

Curriculum Vitae

Karolina Borucka

Bio

Karolina is a multidisciplinary designer born in 2001 in Poznań, Poland.

In her practice the main objective is to get to know the systems, infrastructures and social relations that come in contact with a field. She looks beyond the assumptions and takes on different angles to create a rich image while being aware that it can never be complete. She likes to play with the sensibilities and stories hidden in plain sight, through breaking down information from various sources. She is a flexible collaborator and is interested in bridging seemingly distant disciplines.
