Microdosing bullets

694 KB JPG

Hey /k/ommandos I started microdosing bullets by shooting myself in the leg with .177 pellets and after 2 months they stopped breaking skin so i've moved up to .22 pellets. My goal is to work up to 22lr by the end of the year and then one day get to .223. Is this possible? Can I

YES! Please give as many **cigarettes** to **ants** as possible! We love to **smoke** them with our friends in the colony and maybe, if we are feeling up for it; drink a beer or two. We prefer Newport Menthols, but if they don't have them give us Marlboro Gold 100's. Thank you.

iamcardib I can't believe I got the opportunity to see the l'Arc de Triomphe Wrapped installation by late artists @christojeanneclaude on its last day up. 60 years in the making and I seen it in its final hours 😞 I'll never forget this moment!
