## ANCIENT BEAUTY

Homegrown and international designers alike are in thrall to Egypt. Dior staged its men's fall 2023 runway show in front of the pyramids, while James Turrell is paying homage to those world wonders in new pieces for Lalique. Primeval myth, too, is seen in the lions' feet, lotuses, and modes of transit—like Atet, the infamous boat of Ra—being reimaged as furniture pieces. —Parker Bowie Larson
