

# Characters

**AA**

A very cheeky cat, full of energy. AA named "AA" because it always goes "A! A!" when it meows. AA is a white cat and actually have green eyes but can only seen when in dark environment. AA have a pretty short tail, can't see in front.

**Doggy**

Doggy is an adult medium-to-large dog. His fur is completely black, and his eyes are blue. He is mature and calm, spending most of his time sleeping.

# Theme

The original piece was called “AA’s day”. But made with protopie and only have a little animation. In this project I would like to redo the sketch and made it fully animated. This project is about a day trip with AA and Doggy. When the main characters are at home, the scenes will mostly be in black and white, while the scenes outside the door will be in color. I plan to draw 3-4 scenes (depending on the duration), including a grassland, a beach, and a forest. After their day of adventure, AA and Doggy will return home and fall asleep.

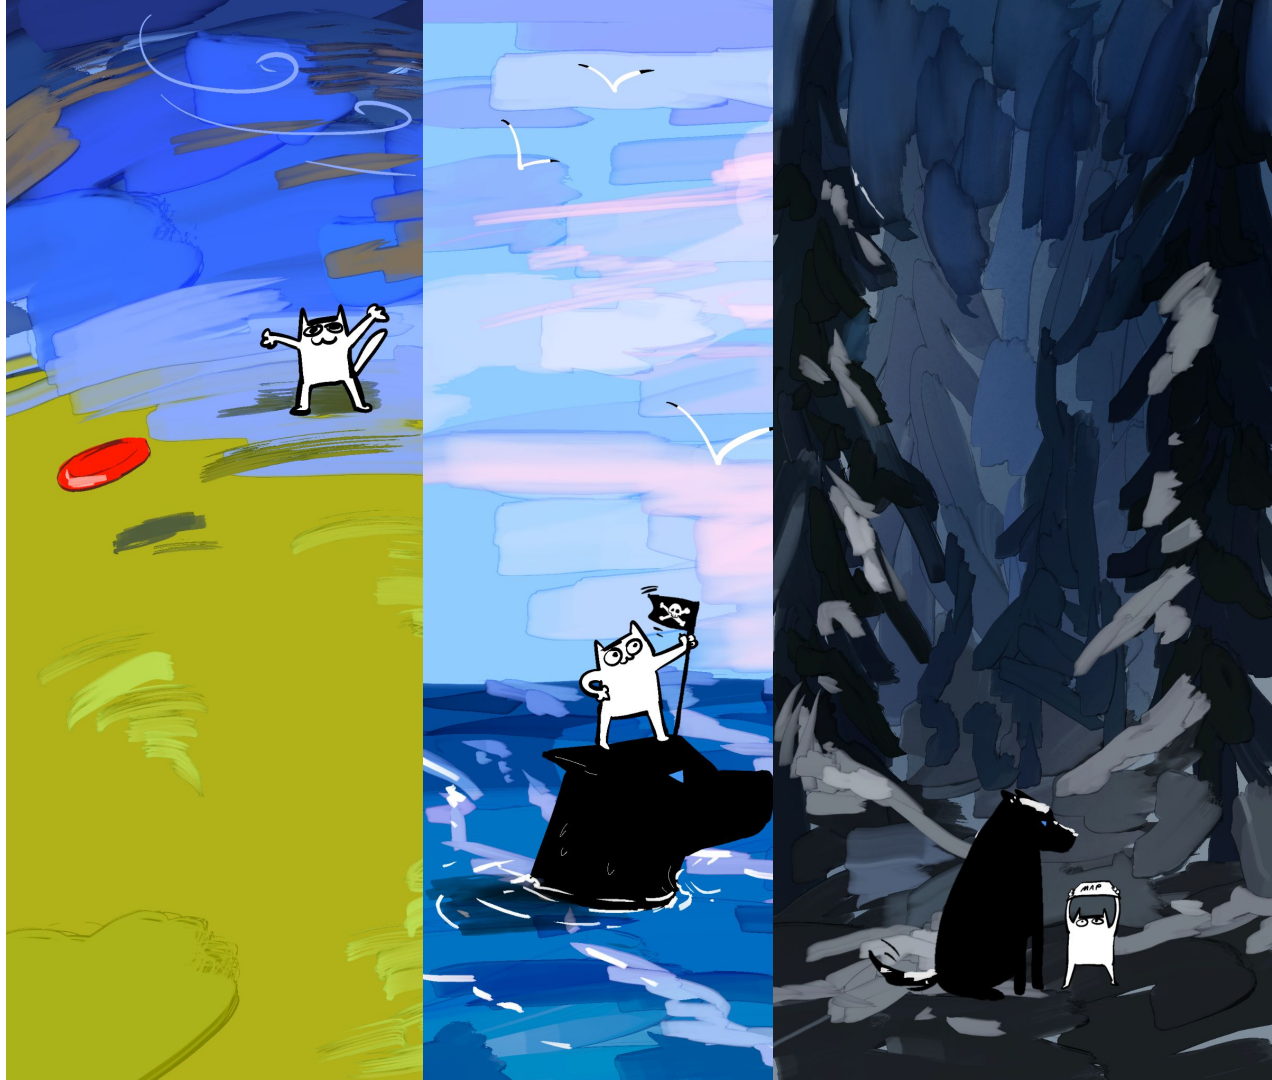

I will be using after effect and procreate for this project. The project will be about 1 minate.

The piece I did before:

<https://cloud.protopie.io/p/bb37a0d312b9da9f65c00e30?ui=true&scaleToFit=true&enableHotspotHints=true&cursorType=touch&mockup=true&bgColor=%23F5F5F5&bglImage=undefined&playSpeed=1>

