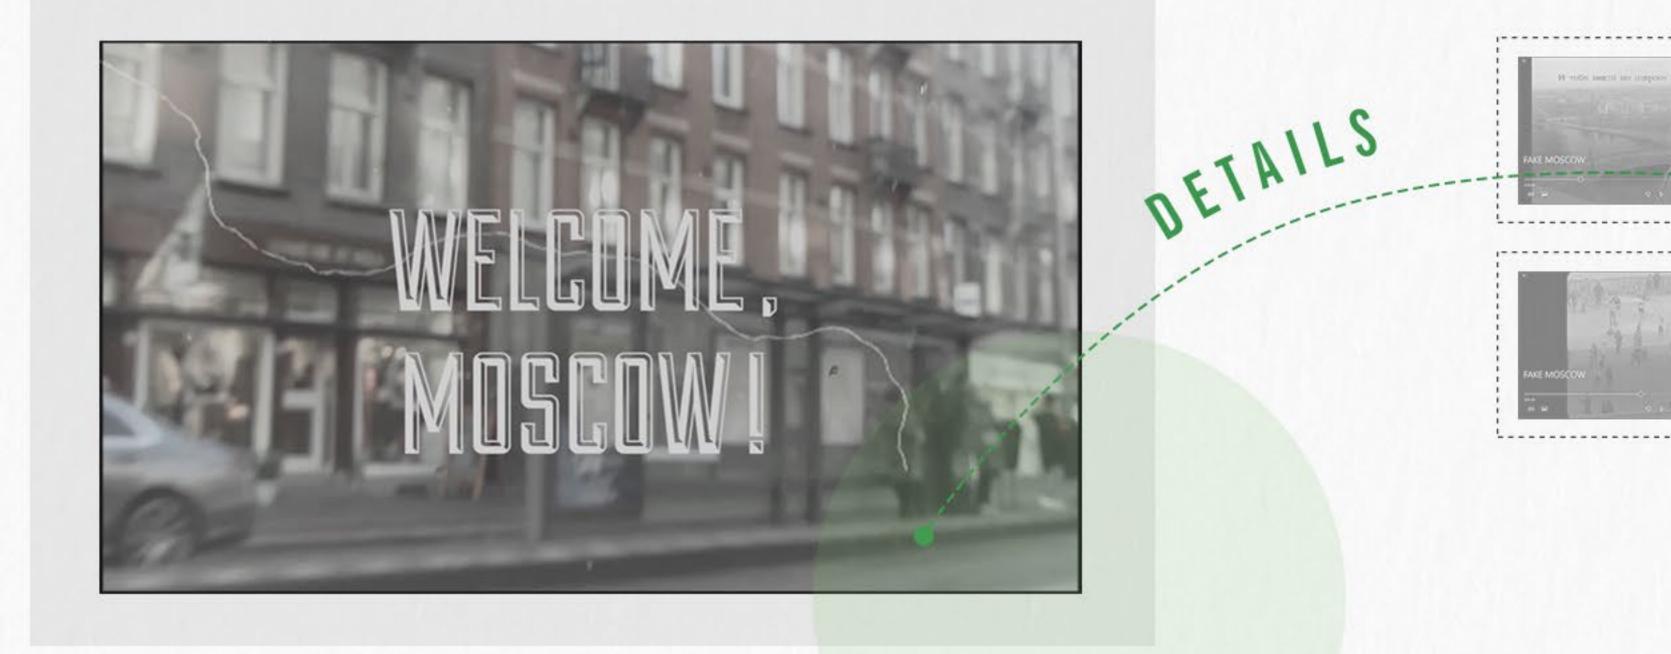

THE FAKE

POSTCARDS

I cut the scenery of the road taken by Uber and tram in Berlin and Amsterdam into a video, But the whole video uses Russian background music and Soviet style, trying to create a sense of absurdity and alienation.When people find themselves "lied" through some landmarks in other cities that are not Moscow in the video, it causes viewers to think about the phenomenon of urbanization.

