The lost city of Plexis is more than just a myth; it is a testimony to the most fundamental shapes in the universe: the circle and the square. Built tens of thousands of years ago by a civilization of great intellectual and technological advancement, the city was designed to harness the cosmic energy emanating from these shapes. Its exact location remains a mystery, recorded only in arcane texts and the dreams of those sensitive to the geometric pulse of the world. The architecture is said to be nothing short of a marvel, its structures defying the normal limits of time and gravity, hinting at the advanced knowledge of its creators.