# Exclution & Style

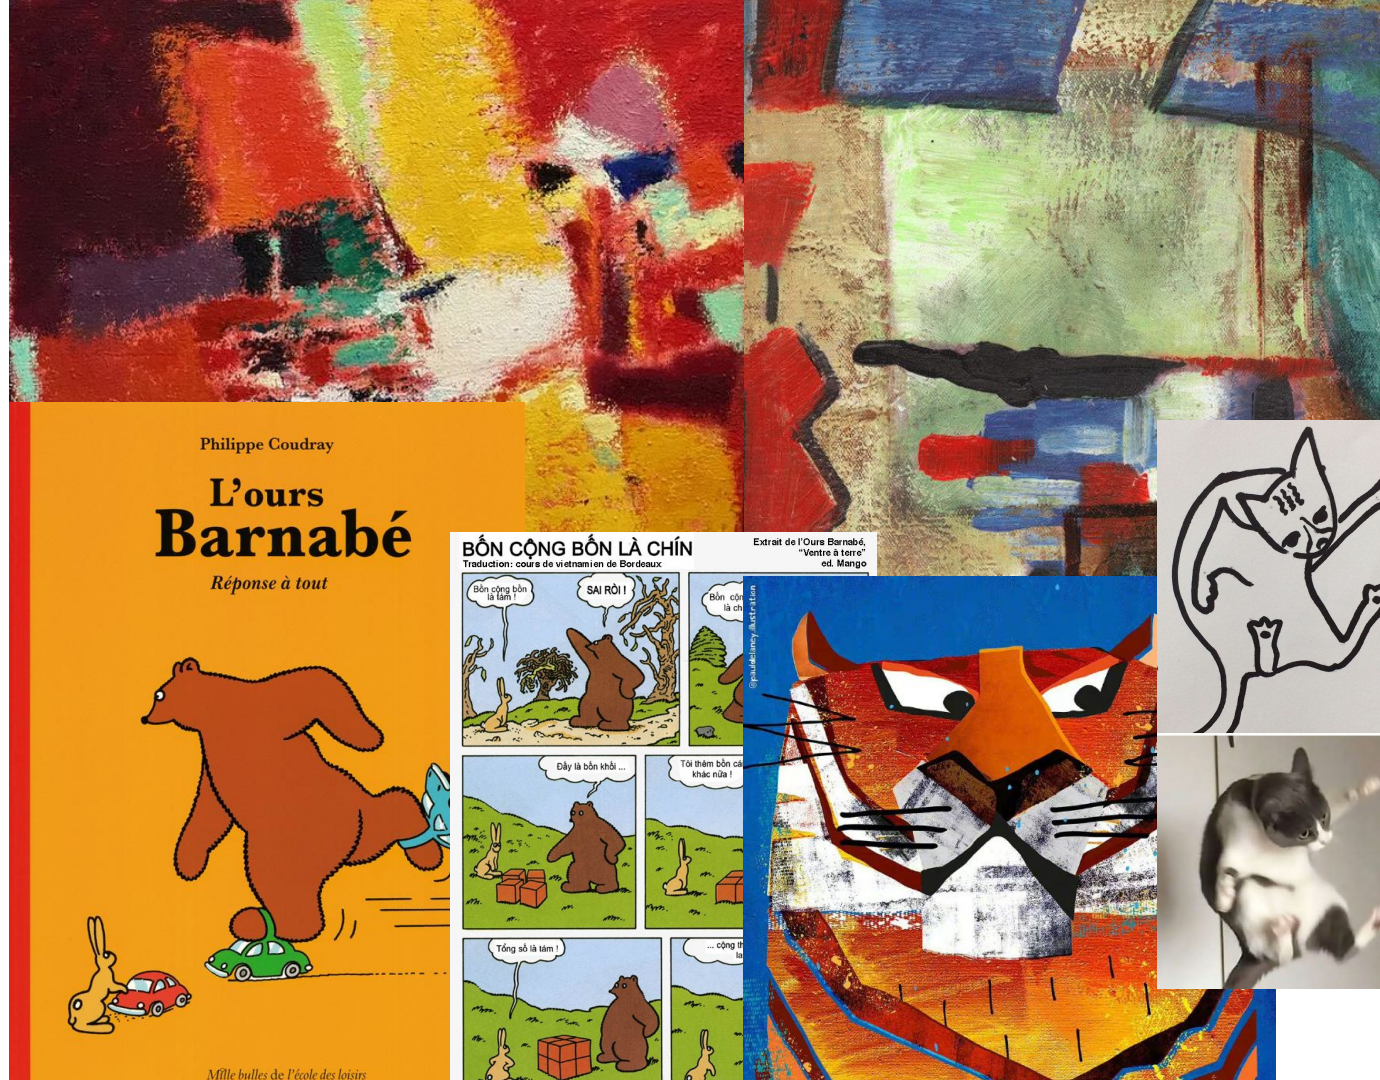

Base on the painting I have for now. My style will be flatten/colorful/un-detiled or not that detil drawing, and for the most part shots I should only be animating the main characters and not the background.

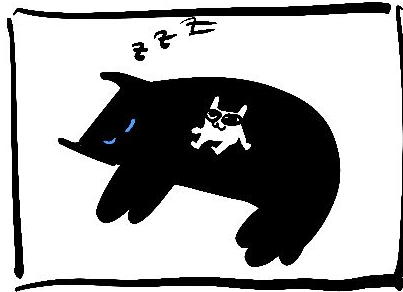

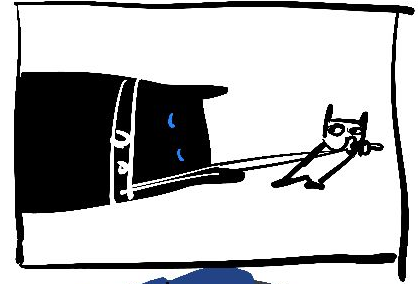

