TRECE TRECE

Trece Manufacturing, Madrid 2022.

Creating functional garments with traditional methods using mechanical machines rescued and repaired from old factories.

The idea behind Trece Mfg. is to unite friends talents with a common visual culture to go further by creating a richer graphic image and patterns to offer collections in batches manufactured from our independent workshop using quality fabrics from trusted nearby suppliers and continue working on an avant-garde design, without leaving aside tradition and functionality, adding the graphic printing to the tailoring workshop.