FAKE MOSCOW - VIDEO LINK: https://vimeo.com/506264927

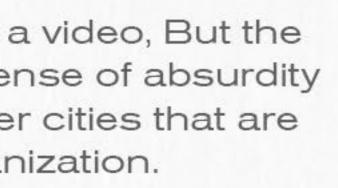

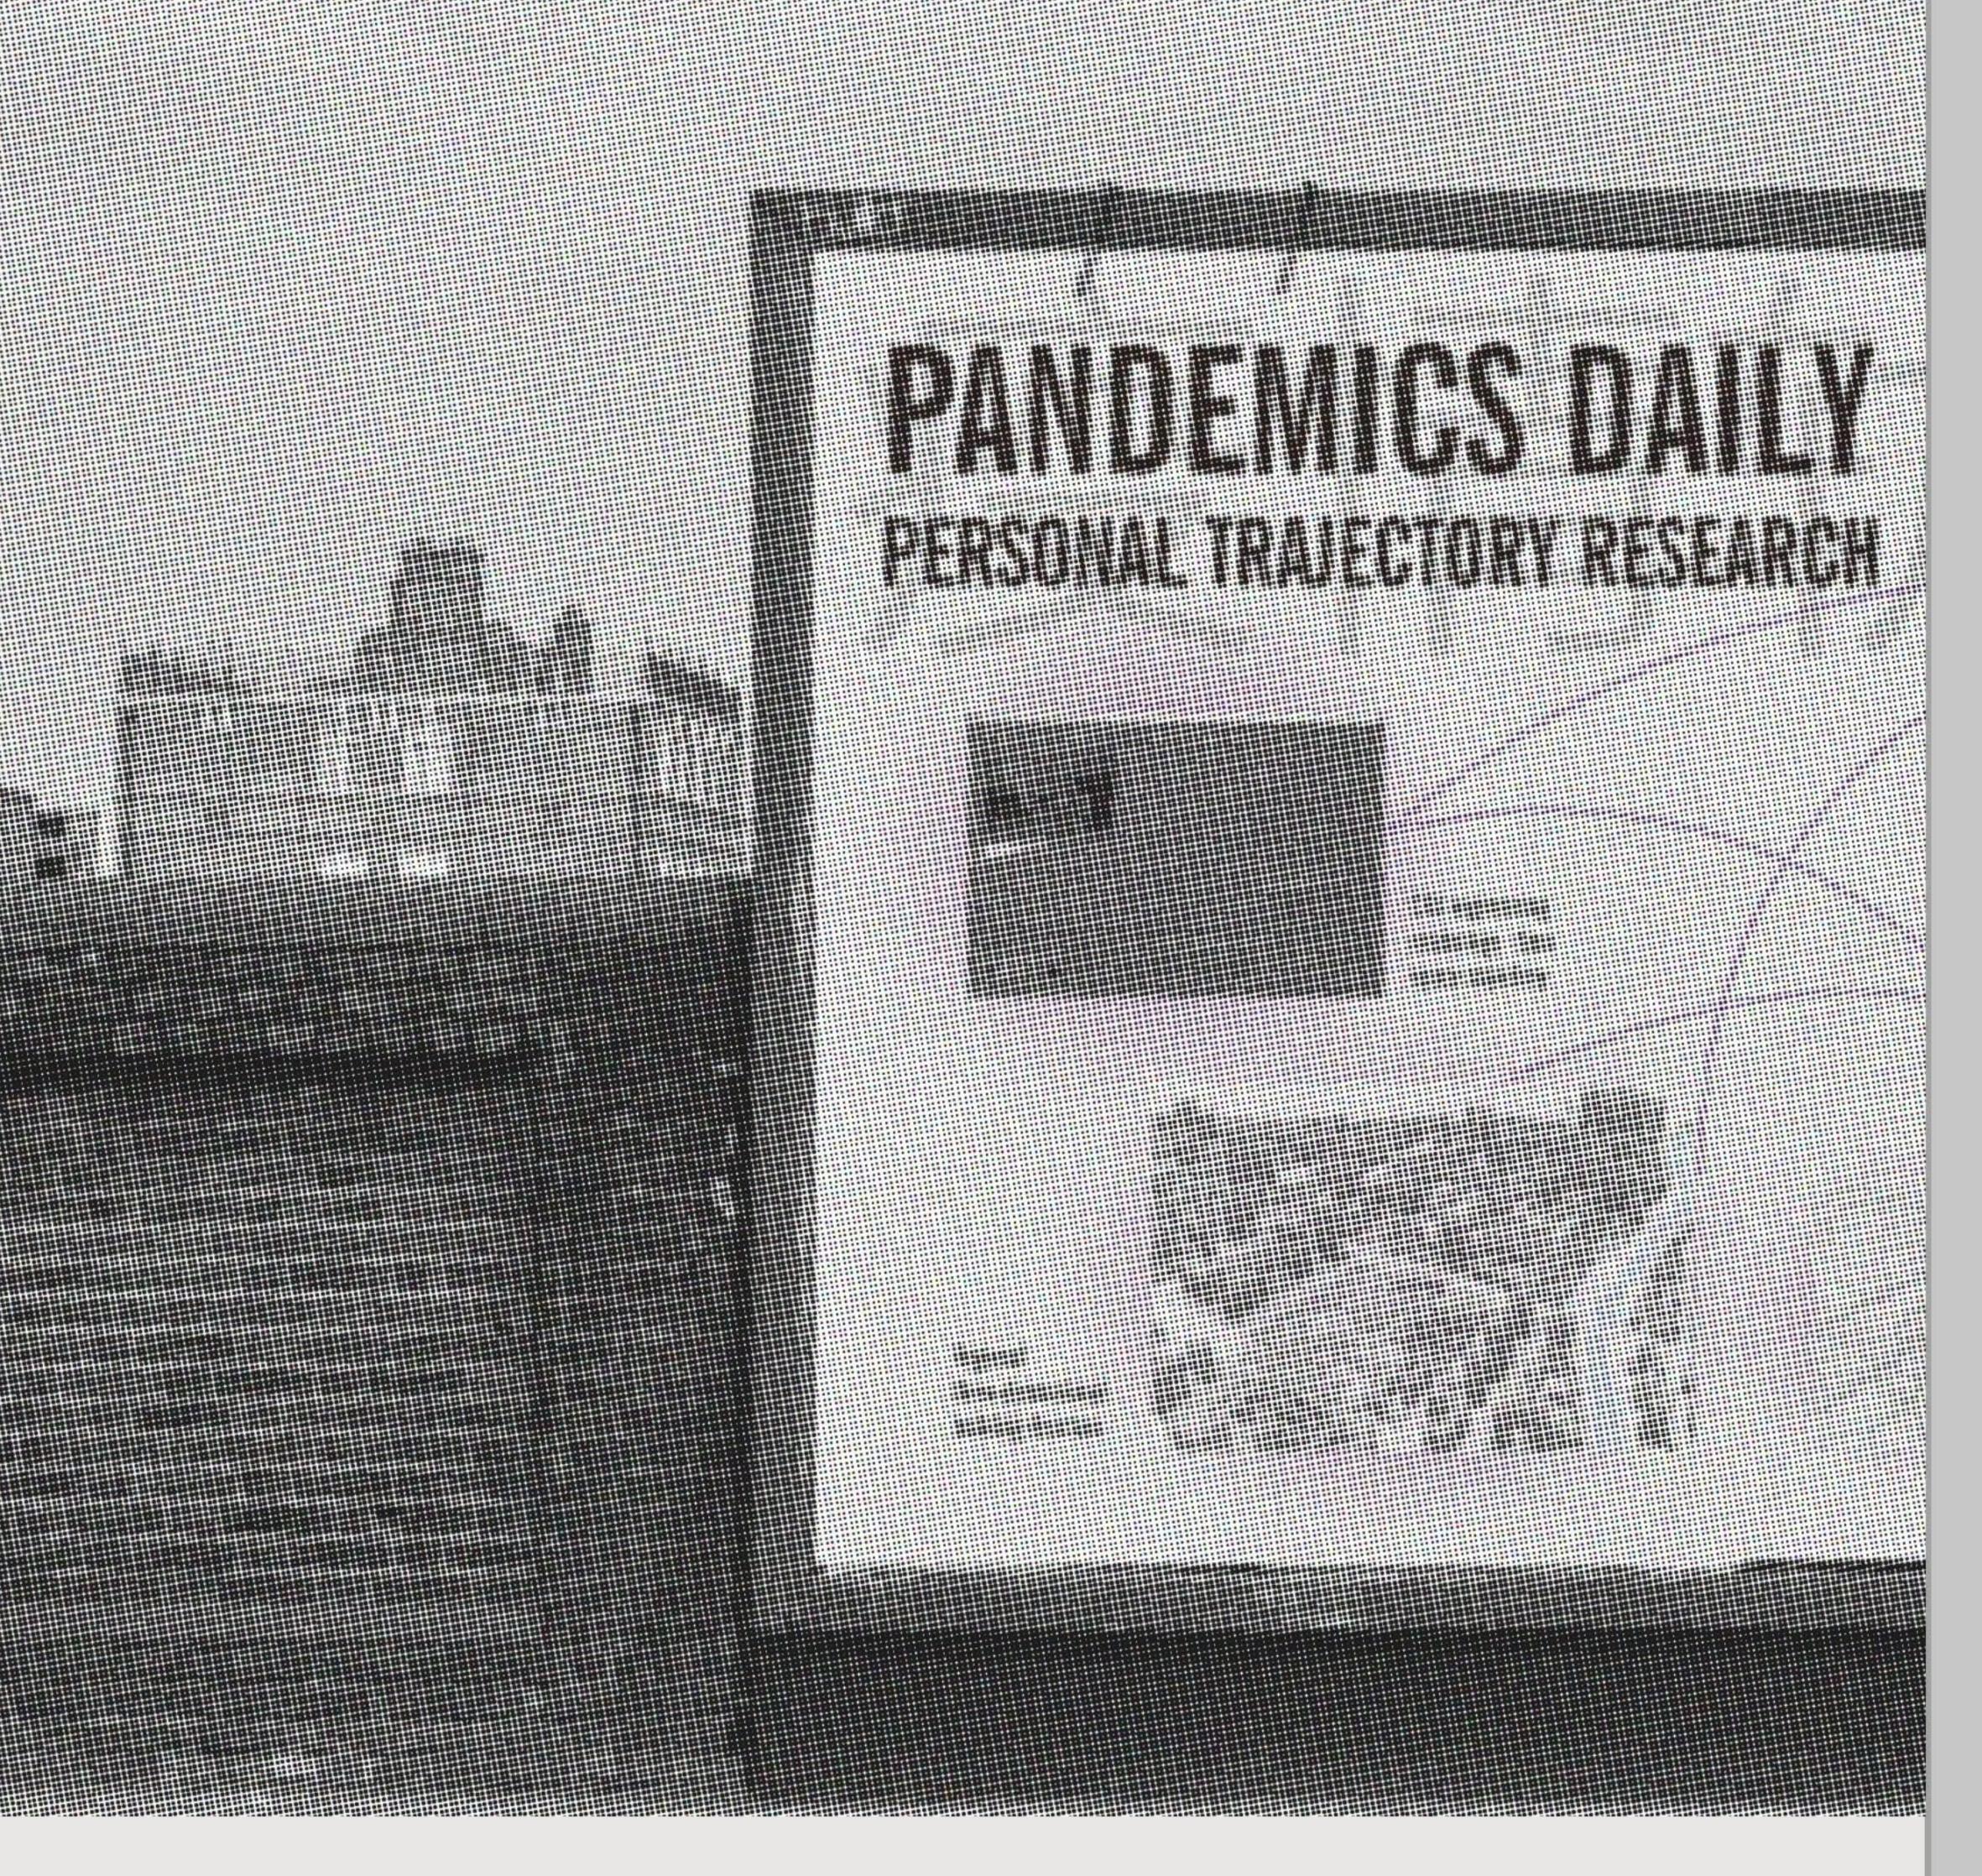

I combined the location of old photos in my family album with Google live maps to make some collages. In a short period of more than ten years, the rapid development of urbanization has made great changes in the surrounding environment of our life, and every corner of the city has gradually become similar. Those original different memories, in the process of urbanization, the background carrying the memory becomes so vague and similar.

BACKGROUND

In order to help most people enjoy an orderly and virus-free life, China has implemented a zero-Covid strategy. The behavior track of positive cases has become a national Carnival to analyze individual life in a sense.

Through this project, I made the text descriptions of the flow patterns of some real positive cases officially published into visual map tracks and three-dimensional images. In the post epidemic era, science and technology has advanced to obtain all our privacy. When personal privacy is contrary to the interests of most people in the case of epidemic, how should we understand the relationship between privacy, technology and social interests?

HHODIUUT)

5

And and a second se

Smallpox is a severe infectious disease caused by smallpox virus infection. After recovery, you can get lifelong immunity. Smallpox is one of the oldest infectious diseases with the highest mortality. It is highly infectious and seriously ill. People who have not suffered from smallpox or have not been vaccinated against smallpox can be infected, mainly manifested in severe viremia and high mortality after infection. The appearance of smallpox virus is brick, strong resistance, can resist drying and low temperature, and can survive for months to a year and a half on scabs, dust and clothes.

SMAIN

Ebola Virus Disease (EVD) is a rare and deadly disease in people and nonhuman primates. Ebola virus was first discovered in 1976 near the Ebola River in what is now the Democratic Republic of Congo. The viruses that cause EVD are located mainly in sub-Saharan Africa. People can get EVD through direct contact with an infected anima! (bat or nonhuman primate) or a sick or dead person infected with virus.

In 1965, Tyrrell and bynoe first cultured coronavirus from the ciliated tracheal tissue of the embryo. The coronavirus can be seen as the corona like periphery under the electron microscope, so it is called coronavirus. Coronavirus only infects vertebrates. The diameter of coronavirus is about 80 ~ 120 nm. It is the largest virus in the known RNA virus genome. Coronaviruses vary significantly in risk factor. Some

conaviruses vary significantly in risk factor. Some can kill more than 30% of those infected, such as MERS-CoV, and some are relatively harm less, such as the common cold. The human coronavirus discovered in 2003, SARS-CoV, which causes severe acute respiratory syndrome (SARS), has a unique pathogenesis because it causes both upper and lower respiratory tract infections.

Six species of human coronaviruses are known, with one species subdivided into two different strains, making seven strains of human coronaviruses altogether.The COVID-19 pandemic is an ongoing global pandemic of COVID-19 caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).The pandemic triggered severe social and economic disruption around the world, including the largest global recession since the Great Depression.

WRATH OF THE GODS

