Dark Frontiers

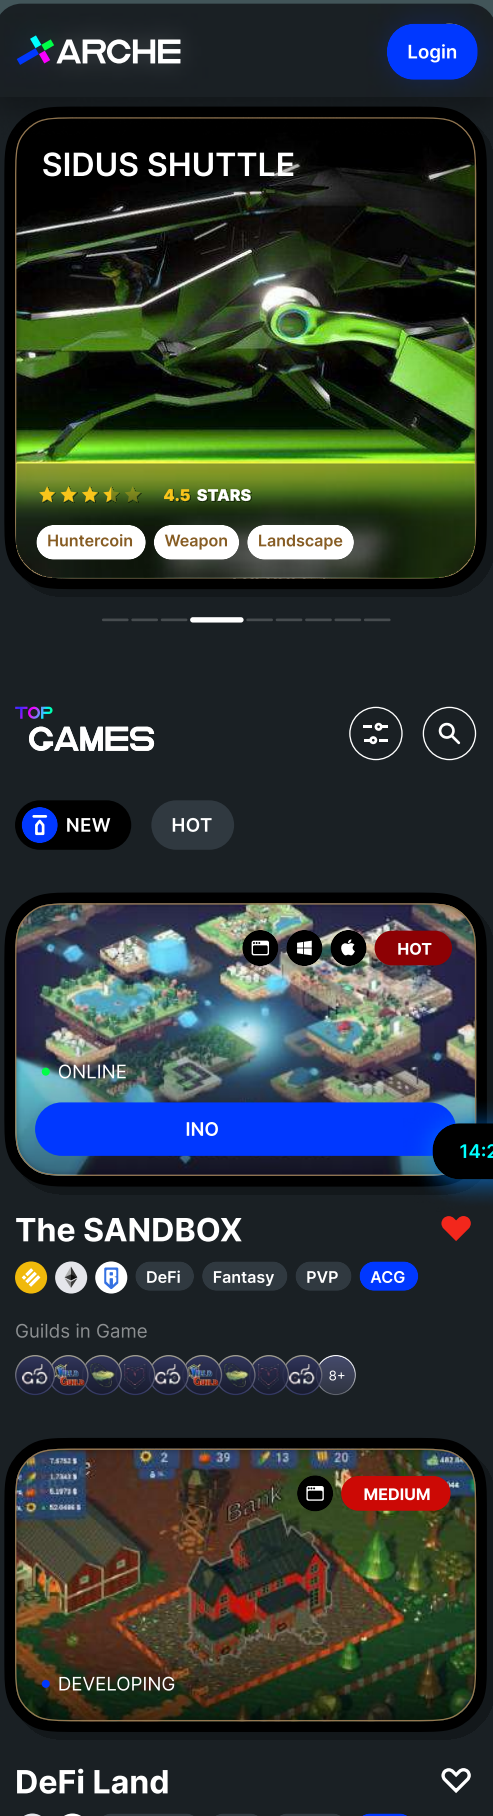

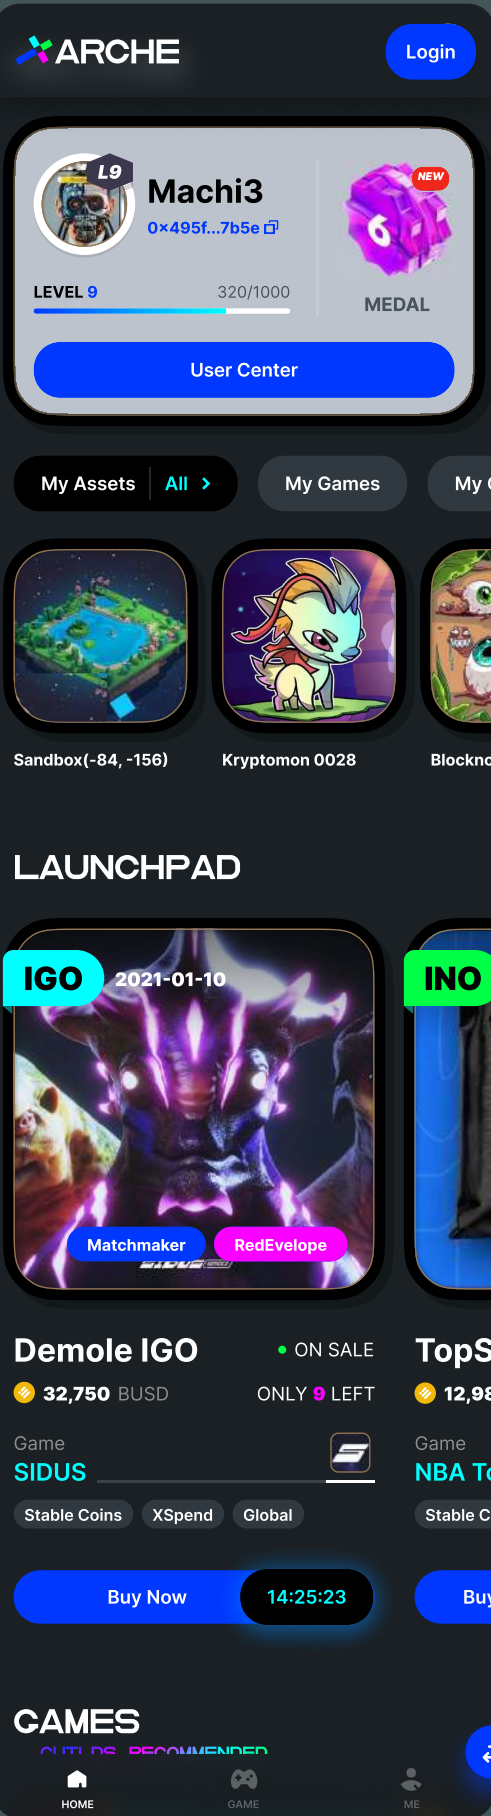

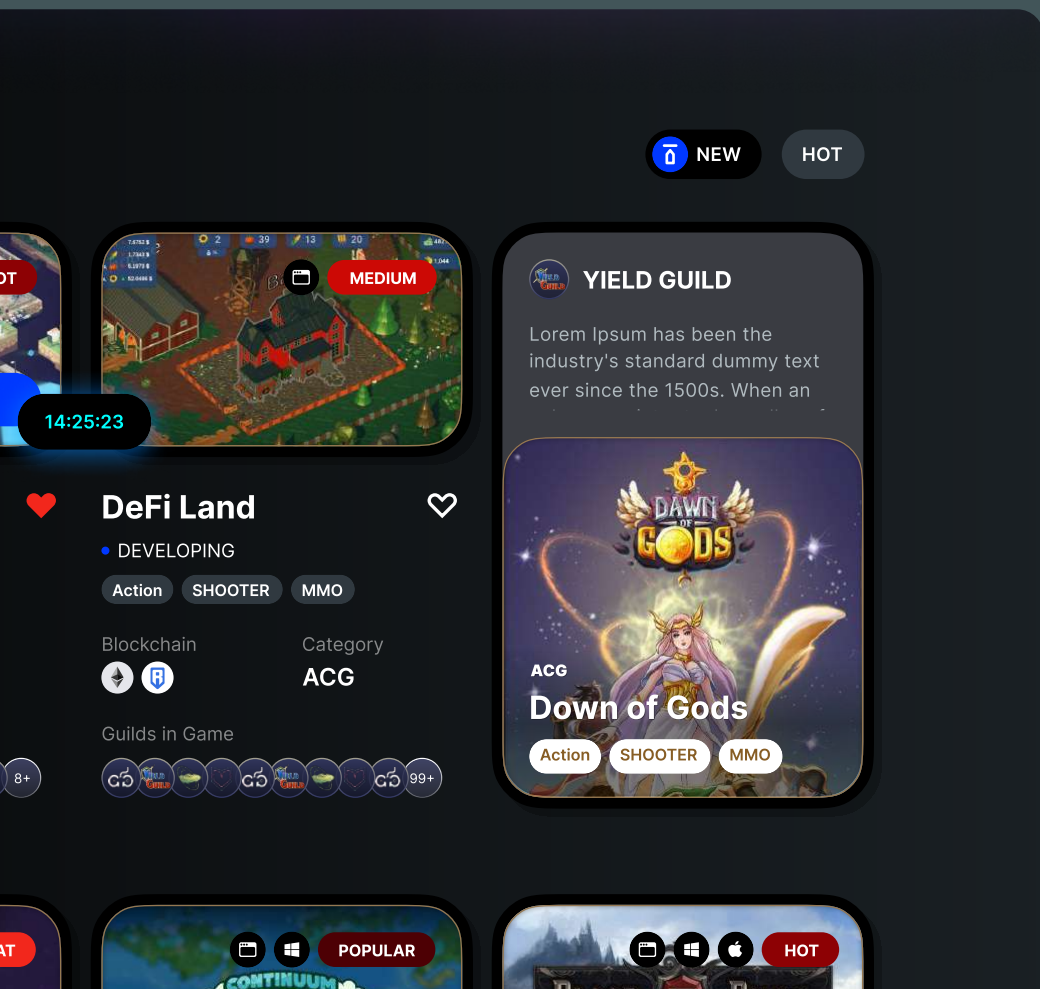

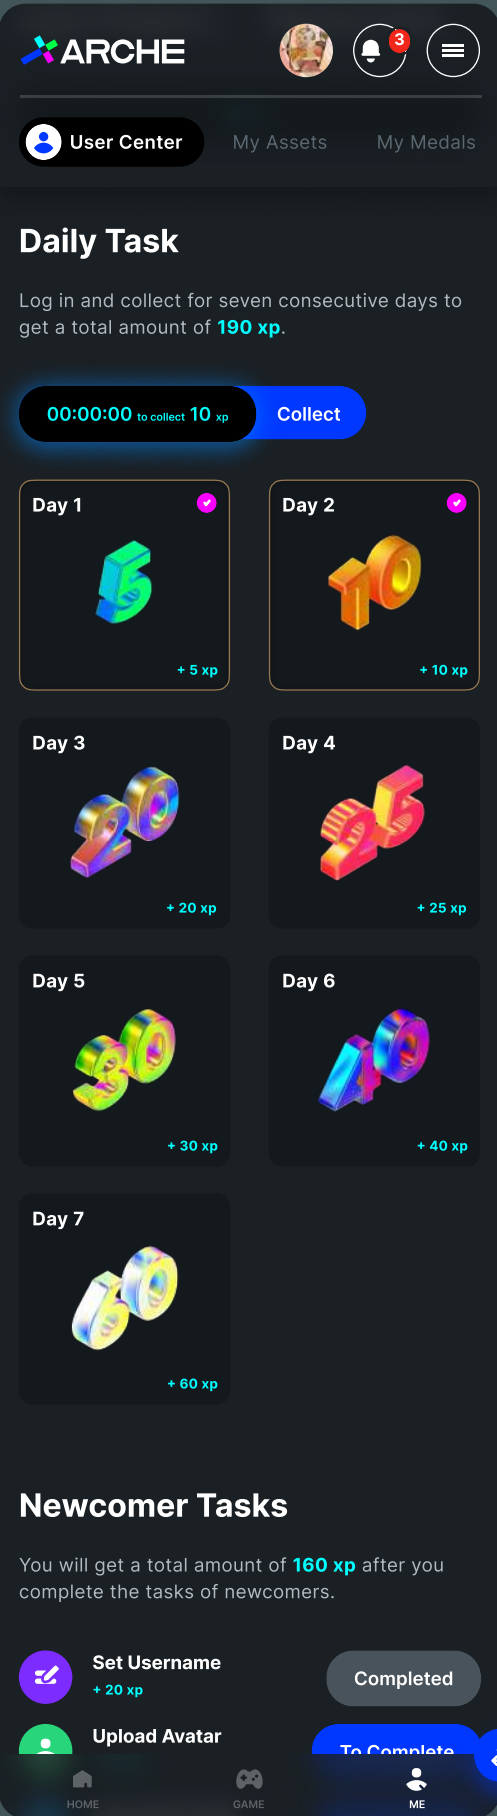

Lorem Ipsum has been the industry's standard dummy text ever since the 1500s. When an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s. Service Design

Buddy App[🔗]

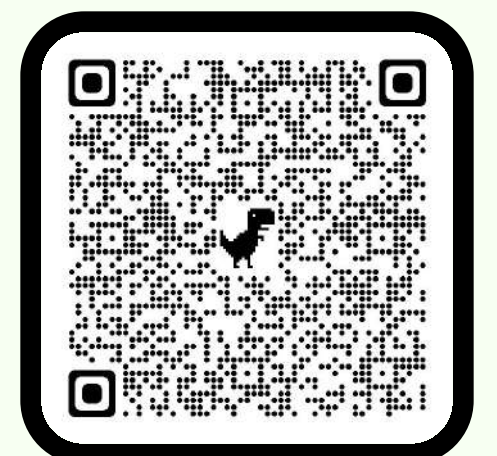

04/2023–05/2023
Rovaniemi, Finland

“Buddy” is a service design solution for short term exchange students when they are in dire need of a certain kind of skill or service in the University of Lapland that can be provided by other students or locals as a personal service provider with a more affordable price. I designed the UI and made the high fidelity prototype in Figma.

With the App logo and slogan, the wish is to greet the users with a friendly atmosphere and set the tone of the service with mutual helping hands. The animation of the changing colours in the two background squares of the logo creates a lively and vibrant feeling. With the animation, it'll be less boring when the App is loading in the beginning of the user journey.
