Collectible Selection

BY ELINA ULVIO

The Collectible Selection is a manifesto for cherishing the outdated. The objects are inspired by the rich details and harmonic proportions of recycled styles and favourite aesthetics from the past. The collection is a medium to highlight the cyclicity of trends as a means to extend the lifespan of interiors and enable a more sustainable approach to design.

By combining sensible materials with uncompromising design Elina Ulvio aims to produce collectible objects that stand the test of time.

The designs are made in Finland utilising local materials, handcrafted by the designer and trusted fabricators.

The Collectible Selection includes Puro Chair, Harlequin Pendant Light, Plankton Light Sculpture, Nefertiti Mirror and Kaija Table.

Harlequin
Pendant Light

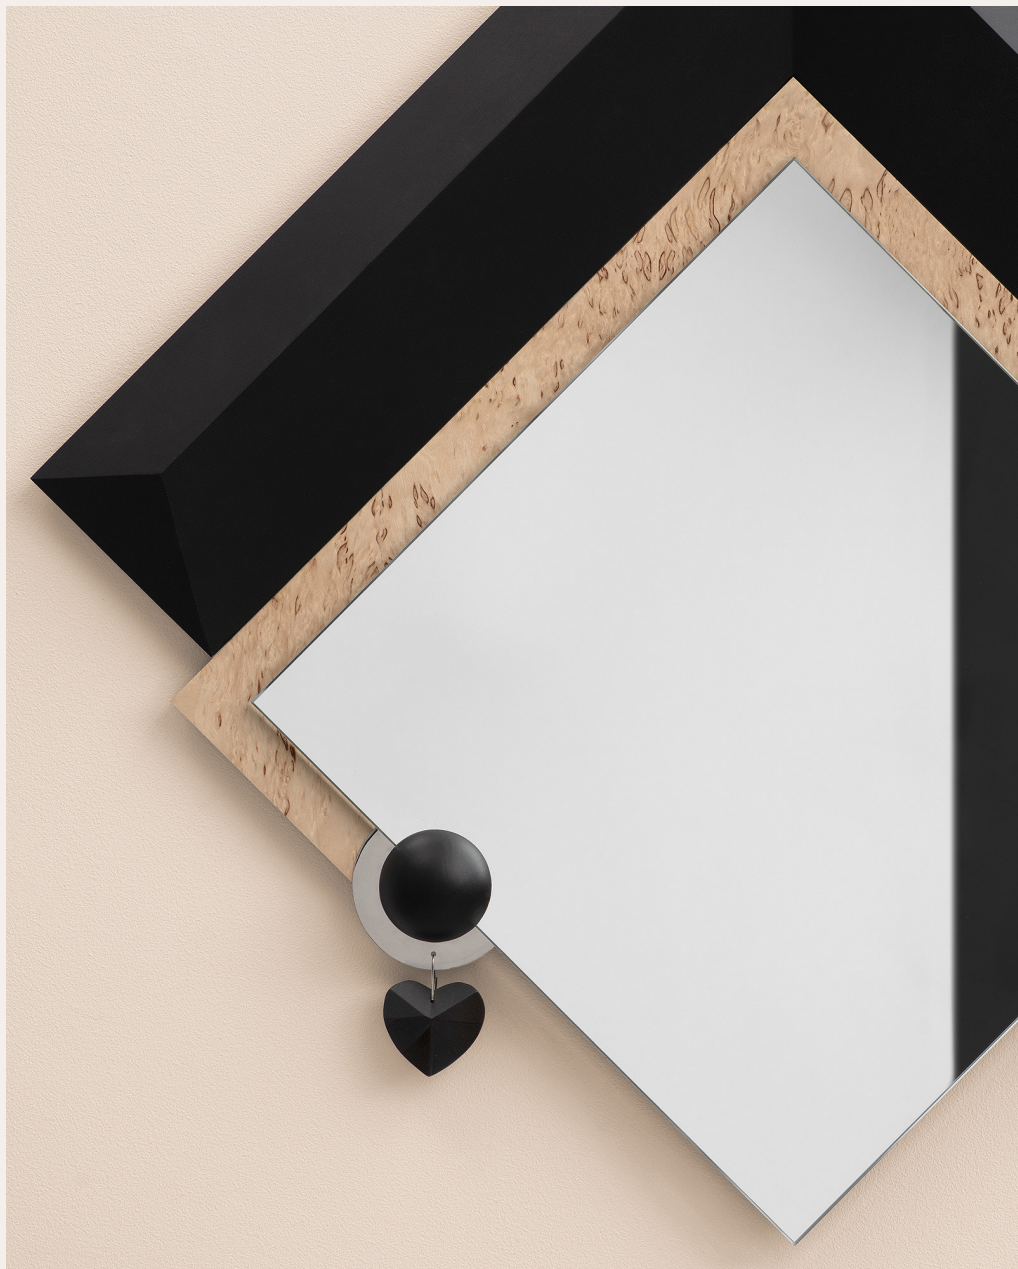

Soft fabric combined with shiny glass, wood and steel create together a textural palette where different materials reflect light in various ways. Harlequin lampshade is hand pleated into a harmonic arrangement that softly diffuses light in a spherical angle, making it easy on the eyes from every direction. Inspired by iconic themes the composition forms an ensemble that celebrates light, shadow and contrasts.

Puro Chair

Puro is a brutalist chair that combines geometrical shapes with poetic silhouettes. The vivid texture of wood is enhanced by the curvy shapes of the chair. The essence of Puro chair is simultaneously exquisite and functional, making it suitable to be displayed as a stand-alone centrepiece as well as a harmonic part of a bigger setting.

Nefertiti Mirror

A play of basic shapes unites '80s postmodernism, Art Deco and ancient Egyptian styles. Inspired by classic geometry and the silhouettes of legendary Egyptian queens, Nefertiti mirror forms a portal between now and then. Glass, wood and metal create together an expressive palette of structures where different materials represent contrasts and character.

Kaija Table

Kaija table is inspired by legendary Finnish designer Kaija Aarikka and the eighties. Round shapes and velvety birch create a tangible essence to the object, making it easy to approach. The table top is reversible and foldable, with a mirror side adding a spatial feature.

Plankton Light Sculpture

Plankton is a sculptural wall light that creates a dynamic, artistic atmosphere. Turned off the perforated aluminium frame creates a carved artwork, as the holes form crisp, dark spots contrasted by the bright surface reflecting its surrounding light. Turned on the black holes transform into light, while the surrounding surface becomes a contrasting dark base.