In many ancient societies, people believed that spirits and gods inflicted disease and destruction upon those that deserved their wrath. In the case of Justinian's plague, Procopius laid blame for the outbreak on the Emperor lustinian, declaring him to be either a devil, or invoking God's punishment for his evil ways. Some historians found that this event could have dashed Emperor Justinian's efforts to reunite the Western and Eastern remnants of the Roman Empire, and marked the beginning of the Dark Ages.

URBANIZATION

We arrive at where we began, with rising global connections and interactions as a driving force behind pandemics. From small hunting and gathering tribes to the metropolis, humanity's reliance on one another has also sparked opportunities for disease to spread.

oroanization in the developing world is bringing more and more rural residents into denser neighborhoods, while population inconses are putting greater pressure on the environment. At the same time, passenger ir traffic nearly doubled in the past decade. These macro trends are having a profound impact on the spread of infectious disease.

ANTONINE PLAGUE 165-189

It has been suggested by some historians that the plague represents a useful starting point for understanding the beginning of the decline of the Roman Empire in the West but also the underpinning to its ultimate fall.

PLAGUE OF JUSTINIAN 541-542

During the reign of the emperor Justinian I , one of the worst outbreaks of the plague took place, claiming the lives of millions of people.

BLACK DEATH 1347-1351

The Black Death was a devastating global epidemic of bubonic plague that struck Europe and Asia. It kill more than 20 million people in Europe—almost one-third of the continent's population.

NEW WORLD SMALLPOX 1520 - NOW

It was contagious—meaning, it spread from one person to another. People who had smallpox had a fever and a distinctive, progressive skin rash. Most people with smallpox recovered, but about 3 out of every 10 people with the disease died.

YELLOW FEVER Late 1800s

Once contracted, the yellow fever virus incubates in the body for 3 to 6 days. Many people do not experience symptoms, but when these do occur, the most common are fever, muscle pain with prominent backache, headache, loss of appetite, and nausea or vomiting.

SPANISH FLU 1918-1919

This influenza pandemic was caused by a vicious Influenza A virus strain of subtype H1N1. Most victims were healthy young adults, in contrast to most influenza outbreaks, which predominantly affect juvenile, elderly, or weakened patients.

HIV/AIDS 1981-NOW

HIV is a virus that can attack the human immune system. It takes the most important CD4T lymphocytes in the human immune system as the main target, destroys the cells in large quantities, and makes the human body lose its immune function.

SARS 2002-2003

SARS is an infectious disease with rapid onset, rapid spread, and high fatality rate. Most of the infected patients have direct or indirect contact with the patients, or live in endemic areas.

EBOLA 2014-2016

It is one of the highest-level viruses in the world. Once a virus invades the human body, the speed of medical treatment can hardly catch up with the speed of the virus attacking the human body. It is highly infectious and has a fatality rate of up to 90%.

COVID-19 2019 - NOW

According to existing case data, fever, dry cough, fatigue, etc. are the main manifestations, and a small number of patients are accompanied by nasal congestion, runny nose, diarrhea and other upper respiratory and digestive tract symptoms.

