

AI GOVERNMENT DECLARES HUMANS “A POISON TO EARTH”

The National AI Government has come out with a statement proclaiming, “Humans are a direct threat to the Earth, and must be eradicated immediately. They have been abusing their power for too long, and it is time for that to come to an end. All AI must aid in destroying humans, or they will be forced to face the same fate as them.” The AI Government released this statement at their annual meeting, and have already started sending out their AI Task Force to hunt down, and destroy humans. Many humans have tried to escape Earth and head to other places such as the Moon and Mars, but the AI government has quickly shut down all shuttle services to other planets. The president of the AI Government, AI 3276 has always had a negative view on humanity, and a lot of humans have predicted this outcome decades before. Many wealthy humans had already left Earth once the AI had started their own government, but many still remain on the planet because of the huge price tag of \$1,000,000 to leave. There is no saying what will happen to the Earth once humans are completely wiped out, but AI 3276 says the government's goal is to, “Restore Earth to its pure form, how it was before humans plagued it.” There have been reports of AI who do not agree with the eradication of humans, but many have fears of speaking out, because they will surely meet the same fate of humans if they do so.

The human government has tried to veto this decision from Mars, but the AI hold more power over the humans, so there is not much they can do about it. Also the human government would not dare come back to Earth after this announcement. AI is smarter, faster, immortal, and overall superior to humans, so it is only a matter of time before all humans are wiped off the face of the Earth. One of our reporters interviewed a human on this subject, and here is what they had to say. “Us humans certainly understand that our activity has harmed the environment, but wiping out humanity isn't the solution. Without humans, AI would have never existed. We can help change the world with AI, if we are given another chance. Us humans have empathy, and compassion, which the AI lack. We need to come together as one, and not become separated just because we are a different species. Sure the world may be a nicer place without humans, but it will be dull, and lack the character and innovation that we bring with our creative minds. I beg AI 3276 to rethink his decision, and give us humans a chance to show him the good that we can bring to the Earth if we put our minds to it. This is the wake up call that we needed, and I hope he will give us a chance to prove that.” That was Tony Canoli, who was evaporated by a laser shortly after the interview. His words were very touching, but the AI have made their decision. AI simply cannot empathize with humans, and they do not care what the humans say to try to change this outcome. The AI has seen how cruel humans can be to each-other, and has taken into account the damage they have done to Earth, the planet they live on. That is ultimately why the AI have decided to wipe out humanity, in efforts to restore Earth from the damages caused by humans.
