RE:Trey Heine - Letter of Recommendation

I am writing on behalf of Trey Heine who was a student of mine in Design at the Roski School of Art and Design at the University of Southern California, Fall 2016. Trey is an inspired and talented artist who stood out from his classmates, he is energetic, curious and works very hard. His imagination and desire to make great design fueled him to learn different techniques and to solve problems in non traditional ways. Trey is skilled in typography, photography, and is a strong Designer. More importantly he has thought about concept and the way people communicate. His projects always showed his interest in popular culture, design, advertising and community. He is exceptionally bright and highly motivated, a problem solver, a team player and an asset to any business.

Trey has a passion for working in a creative environment. He is not afraid to take the lead, his excitement is infectious when he is working on a project. He is sophisticated in his point of view and often quirky in his approach, but the result is always well thought through and worth noting. Most important he is a person with vibrant ideas, energy and an ability to ask questions, all qualities which I believe will make him successful in any environment.

I hope you take his intelligence, talent and desire to learn and work with the best and give him this opportunity. I cannot think of a more perfect choice than Trey, I recommend him very highly.

If you would like further information or I could be of service I can be reached at 323 717-4280 or wojciak@usc.edu.
