

Fatih is a *graphic designer and creative, based in Singapore* who is deeply passionate in the realm of typographic systems and graphic design, and draws his inspirations from language, history, culture, religion, and literature.

The majority of his works are based off ideas of the past, recontextualised for the modern setting. Fatih holds a belief that everything around him can spark inspiration if pondered deeply enough, yet recognises that sometimes, the most profound ideas strike when he least expects them. This balance of active thinking and spontaneous inspiration fuels his creative process.
