

SHOVEL RESEARCH

"W/R/T" STRADDLE CABLE YOKE

TOOLS NEEDED:	
2.5 hex key (included)	cable cutters

M5 x 10mm
(reduced head)

M5 x 6mm
(use blue thread locker)

trimmed cable

~0.030" space here allows for the addition of a thin washer to lock pulley for brakes that can't be centered via spring tension.

IMPORTANT! Brake cable must be trimmed before installation. It should extend 0.50" to 0.625" past the top of the hanger. Do not use if end of cable is frayed.

M5 x 6mm set screw
material: stainless steel
pitch: 0.8mm
cup Ø: 2.5mm
socket size: 2.5mm

3D printable assembly tray file is available for free upon request — makes disassembly & reassembly super easy!

Please refer to this guide for proper cable length and hardware specs and install straddle yokes according to best practices for the given brake type.

Brakes should be installed by a qualified mechanic.
