## ladies and gentlemen, let us introduce: the teenage engineering choir

teenage engineering choir is an ensemble of 8 wooden dolls, made to serenade you with a built-in repertoire of choral classics as well as perform your own original compositions through ble midi connection.

each doll is handcrafted from beech wood and individually polished in hard wax oil. inside is a speaker module that also includes the main processor and bluetooth low-energy transmitter. it is also rechargeable with 4 hours of performance time. at normal use (about 10 mins per day) the battery will last about a month.

based on different cultures and characters from across the world, every member has a unique look and vocal tonality. a single member can customize its vocal range to sing a dynamic solo performance, or 2-16 dolls, in any combination, can perform a full a cappella concert.

the choir includes a repertoire spanning baroque to folk. alternatively, users can conduct the choir with OP-1 field, OP-Z, or any midi keyboard with ble midi functionality. the choir will instantly sing any notes you play.

an accelerometer inside the speaker box makes simple controls a playful experience. gently tap the doll on its head or on the table to trigger play or pause. tilt the doll left or right to decrease or increase the volume.

the choir is inspired by teenage engineering's first project, the absolut choir from 2007, an art installation made up of 22 wooden dolls of varying sizes for the larger "absolute machine" project.

**about teenage engineering**  
teenage engineering is developing the alternative future of consumer electronics - each invention built to last.

from reimagining music making with the iconic OP-1 portable synthesizer and growing the synth population with the affordable pocket operator series, to rethinking listening with the OD-11 ortho directional speaker and the OB-4 magic radio, they have applied their signature mindset to a new legacy of enduring technologies.

their creations have attracted collaborations with well-known artists and brands, sharing in their vision to integrate creativity into the everyday. teenage engineering was founded in 2007 and is based in stockholm, sweden.
