tall
&
thin
things
are
all
around

like
the
very
pen
in
your
hand

the
aglet

and
the
lace
to
your
shoe

even
the
little
inch
worm
next
to
you

Cloudy,
white,
ultra-thin
vapors

Hang
above
grand
Masai
giraffes!

The
Cairo
flag
pole
is 679
feet tall

Let's
raise
the
flag
for
the
tallest
and
thinnest!

They
can
stand
up
to
nine-
teen
feet
tall!

The tallest smoke
stack is the GRES-2
in Kazakhstan.
It is 1,377 feet tall!
Woah!

The tallest redwood is named
"Hyperion", and it is 380 feet tall

Elephants
aren't
tall...

Or that thin at all!

Or
are
they?

It's
all
about

how
you
look
at
it!

The
inch
worm
again,

1in

They
are
small
for
their
size

but,
compared
to
their
tininess,

they
are
SO
tall!

Certain
molecules

can
be
a
single
atom
thin

but
can
stretch
miles
long!

so
tall
&
thin

A
short
and
wide
man

...

Makes
a
perfect
performer
in
stilts!

These
are
some
tall
&
thin
stilts!

They

at
all!

The ant is wide, stout,
long, short...

A creature grotesque &
strange... no place on this Earth...

wide, wide, wide, wide, wide,
short, short, short, short,

pest.

Where are they going?

Quick, let's follow them
into that anthill!

Stop
that
ant!

So
wide
&
short!

Oh,
well
it's
tall
and
thin
in
here!

very
very
very
tall
and
thin

...

Maybe
tall and
thin is
a place?

It
got
really
dark.

It's not tall and thin...

it's tall and..

nothing...

It's
all
tall
&
nothing

TALL & THIN

TALL!

THIN!