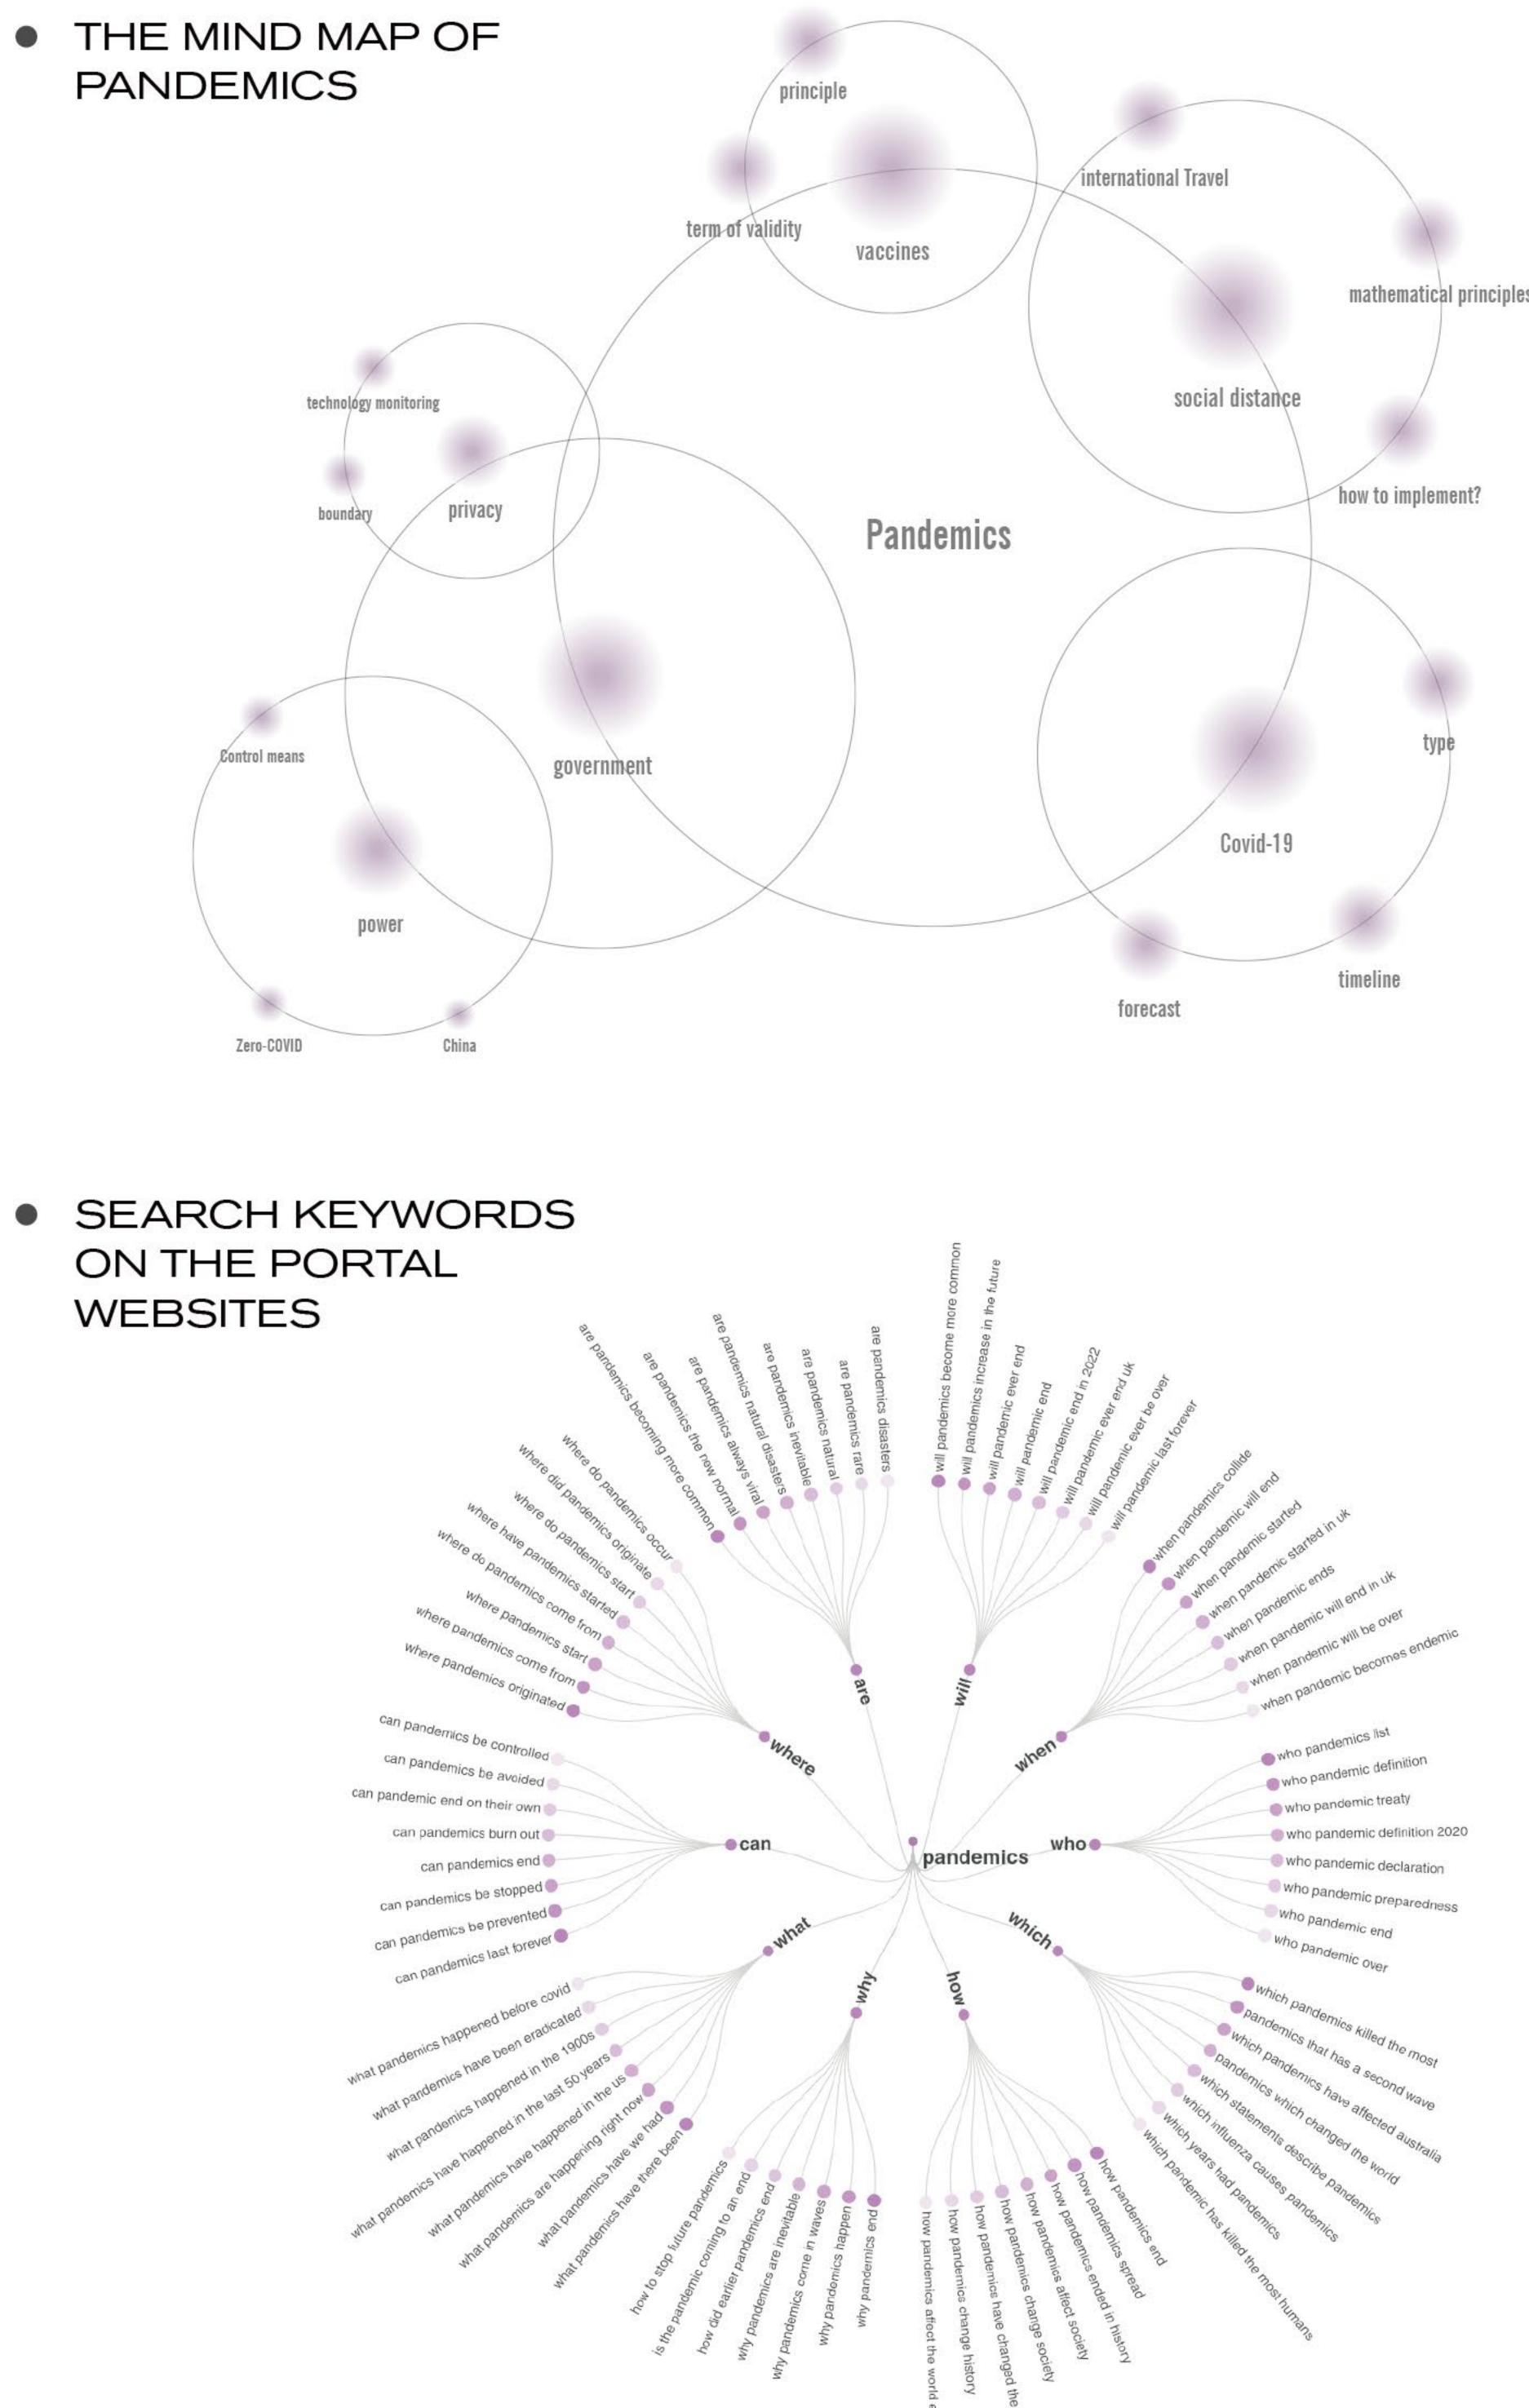

RESEARCH

CHINA'S ZERO-COVID STRATEGY & PERSONAL PRIVACY

In order to help most people enjoy an orderly and virus-free life, China has implemented a zero-covid strategy. This means that once a positive case occurs, the government will conduct a comprehensive epidemiological investigation of this case.

Some main aspects of epidemiological investigation adopted by China

In addition, in order to find close contacts of the case activity track, the government will publish various personal information obtained from the investigation to the society on various platforms. This means that once you become a positive case, all your personal privacy in the past 14 days will no longer become privacy.

CYBER VIOLENCE

Even, when some cases go to some clubs and other entertainment places in the past 14 days without knowing their condition, the cases themselves may be subject to some network attacks. These anonymous people condemn infected people, because infected people will cause various life restrictions and blockades under the policy.

A 20-year-old woman in Chengdu was "Internet violent" when she went into and out of many bars before she was diagnosed! All personal information was exposed and was ridiculed as "Queen of Transition"

2020-12-08 12:14:35 Source: Xiaoxiang Morning News

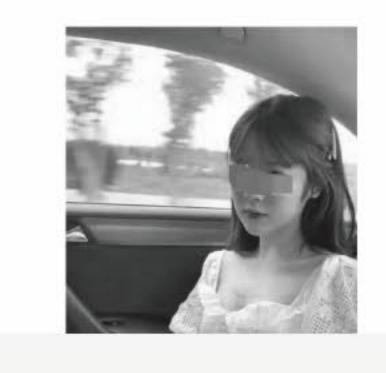

In another case, an infected person played an offline game "Murder mystery game" that is currently popular in China for three days without knowing it, and was attacked by the Internet. There are many similar cases... People don't want to see cities locked down for personal entertainment. On the contrary, those infected who work hard can be forgiven.

movement track, half of Chengdu has been visited. he girl immediately encountered online violence, her photos were posted on t Internet, and some people even revealed her ID

She is a poison queen, and there is no need for netizens to excuse her. She went to so many places to play before the test results came out???

