SHIVERS

Shivers is a 3 minute installation based film in collaboration with award winning Open Water Swimming Coach Julia Wingate. Julia shares her story whilst taking our team and the audience on an immersive journey into the open waters of the Coast of Devon. Her theory is that "everybody comes away with something positive from being in the sea" and to "just try".

My main role in this project was as the sound artist. By using equipment we rented out, I recorded ambient sounds of the sea, beach, wind etc, as well as using my GoPro to collect sounds of the water. I also reached out to a sound designer to collaborate in producing a soundtrack on top of our existing audio montage.

PERSONA ENTERTAINMENT

Persona Entertainment is a start-up record label based in Bangkok, Thailand. In the summer of 2023, I had the opportunity to work in production of filming an advertisement for Persona Entertainment. As well as taking behind-the-scene shots.

NURTURING BONDS

Nurturing Bonds is a short film delving into the depths of motherhood through the lens of my cousin, Emma. The film is an immersive documentation which captures Emma's perspective on the challenges and joys of motherhood, offering a raw and unfiltered portrayal of the realities a mother face. We live in society where motherhood is often depicted as picture perfect and effortless, this film shines a light on the true and sometimes tumultuous journey being a mother.
