ARTIST BIO

Anh Tran is a artist and transdisciplinary designer based on the lands of the Kulin Nation specialising in digital narrative, filmmaking, VR/ XR, immersive exhibitions, and AI. Her practice integrates emerging technologies to explore environmental consciousness, feminism, and multicultural sensitivity. Through immersive experiences, she redefines perceptions of the environment, emphasising non-anthropocentric perspectives. Transitioning from interior design to digital storytelling, Anh creates works that embrace complexity and uncertainty, fostering ecological awareness and pushing the boundaries of technology and narrative to inspire deeper connections with nature.
