

TX-6 all new features

TX-6 is our ultra-portable, battery-powered mixer and multi-channel audio interface. with the latest OS update, we've added some all new features as well as some valuable updates.

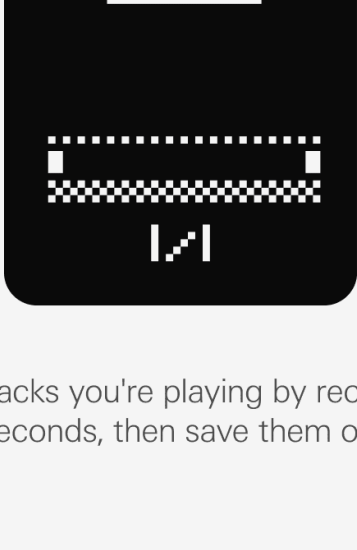

[update now](#)

sample function

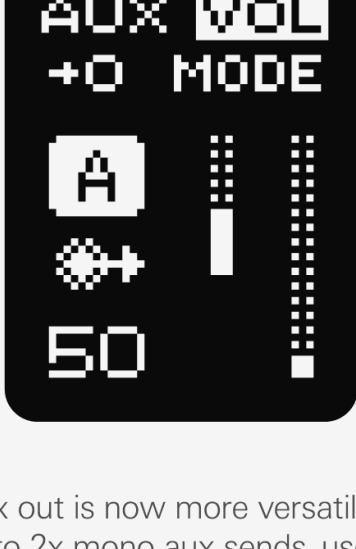

sample on TX-6 with each of the 6 track buttons now usable as sample slots. just connect your instruments, or a mic, and record.

loop function

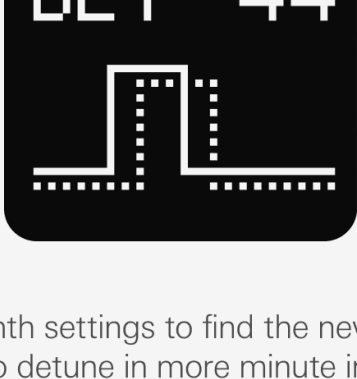

riff on the tracks you're playing by recording loops of up to 22 seconds, then save them on a usb drive.

split aux

the stereo aux out is now more versatile. aux out can now be set to 2x mono aux sends. use it for effect loops, triggering envelopes and more.

detuning

go into synth settings to find the new detuning function to detune in more minute increments. perfect for your dis-harmonic drone project.
