"I PLAY THIS CARD!!"

Yu Gi Oh is a TCG (Trading Card Game) that originated the Japanese manga with the same name created by Kazuki Takahashi.

The manga series has spawned a media franchise that includes multiple spin-off manga and anime series, a trading card game, and numerous video games. Most of these incarnations involve the fictional trading card game

known as Duel Monsters, where each player uses cards to "duel" each other in a mock battle of fantasy "monsters", forming the basis for the real life Yu-Gi-Oh! Trading Card Game tie in. Now with over 10,000 types of cards, 2023 is happily to be its 25th anniversary, or quarter-century as the official called it.

Snap that POCKY!

Pocky is a Japanese sweet snack food produced by the Ezaki Glico food company. Pocky was first sold in 1966, and was invented by Yoshiaki Koma. It consists of coated biscuit sticks.

It was named after the Japanese onomatopoeic word pokkiri, which is supposed to resemble the sound of the snack being cracked. The original

chocolate-coated Pocky was followed by an almond-coated variant in 1971, and a strawberry coating in 1977.

Today, the product line includes variations in the flavored coatings, such as milk, mousse, green tea, honey, banana, cookies and cream, strawberry and coconut, and themed products such as "Decorer Pocky", with colorful decorative stripes in the coating, and "Men's Pocky", a "mature" dark (bittersweet) chocolate version.

