

Sara Pizzigoni
Graphic Designer and Photographer
Milano, 1997

I was born in 1997 just outside Milan, where nature shaped my way of seeing and interpreting the visual world. I work in graphic design, visual communication, and photography.

I create clear, coherent, and well-crafted projects by combining analysis with sensitivity. Photography is part of my process — a tool to capture and reveal what often stays in the background: details, objects, spaces, and memories.

I believe in balancing method and intuition, structure and visual storytelling.
