DESIGN PROJECTS

■ Baker-Miller Punch

December 2023

- Designed an app with dual use as a stress-relief healing machine and user research. Sought to measure human relationships with color, sound, symbol and emotive objects. Utilized physical user input for quantitative results.

■ Plant Chorus

April 2023

- Designed a speculative product and companion mobile app as a small team project. Rearticulated informative data into an interactive and engaging game-like UI. Developed and pitched over three weeks.

■ Personalization for Embodied Code

October - December 2022

- Designed a personalization aspect and hub for developing educational VR platform "Embodied Code". Compiled research on media trends and user base.
