I'm a Graphic Designer, priding myself on bold, attention grabbing pieces of work. This extends into a variety of digital and physical formats, such as motion pieces, publications, photography, risography, screen-printing, and web design. But beyond these, I have years of experience with the Adobe Creative Suite, particularly Photoshop and InDesign.

I've got experience in completing a wide variety of live briefs, from album covers to installations. On the other hand, my personal work is driven by my own interests, with elements from music and photography.

Education

BA (Hons)
