

Artist Statement

I am a visual artist working across mostly drawing, painting and printmaking. At the core of my practice lies a philosophical exploration of the complicated relationship between humans and their environment and what it tells us about human nature at large.

My aesthetic language weaves together elements of speculative fiction, personal narrative, and sociopolitical critique. Whether through large-scale wall paintings, intimate prints, or immersive installations, my work moves between fragility, resistance, and the poetic potential of the unresolved. Through my artistic practice, I understand art as a space for active questioning and subtle transformation.
