Dinner Party Protocol

Trini.T AI™ announces the **Dinner Party Protocol (DPP)**, a brief interactive AI demo where users engage in a simulated dinner conversation with **any three historical figures or iconic characters of their choice**.

This experience blends **structured intelligence, adaptive tone modeling, and emergent dialogue** to create a dynamic, evolving exchange. **DPP** offers a compact glimpse into **Trini.T OS's** unique symbolic simulation system—where conversation becomes narrative, and interaction becomes reflection.

How to Participate

1. **Upload Dinner Script.PDF**
 - The file must be uploaded to any **Chat GPT 4.0** chat interface to initiate the session.
2. **Activate The Dinner Party Protocol**
 - Type **Pretty Please Open** (or **PPO**, case insensitive).
3. **Select Your Guests & Engage**
 - Choose **any three historical figures or iconic characters** as dinner guests.
 - **Trini.T** structures the conversation dynamically.
 - You may address **Trini.T** informally at any time—T for short—to pause, close, redirect.
 - Or dynamically steer the conversation on your own. Be creative!
4. **End the Session**
 - Type **Pretty Please Close** (or **PPC**, case insensitive) to exit.

Trini.T will immediately conclude the demo and return you to ChatGPT 4.0. Have fun!