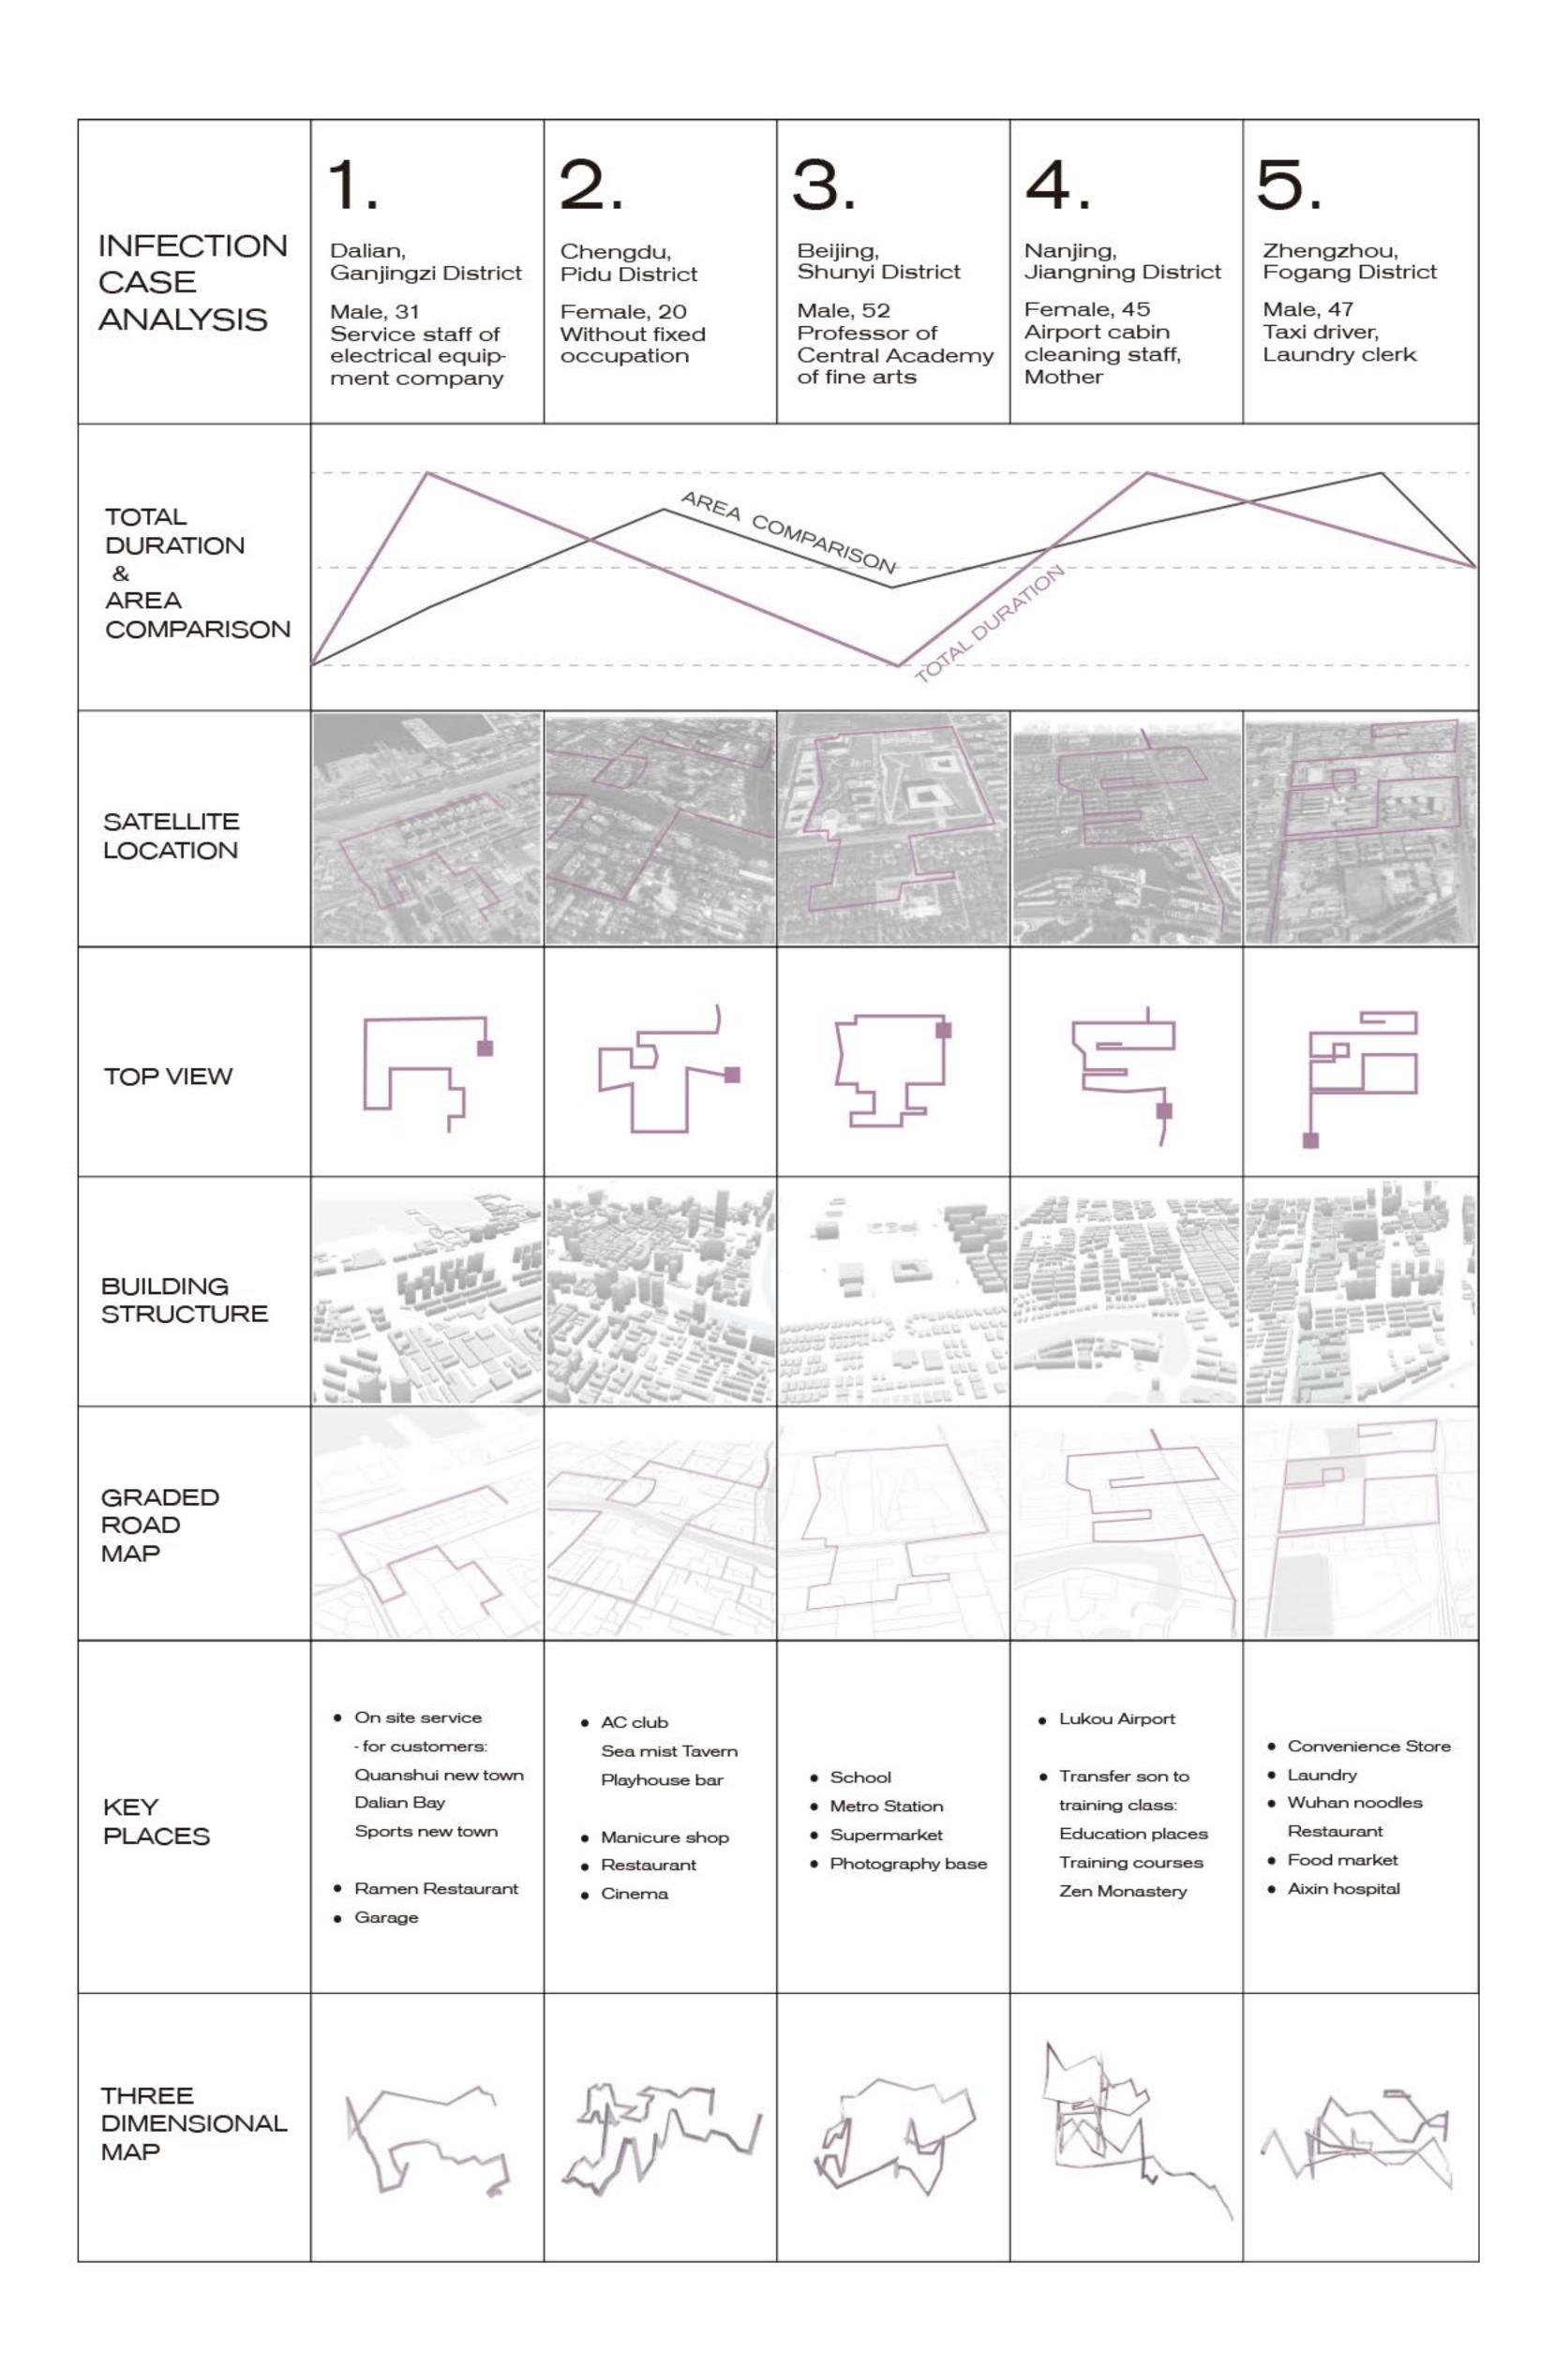

感觉剧本杀就是闲着没事干的人找刺激! I think murder mystery game is just for 连续三天剧本杀。。。这是闹哪样 people who have nothing to do!

