Koningsplein 2, 6811BV, Arnhem

Chun-Fang (淳芳) was born in Taiwan and currently studies graphic design at ArtEZ, Arnhem. In my study years, I've grown to have an interest in printed matter; book design, zines/ publications, typography and various printing techniques. I also explore various forms of media such as videos, installations and coding.

I find inspiration from nature and body movements; the curiosity of surroundings motivates me to capture tiny details and interpret them into concepts behind my works. In addition, my industrial design background and working experience in an exhibition curation studio have brought me some design skills and field experience.

### Skill

Visual: Photoshop, Illustrator,  
Indesign, Lightroom