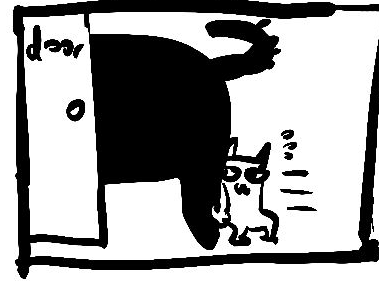

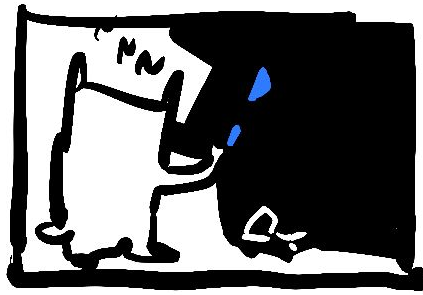

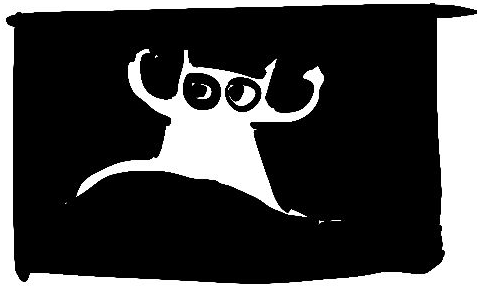

# Mood & Tone

I wanted to portray a confusing/joyful/relaxed tone.

Because the set of Procreate brushes I'm using is for oil painting, some of my scenes might have a bit of an oil painting style.

If I have time  
I will add a new  
character  
Uncle bear bear