The Queer Experience & History

The last 99 years in the United States

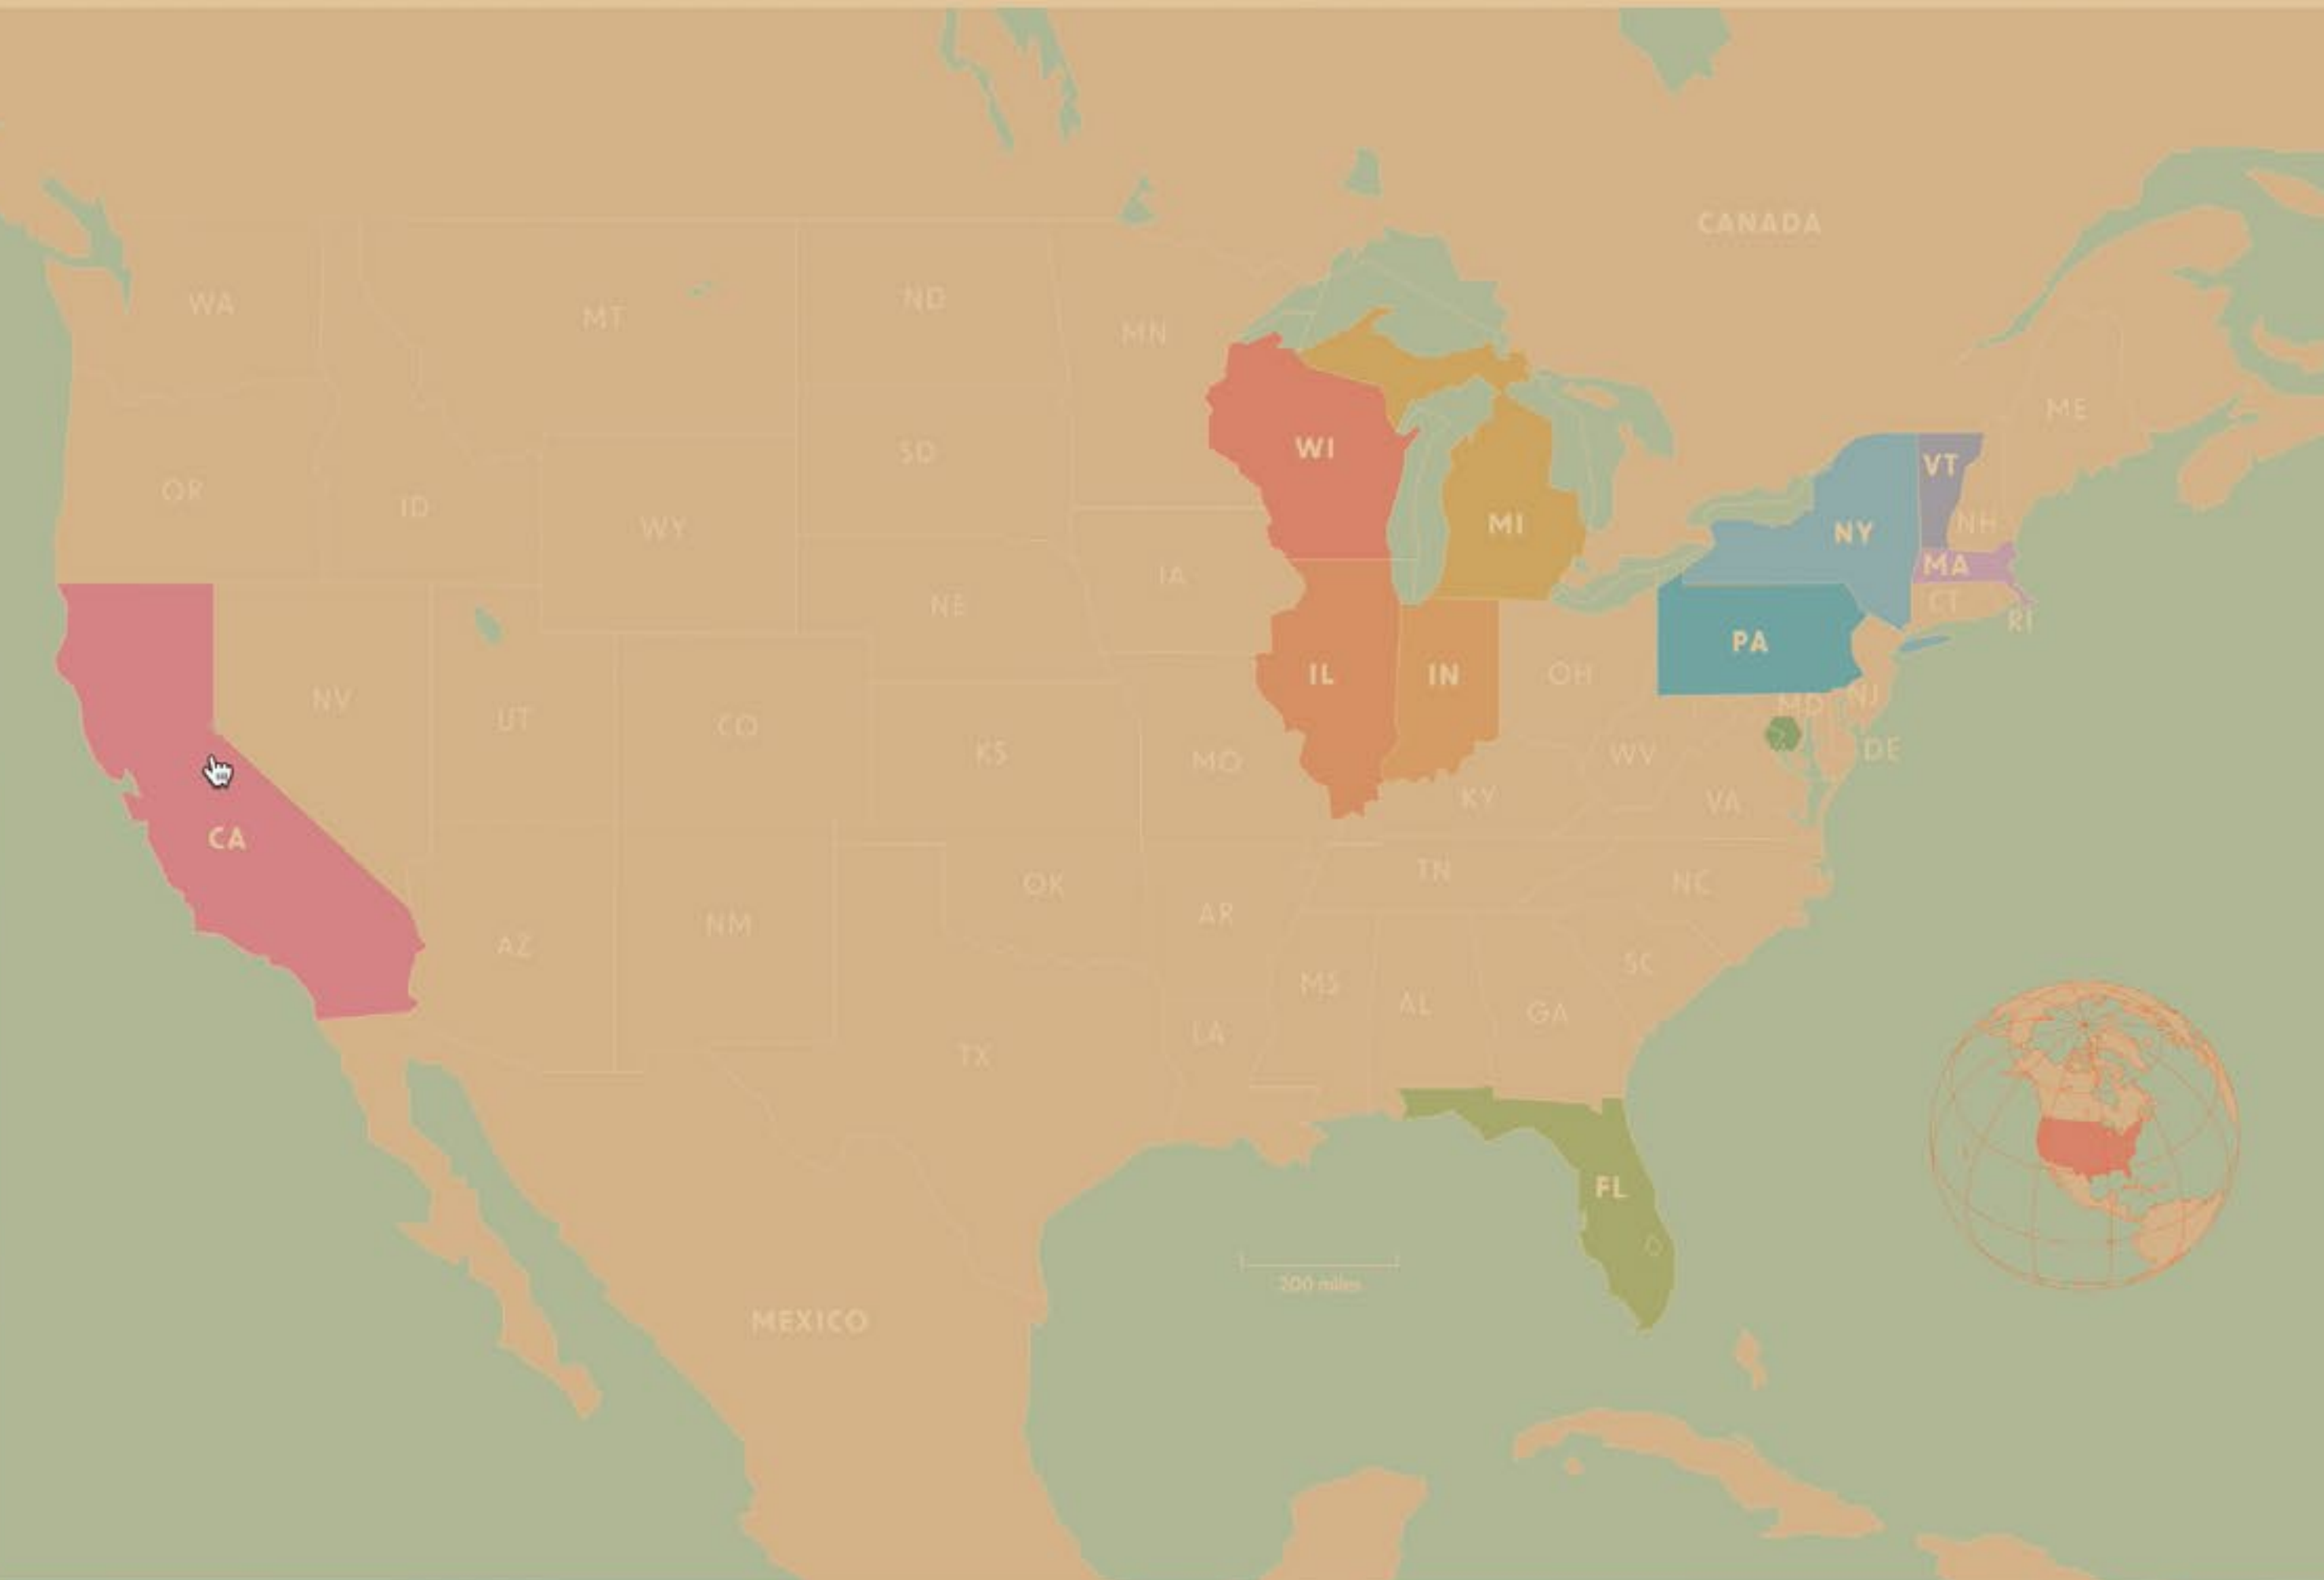

Except for Alaska and Hawaii due to lack of events

Queer people have existed forever, across countries and cultures. Before the Americas were colonized, the Two-Spirit identity was a part of and existed throughout the continent. When Indigenous groups were colonized by Christian Europeans, the Christian beliefs were forced upon them. These colonizers destroyed Native American families and histories, forced them to assimilate and forget their culture. Christianity as we know it today condemns same sex couples, any expression of gender outside their binary, and trans or gender nonconforming people. The US is built on these colonialist actions and ideas; until we dismantle the systems they are built on they will always affect any progress we make.

This map marks major events in the history of LGBTQ+ people in America, the majority of events take place in 10 states and DC. These states tend to group together near the coast or great lakes, this is because that's where most people live. In general we can make change happen when we're together more effectively than when we are separate. Larger cities become welcoming to queer people as more move to the city and create communities.
