big news - it's a tiny mixer

TX-6 field mixer is the new ultra-portable pro-mixer and audio interface from teenage engineering.

multitrack elegance

TX-6 is a 6 channel stereo mixer, or 12 channel mono, with built-in equalizer, filters, compressor, aux send, cue and digital effects. this ultra-portable mixer can also be used as a multi-functional usb audio interface.

more than meets the eye

you'll also find some fun extras, like the instrument tuner or the built-in sound generator with 4 waveforms and 4 drum machine sounds to create music on the go. the interface is completely customizable; choose to have the three-band eq at your fingertips, or program each knob to control preferred settings.

smallest of its kind

TX-6 is encased in durable aluminium with custom-designed encoders and faders. the rechargeable battery makes it completely portable so you can take TX-6 from home to the studio, or wherever really.

field system

field system began with the idea to create a series of products that look, feel and function as part of a whole. every item in the collection is designed with portability, compatibility and durability in mind. more than an engineering challenge, field system is driven by a desire to rethink the way we approach music making. TX-6 is the first release in the system, with more devices and accessories to come.

features

- 6 stereo inputs
- 3 stereo outputs
- headset mic support
- usb audio/midi
- built-in effects
- iPhone & iPad compatible (MFi)
- bluetooth low energy
- oled display
- rechargeable battery

dimensions

90 mm (102 mm with adapter)
x 62.5 mm x 15 mm (23 mm with encoders)

about teenage engineering

teenage engineering is developing the alternative future of consumer electronics - each invention driven by need, and built to last.

from reimagining music making with the iconic OP-1 portable synthesizer and growing the synth population with the affordable pocket operator series, to rethinking listening with the OD-11 ortho directional speaker and the OB-4 magic radio, they have applied their signature mindset to a new legacy of enduring technologies.

their creations have attracted collaborations with well known artists and brands, sharing in their vision to integrate creativity into the everyday. teenage engineering was founded in 2007 and is based in stockholm, sweden.
