

# FLUID WING

- Wearable Metallic Shoulder Garment

FLUID WING transforms the rigid symbolism of weapons into a softened, bodily form. Sabotaged from my original “folded wing” LEGO gun prototype, the piece melts heroism, strength, and speed into something fluid and emotional. Worn across the shoulder like soft armor, the metallic form reshapes what protection could look like when power is gentle rather than aggressive.

Material: PLA, 3D print, spray metallic paint