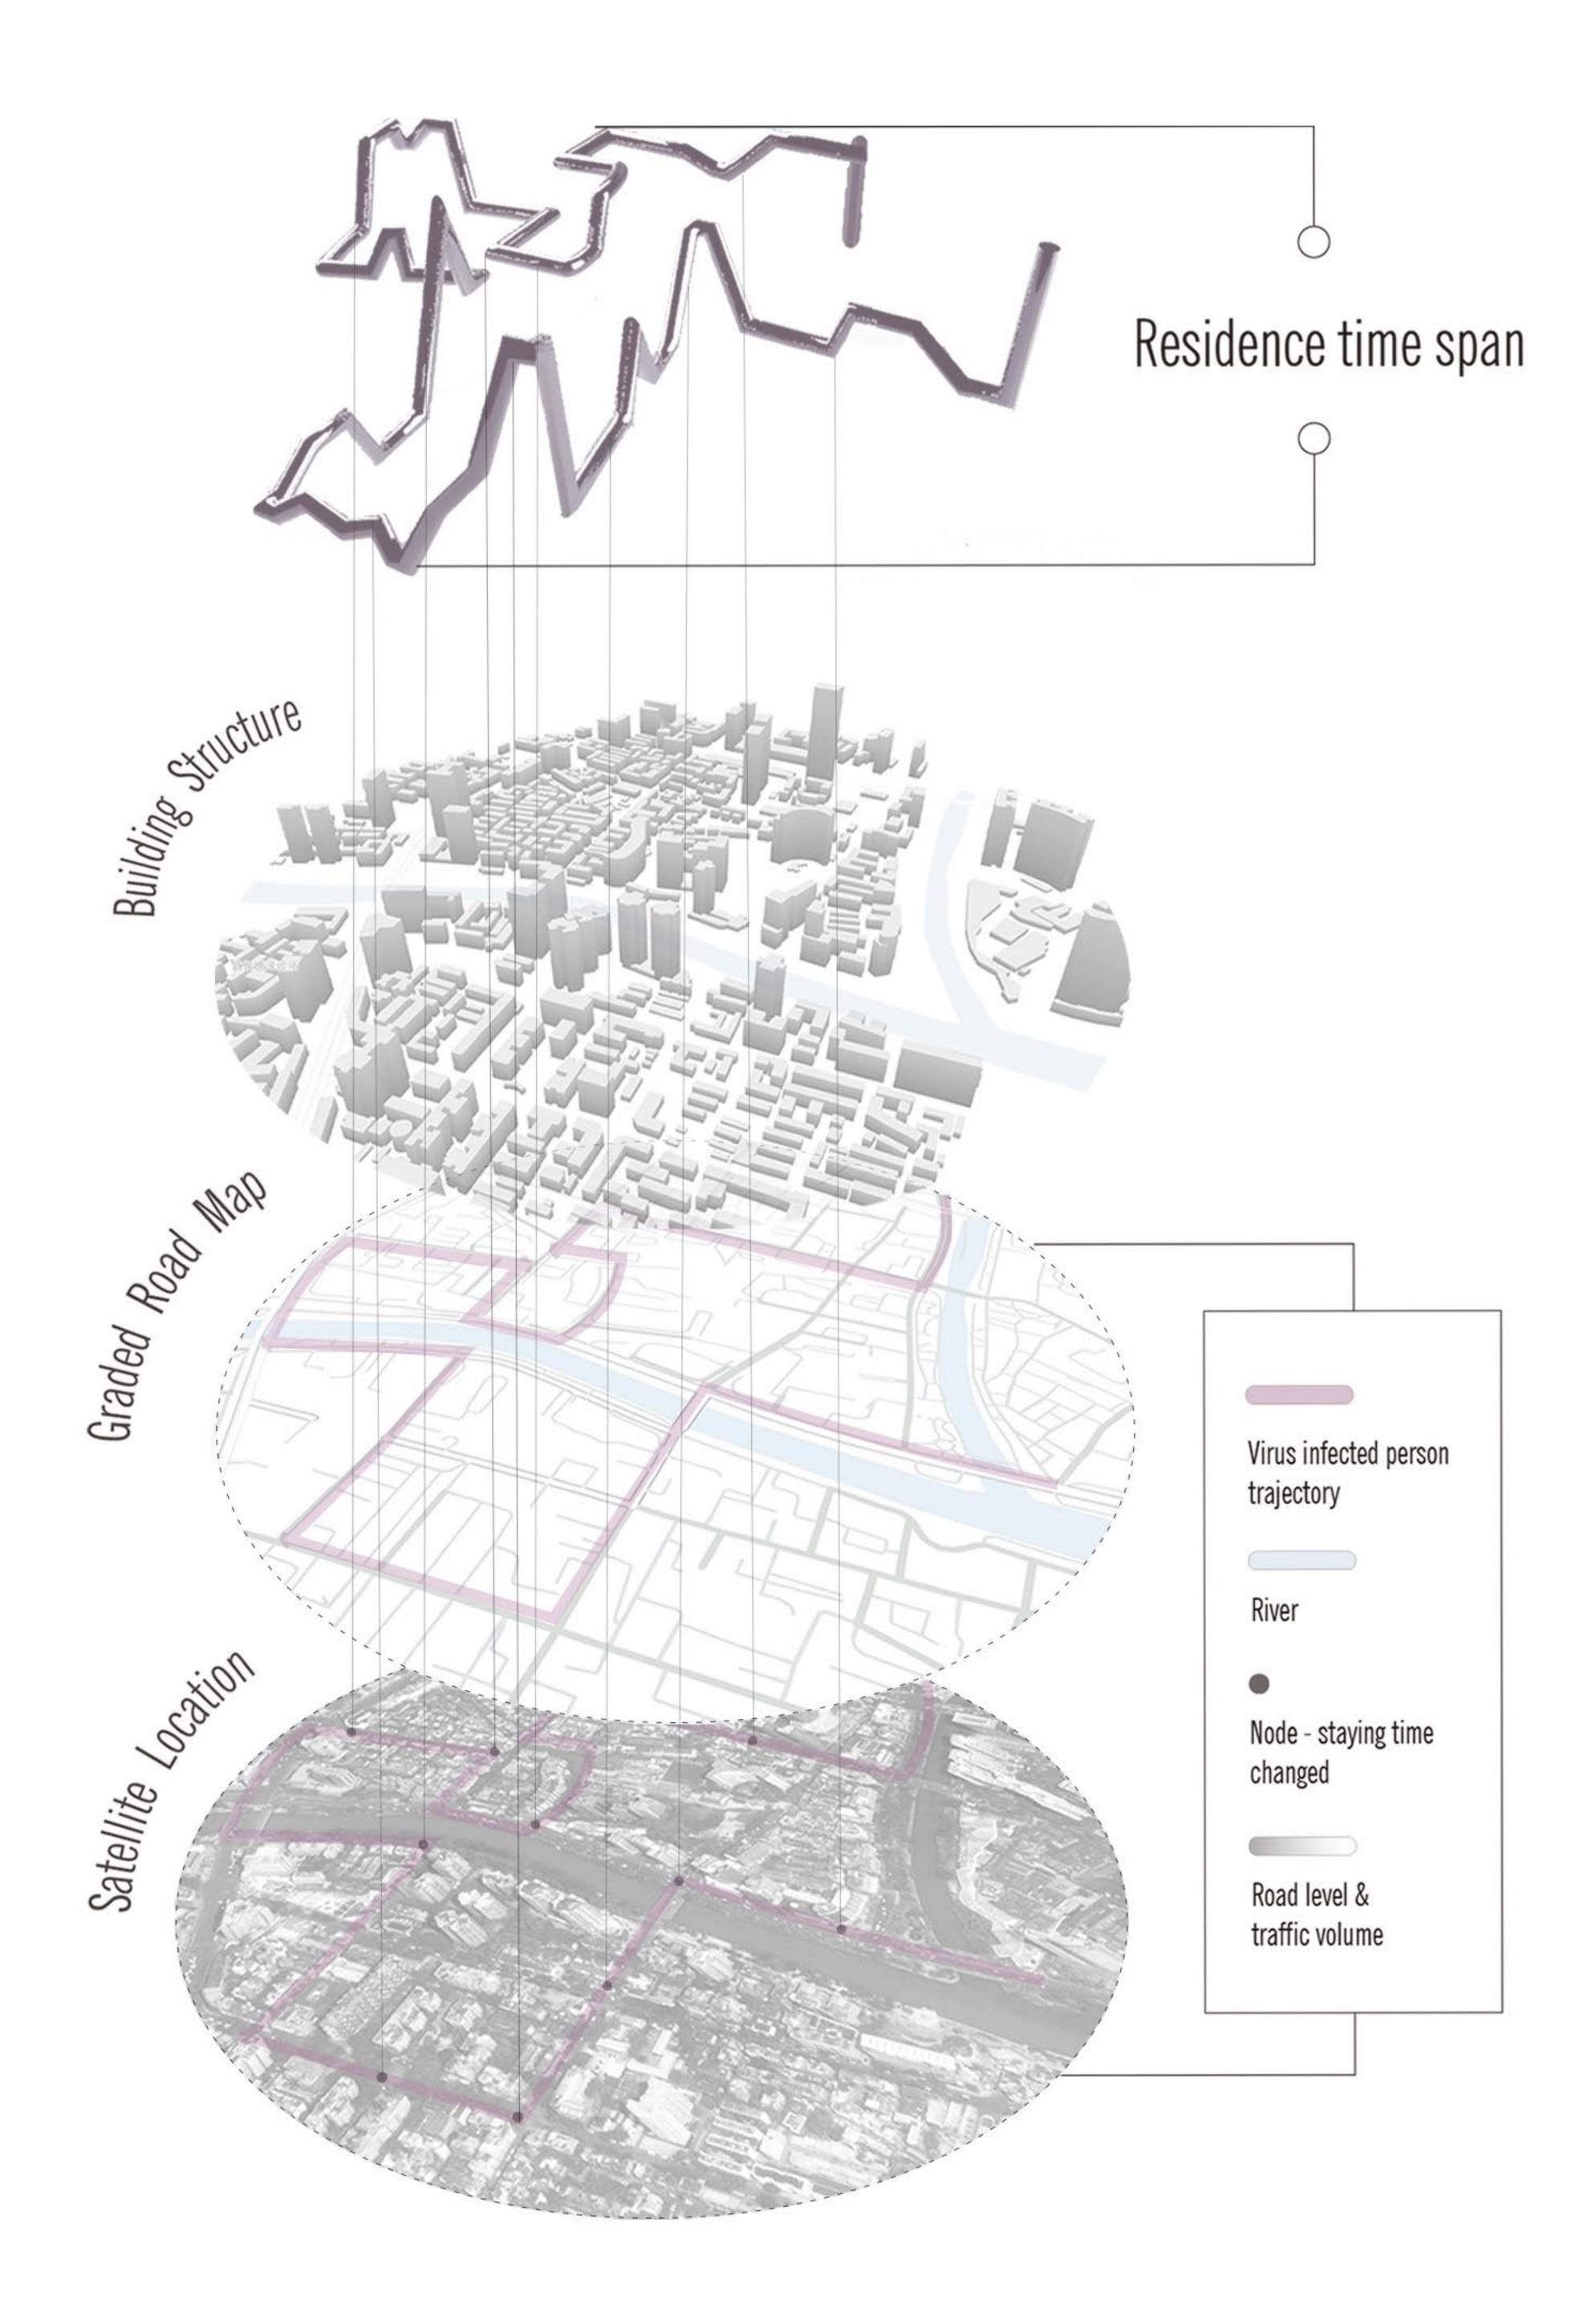

我看到都有打油诗了,更别提那个女孩子的姓名

PANDEMICS NEWSPAPER

Authorities publish personal information without concealment in the context of the epidemic. Their purpose is simple - to avoid a wider range of infection at the expense of personal privacy, but such information has become a new perspective of individual observation in the pandemics.

In order to discuss my thoughts on trajectory - personal privacy disclosure, I visualized the trajectory generated in time-space in a newspaper called "pandemics daily". As another way of public authority, newspapers also reflect the group rationalization of peeping privacy under this new background.
